Analogical City Cameron McEwan, 2024-01-18 In *Analogical City* Cameron McEwan argues for architecture's status as a critical project McEwan revisits architect Aldo Rossi as a paradigmatic figure of the critical rational tradition studying a neglected aspect of his thought the analogical city to excavate its potential McEwan develops a grammar of the analogical city under the headings of Imagination Transformation City Multitude and Project McEwan argues that the analogical city is critical collective and emancipatory Analogical thought and understanding cities as analogical might open the conditions of possibility for rethinking the critical project in architecture At a time when the humanities and the sciences are threatened by irrational thought from climate denial to post truth narratives and when architecture has seemingly disavowed its critical capacity and political possibility through its commodification as an instrument of the neoliberal city McEwan offers critical strategies conceptual tools figures of thought and knowledge practices to articulate modes of thinking and acting differently within architectural criticism and practice Today knowledge is a common terrain of struggle and thought requires constant reinvention The task of architecture and critique more broadly must be to interpret the world in order to change it Consequently *Analogical City* proposes modes for imagining the city the subject and the world otherwise towards a more egalitarian and critical architecture of the city Ultimately the analogical city is not a fully developed theory nor is it only an intuitive poetic or purely formal practice as some critics propose McEwan argues that the analogical city is poetic and political it always refers beyond itself towards a collective and critical project of the city and yet it invites a series of formal spatial and graphic operations comprising erasure and negativity followed by substitution and remontage
