## **Pristina Medicamenta Ancient And Medieval Medical Botany Variorum Collected Studies Series 646:**

**Pristina Medicamenta** Jerry Stannard, Katherine E. Stannard, 2024-12-11 Jerry Stannard assembled a legendary collection of materials on the history of botany from Homer to Linnaeus and his mastery of the field was acknowledged as incomparable. However his work was sadly cut short by his death and so did not result in the ultimate synthesis he envisioned. The present volume and its companion *Herbs and Herbalism in the Middle Ages and the Renaissance* bring together his important output in articles and studies. In this selection of papers on pharmacy and medical botany from the classical period to 1500 Stannard combined philological expertise with the scientific perspective of modern pharmacology to measure the descriptive accuracy and therapeutic efficacy of *Materia Medica* from Hippocrates to the Renaissance. His sources included not only the obvious technical treatises but also works of literature and the traditions of folklore especially in Italy. Three studies of the scholastic botany of Albertus Magnus form the centrepiece of the collection and the detailed indexes cover both common and scientific names of plants.

**Herbs and Healers from the Ancient Mediterranean through the Medieval West** Anne Van Arsdall, Timothy Graham, 2016-04-22 *Herbs and Healers from the Ancient Mediterranean through the Medieval West* brings together eleven papers by leading scholars in ancient and medieval medicine and pharmacy. Fittingly the volume honors Professor John M. Riddle, one of today's most respected medieval historians whose career has been devoted to decoding the complexities of early medicine and pharmacy. *Herbs* in the title generally connotes drugs in ancient and medieval times; the essays here discuss interesting aspects of the challenges scholars face as they translate and interpret texts in several older languages. Some of the healers in the volume are named, such as Philotas of Amphissa, Gariopontus, and Constantine the African; many are anonymous and known only from their treatises on drugs and/or medicine. The volume's scope demonstrates the breadth of current research being undertaken in the field, examining both practical medical arts and medical theory from the ancient world into early modern times. It also includes a paper about a cutting-edge Internet-based system for ongoing academic collaboration. The essays in this volume reveal insightful research approaches and highlight new discoveries that will be of interest to the international academic community of classicists, medievalists, and early modernists because of the scarcity of publications objectively evaluating long-lived traditions that have their origin in the world of the ancient Mediterranean.

**Health and Healing from the Medieval Garden** Peter Dendle, Alain Touwaide, 2015 Fresh examinations of the role of medicinal plants in medieval thought and practice and how they contributed to broader ideas concerning the body, religion, and identity. The important and ever-shifting role of medicinal plants in medieval science, art, culture, and thought, both in the Latin Western medical tradition and in Byzantine and medieval Arabic medicine, is the focus of this new collection. Following a general introduction and a background chapter on Late Antique and medieval theories of wellness and therapy, in-depth essays treat such wide-ranging topics as medicine and astrology, charms and magical remedies, herbal glossaries, illuminated medical manuscripts, women's reproductive medicine, dietary cooking,

gardens in social and political context and recreated medieval gardens They make a significant contribution to our understanding of the place of medicinal plants in medieval thought and practice and thus lead to a greater appreciation of how medieval theories and therapies from diverse places developed in continuously evolving and cross pollinating strands and in turn how they contributed to broader ideas concerning the body religion identity and the human relationship with the natural world Contributors MARIA AMALIA D ARONCO PETER DENDLE EXPIRACION GARCIA SANCHEZ PETER MURRAY JONES GEORGE R KEISER DEIRDRE LARKIN MARIJANE OSBORN PHILIP G RUSCHE TERENCE SCULLY ALAIN
