Brock,2024 In *Farmed Out* Clare R Brock uses U S agricultural policy as a vehicle to explain how the rapidly polarizing political environment has altered the role of interest groups in Washington Drawing on over two decades of lobbying behavior data in the agricultural sector Brock argues that polarization has given interest groups greater influence over policy content particularly among their ideological and partisan allies Brock makes an important and original contribution to our

understanding of how interest groups now operate within a context of heightened partisanship lengthened time horizons and declining institutional capacity Interest Group Politics in the Northeastern States Ronald J. Hrebienar, Clive S.

Thomas, 2010-11-01 *Neopluralism* Andrew S. McFarland, 2004 Many of the basic issues of political science have been addressed by pluralist theory which focuses on the competing interests of a democratic polity their organization and their influence on policy Andrew McFarland shows that this approach still provides a promising foundation for understanding the American political process **Interest Groups, Lobbying, and Participation in America** Kenneth M.

Goldstein, 1999-08-13 Understanding why individuals participate in politics demands attention to more than just individual attributes and attitudes Similarly understanding how interest groups influence policy making demands attention to more than just the financial donations and direct activities of Washington based lobbyists To answer fundamental questions about what determines when and why people participate in politics and how organized interests go about trying to influence legislative decision making we must understand how and why political leaders recruit which members of the public into the political arena Looking from the bottom up with survey data and from the top down with data from interest group interviews Kenneth Goldstein develops and tests a theory of how tactical choices in a grass roots campaign are made In doing so he demonstrates that outside lobbying activities deserve a place in any correctly specified model of interest group influence political participation or legislative decision making **Pet Politics** Susan Hunter, Richard A. Brisbin, 2016-02-15 Although scholars in the disciplines of law psychology philosophy and sociology have published a considerable number of prescriptive normative and theoretical studies of animals in society Pet Politics presents the first study of the development of companion animal or pet law and policy in Canada and the United States by political scientists The authors examine how people and governments classify three species of pets or companion animals cats dogs and horses for various degrees of legal protection They then detail how interest groups shape the agenda for companion animal legislation and regulation and the legislative and administrative formulation of anticruelty kennel licensing horse slaughter feral and roaming cat and breed ban policies Finally they examine the enforcement of these laws and policies by agencies and the courts Using an eclectic mix of original empirical data original case studies and interviews and relying on general theories and research about the policy process and the sociopolitical function of legality the authors illustrate that pet policy is a unique field of political struggle a conflict that originates from differing perspectives about whether pets are property or autonomous beings and clashing norms about the care of animals The result of the political struggle the authors argue is difficulty in the enactment of policies and especially in the implementation and enforcement of laws that might improve the welfare of companion animals **The Politics of Problem Definition** David A. Rochefort, Roger W. Cobb, 1994 At the nexus of politics and policy development lies persistent conflict over where problems come from what they signify and based on the answers to those questions what kinds of solutions should be sought Policy researchers call this process problem definition Written for both scholars and students this

book explains how and why social issues come to be defined in different ways how these definitions are expressed in the world of politics and what consequences these definitions have for government action and agenda setting dynamics The authors demonstrate in two theoretical chapters and seven provocative case studies how problem definition affects policymaking for high profile social issues like AIDS drugs and sexual harassment as well as for problems like traffic congestion plant closings agricultural tax benefits and air transportation By examining the way social problems are framed for political discussion the authors illuminate the unique impact of beliefs values ideas and language on the public policymaking process and its outcomes In so doing they establish a common vocabulary for the study of problem definition review and critique the insights of existing work on the topic and identify directions for future research

**Competitive Interests** Thomas T. Holyoke, 2011-08-22 *Competitive Interests* does more than simply challenge the long held belief that a small set of interests control large domains of the public policy making landscape It shows how the explosion in the sheer number of new groups and the broad range of ideological demands they advocate have created a form of group politics emphasizing compromise as much as conflict Thomas T Holyoke offers a model of strategic lobbying that shows why some group lobbyists feel compelled to fight stronger wealthier groups even when they know they will lose Holyoke interviewed 83 lobbyists who have been advocates on several contentious issues including Arctic oil drilling environmental conservation regulating genetically modified foods money laundering and bankruptcy reform He offers answers about what kinds of policies are more likely to lead to intense competition and what kinds of interest groups have an advantage in protracted conflicts He also discusses the negative consequences of group competition such as legislative gridlock and discusses what lawmakers can do to steer interest groups toward compromise The book concludes with an exploration of greater group competition conflict and compromise and what consequences this could have for policymaking in a representation based political system

WTO Cotton dispute and its significant jurisprudential and negotiating effect on disciplining and containing the negative effects of highly trade distorting agricultural subsidies of developed countries To that end this work details the historic economic and political background leading up to Brazil s challenge of the US cotton subsidies and the main findings of the five WTO reports that largely upheld that challenge It explores the impacts of the successful challenge in terms of political and negotiating dynamics involving agriculture subsidies and other trade related issues in the WTO while examining the effects on domestic agriculture subsidy reforms in the United States and the European Union Finally this volume sets forth the possible impacts of the Cotton challenge on the negotiating end game of the Doha Development Round
