## **Prisons A Study Of Vulnerability:**

**Vulnerability and Incarceration** Elizabeth Victor, 2019-07-09 In light of a history of exploitation by researchers most of the limited scholarship on prisoners in medical ethics is focused on precaution and protections Vulnerability and Incarceration Evaluating Protections for Prisoners in Research explores the best ways for researchers to balance these concerns with the rights of incarcerated persons to both participate in medical research and benefit from medical and scientific progress The book examines the historical and contemporary regulatory landscape governing prisoner participation in research and the concept of vulnerability in play when classifying prisoners as vulnerable Elizabeth Victor discusses how this concept might preclude a prisoner's positive right to participate in research from being acknowledged She also addresses the differences in oversight between public and private prisoners and how the shift to privatized prisons compounds the vulnerability of prisoners in the United States

**Prisons, Punishment, and the Family** Rachel Condry, Peter Scharff Smith, 2018 Every year millions of families are affected by the imprisonment of a family member Children of imprisoned parents alone can be counted in millions in the USA and in Europe It is a bewildering fact that while we have had prisons for centuries and the deprivation of liberty has been a central pillar in the Western mode of punishment since the early nineteenth century we have only relatively recently embarked upon a serious discussion of the severe effects of imprisonment for the families and relatives of offenders and the implications this has for society This book draws together some of the excellent research that addresses the impact of criminal justice and incarceration in particular upon the families of offenders It assembles examples of recent and ongoing studies from eight different countries in order to not only learn about the secondary effects and collateral consequences of imprisonment but also to understand what the experiences and lived realities of prisoners families means for the sociology of punishment and our broader understanding of criminal justice systems While punishment and society scholarship has gained significant ground in recent years it has often remained silent on the ways in which the families of prisoners are affected by our practices of punishment This book provides evidence of the importance of including families within this scholarship and explores themes of legitimacy citizenship human rights marginalization exclusion and inequality

*Prison Violence* Kimmett Edgar, Ian O'Donnell, Carol Martin, 2014-02-04 Prisons are dangerous places and assaults threats theft and verbal abuse are pervasive attributable both to the characteristics of the captive population and to an institutional sub culture which promotes violence as a means of resolving conflicts Yet the crimes perpetrated by prisoners on other prisoners have attracted little interest and criminological research has contributed little to an understanding of situations in which violence arises in penal institutions This book seeks to remedy this and to address and answer a number of key questions how do features of the prison social setting shape conflicts what social norms guide the decision to use violence what are the personal and social consequences of spending months or years in places where distrust and anxiety are normal how do staff respond to the dangers that are part of daily life in many prisons is it possible to identify factors associated with risk and resilience and what methods of handling conflicts do prisoners use that could prevent violence Prison Violence adopts a distinctive approach to answering these questions and is based on extensive research including interviews with both victims and perpetrators of prison violence it pioneers a conflict centred approach seeking to understand the pathways into and out of situations where there is potential for violence focusing on interpersonal and institutional dynamics rather than on individual psychological factors

**Catholic Social Thought and Prison Ministry** Elizabeth Phillips, Férdia J. Stone-Davis, 2024-03-29 This book explores how the themes and insights of official Catholic Social Teaching CST and broader Catholic social thought might illuminate and be illuminated by a deeper engagement with the context of prisons What resources might Catholic social thought bring to pastoral work in prisons And what might listening to the prison context bring to Catholic social thought The volume includes constructive proposals for the relationship between CST and prison ministry as well as critical questions about the role and shortcomings of prisons CST and chaplaincy It contains contributions by scholars and practitioners of theology criminology and prison chaplaincy from the UK US and Ireland and reflects on the inextricable relationship of social action and pastoral care in the work of prison ministry

Therapeutic Process and Well-Being in Forensic Psychiatry and Prison Manuela Dudeck, Jürgen Leo Müller, Birgit Angela Völm, Najat R. Khalifa, 2021-02-17

Working with Vulnerable Populations Susana Castaños-Cervantes, Angélica Ojeda García, Cristina L. Reitz-Krueger, 2024-10-18 This book explores vulnerability in many forms and among diverse understudied vulnerable populations worldwide from different perspectives particularly from non western contexts It examines characteristics and profiles of vulnerable populations intervention strategies and recommendations for public policy actions in developing and emerging countries As the world becomes increasingly connected and localities become more diverse researchers and practitioners working to ameliorate human suffering cannot rely on one size fits all solutions especially when it comes to the most vulnerable members of society The book argues the need for interdisciplinary research and action and it challenges popular discourse on vulnerable groups and

intervention strategies in Western societies and developed countries. In particular, it includes a Latin American perspective seldom considered in research about vulnerability worldwide. With interdisciplinary contributors from four continents working in diverse fields such as social psychology, pedagogy, community psychology, medicine, sociology, clinical psychology, anthropology, and social work, this edited collection brings together theoretical and applied research evidence on three vulnerable population categories: physical vulnerability, psychological vulnerability, and social vulnerability. The book not only presents exhaustive solutions to any of the problems discussed therein but it also offers examples of the considerations that should be afforded when working with groups who have unique vulnerabilities. Among the topics covered in the chapters: Poor Doctor-Patient Communication; How Social Vulnerability Turns into Physical Vulnerability; Art Therapy Focus to Decrease Vulnerability; Condition and Increase Sense of Community; Pedagogical Guidelines for Vulnerability in Postmodernity; Working with Vulnerable Populations; Final Reflections and Implications; Working with Vulnerable Populations: A Multicultural Perspective. This book presents case studies, original research, and literature reviews that would engage students and professionals interested in social work, psychology, community organizing, public health, allied health professions, and other helping professions. Readers will gain insight into how work being conducted in various localities speaks to the challenges they may face in their own work or research. By exploring the unique issues facing vulnerable populations around the globe, we can apply those same considerations in our own communities.

Featuring 45 original essays by leading research ethicists, *The Oxford Handbook of Research Ethics* offers a critical overview of the ethics of human subjects research within multiple disciplines and fields including biomedicine, public health, psychiatry, sociology, political science, and public policy.

**Nutrition in Vulnerable Groups** Enbo Ma, Yukiko Wagatsuma, 2024-09-19

Nutrition requirements vary in children, pregnancy, and the elderly for the physiological difference in the body. To maintain good health and prevent diseases, the adequacy of nutrients is essential, and adherence to healthy diets recommended needs to be monitored. Uncertain physical, social, cultural, and economic situations limit access to nutritious intake and impact health, both in the developing and in the developed world. For example, wasting, stunting, underweight, and mineral/vitamin-related malnutrition and obesity exist in both developed and developing worlds. However, a healthy diet is not only determined by food safety and quality but also by food education, nutritional practice during the life stages, and food availability and accessibility to the population. This is true in developing countries but also in developed ones where vulnerable groups, including people living in conditions of poverty, unemployment, lack of schooling, people with forms of addiction, and ethnic minorities, struggle to adhere to healthy diets.

and choose cheaper and often unhealthy options As a consequence excessive consumption of limited nutrients and inappropriate supplementation becomes as unhealthy as not consuming enough In the past three years the pandemic of COVID 19 has put significant troubles on human society exacerbating hard life conditions in vulnerable groups and worsening their adherence to healthy lifestyles and food choices Therefore the nutrition and diet related health issues in vulnerable people must be highlighted and followed up

**Understanding Prisoner Victimization** Tom Daems, Elien Goossens, 2024-04-16 People in prison are usually and often exclusively seen and approached as persons who have committed one or more crimes and who have to pay their debt to society However while in prison they often get victimised themselves Research has demonstrated that prisons tend to be unsafe environments where various forms of victimisation take place These forms of victimisation often go unnoticed and usually do not attract much interest from policymakers or society at large prisoners are indeed far from ideal victims This book is devoted to understanding prisoner victimisation in particular from a European perspective Chapters in this volume focus on recent empirical work in a number of European countries Belgium England and Wales and the Netherlands These chapters are complemented with a series of reflections from a conceptual methodological and human rights perspective Chapter The Victim Offender Overlap in Prisons and Associated Challenges for Prison Managers is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com)

**Suicide Prevention** Robert J. Kosky, Hadi S. Eshkevari, Robert D. Goldney, Riaz Hassan, 2007-05-08 Proceedings of the XIXth Congress of the International Association for Suicide Prevention held in Adelaide Australia March 23-27 1997

Drawing on varied expertise from specialisms across the sub disciplines of social and cultural geography this book seeks to interrogate what it is to do research with people widely considered to be vulnerable Written from an emancipatory standpoint this book addresses the ethical and practical challenges that face researchers working with marginalised people With chapters exploring the authors own experiences of working with a wide range of participants including homeless people indigenous peoples drug addicts learning disabled children and prisoners the book draws on research undertaken by academics across the globe *Geographical Research with Vulnerable Groups* unpicks and interrogates each part of the research process from obtaining ethics permission from review bodies to recruitment and gatekeepers through to dissemination of research findings Throughout the discussion authors foreground the relational identities of the actors in the research process highlighting the ways in which institutional attempts to protect marginalised people from risk perpetuate a perceived and even material vulnerability This honest and empirically driven text will provide an illuminating insight for researchers embarking on research with marginalised people The chapters in this book were originally published as a special issue of *Social Cultural Geography*      *Mental Health, Crime and the Impact of Criminal Justice on the Vulnerable* Bevis E. McNeil,Maria De Angelis,Anthony Ó Donnghaile-Drummond,John Gregson,2024-10-12 This book addresses a variety of key issues surrounding mental health and the criminalization of certain individuals and groups by the Criminal Justice System and the impact this can have on their mental health It challenges the assumption that people with mental health problems are in some way a risk or danger to society and themselves and therefore have a greater propensity for committing crimes when in reality they are more likely to become the victims of crime It argues that the misguided correlations drawn between mental health and crime as perpetuated by the media policy makers clinicians agents of the criminal justice system and ultimately the public lead to the criminalization of the vulnerable Furthermore the criminalization stigmatization stereotyping labelling and discrimination endured by people with mental health problems has a devastating effect on their mental health and well being and has negative consequences for society as a whole Each chapter focuses on a specific area relating to mental health identifying key themes and issues as well as offering recommendations for improvements with regards to the treatment and support for people with mental health problems In addition the treatment of offenders with mental health problems who engage with the criminal justice system and its services such as the police prison and probation services is critically evaluated      **Exploring Vulnerability in the Criminal Justice System in England and Wales** Laura

Farrugia, 2024-08-01 Providing a comparative analysis of both vulnerable witnesses and vulnerable suspects this book discusses the increasingly difficult issue faced by many in modern policing forensic psychology criminology and social justice studies Examining recent legislation guidance current psychological theory and contemporary research and literature the book enhances the currently limited knowledge of vulnerability in the criminal justice system CJS through the presentation of theoretical understanding case law and real life case studies It also explores how vulnerable victims witnesses and suspects progress through the system in England and Wales from initially being identified as vulnerable through to the measures used to assist them during interviews and at trial In doing so it provides a historical overview of how vulnerability has previously been considered and how effective those with vulnerabilities were perceived to be in actively participating in the CJS Further chapters consider how vulnerable individuals are safeguarded the differences in services available to them and what this may lead to in terms of effective participation in the system How vulnerable groups are interviewed what is considered best practice and whether such practices are suitable also come under scrutiny Exploring Vulnerability in the Criminal Justice System in England and Wales is important reading for students and scholars of policing forensic psychology criminology and social justice studies It will also be of use for any organisations that conduct internal investigations such as non government organizations security and defence organisations and corporate organizations
