on Emerging Issues in Corporate Governance Alireza Tourani-Rad, Coral Ingley, 2011 The book highlights emerging topics in key areas of corporate governance with special emphasis on traditionally unexplored issues It also aims to stimulate thinking and debate on vital aspects of practice and approaches to corporate governance The topics covered in this book deal with timely subjects written by eminent academics and renowned professionals with outstanding expertise in their respective fields who bring to fore the latest theories and provide an up to date overview of the extant literature on each topic More importantly they draw readers attention to implications for future research and developments The book not only contributes to the academic literature but also improves the decision making of regulators and investors *The Wired Northwest* Paul W. Hirt, 2012-10-18 The Pacific Northwest holds an abundance of resources for energy production from hydroelectric power to coal nuclear power wind turbines and even solar panels But hydropower is king Dams on the Columbia Snake Fraser Kootenay and dozens of other rivers provided the foundation for an expanding regionally integrated power system in the U S Northwest and British Columbia A broad historical synthesis chronicling the region s first century of electrification Paul Hirt s new study reveals how the region s citizens struggled to build a power system that was technologically efficient financially profitable and socially and environmentally responsible Hirt shows that every energy source comes with its share of costs and benefits Because Northwest energy development meant river development the electric power industry collided with the salmon fishing industry and the treaty rights of Northwest indigenous peoples from the 1890s to the present Because U S federal agencies like the Army Corps of Engineers and the U S Bureau of Reclamation built many of the large dams in the region a significant portion of the power supply is publicly owned initiating contentious debates over how that power should best serve the citizens of the region Hirt dissects these ongoing battles evaluating the successes and failures of regional efforts to craft an efficient yet socially just power system Focusing on the dynamics of problem solving governance and the tense relationship between profit seeking and the public interest Hirt s narrative takes in a wide range of players not only on the consumer side where electricity transformed mills mines households commercial districts urban transit factories and farms but also power companies operating at the local and regional level and investment companies that financed and in some cases parasitized the operators His study also straddles the international border It is the first book to compare energy development in the U S Northwest and British Columbia Both engaging and balanced in its treatment of all the actors on this expansive stage *The Wired Northwest* helps us better understand the challenges of the twenty first century as we try to learn from past mistakes and re design an energy grid for a more sustainable future *The Making of the Modern Company* Susan Watson, 2022-05-19 This book adopts a historical perspective to highlight and bring back into focus the key features of the modern company A central argument in the book is that legal personhood attaching to an entity containing a corporate fund seeded by shareholders is a direct and inevitable consequence of limited liability and the company s status as a separate legal entity from its shareholders Management by a board subject to legal duties to the company as an entity that can exist in

perpetuity facilitates a long term perspective by the board that can accommodate both shareholder and stakeholder interests These defining characteristics differentiate the modern company from other business forms The Making of the Modern Company applies a 21st century lens to the corporation through its history to identify turning points in its development It sets out how key features emerged in the course of two separate developmental cycles in English corporate law first with the English East India Company in the 17th century and then with general incorporation statutes in the 2nd half of the 19th century The book s historical perspective highlights that the key features are part of the secret sauce of modern companies Each cycle coincided with unparalleled periods of economic success associated with corporate activity This book will be of interest to corporate law and governance academics theorists and practitioners those who study the company from related disciplines and anyone who questions why uncertainty still exists about the structure of a legal form that has been described as amongst mankind s greatest inventions Fundamentals of Management Pardeep Kumar | Amanjot Sachdeva, This book Fundamentals Of Management is a comprehensive guide to the field of Management and its evolution practices and concepts This book covers at length the entire framework of syllabus for the Principals of Management at the graduate and Post graduate levels It is especially relevant for the students of B Com B Com Hons BBA BCA BBS MBA and other Management Programs of different Universities *Public Utilities Reports* ,1915 **The Silicon Empire** Michael B. Likosky,2018-01-18 Michael Likosky examines the continuities and discontinuities between colonial and present day high tech transnational legal orders His concern is specifically with the colonial characteristics of the legal order which underpins the global high tech economy He distinguishes the democratic and human rights rhetoric of this economy from a reality wherein the legal order is often used to reproduce colonial type relationships Just as in the colonial period the expansion of trans border commerce overlaps with democratic demands and human rights in complex multifaceted and paradoxical ways Through a case study looking at Malaysia s Multimedia Super Corridor a high tech national development plan and foreign direct investment scheme he examines how the transnational leaders of the high tech economy along with the Malaysian political elite react when human rights problems threaten to derail commercial plans **Marketing Research Report** United States. Department of Agriculture,1963
