Renza,2002-04-01 Throughout the history of the United States a commitment to both democratic political ideals and to capitalist realities has made privacy a persistently controversial issue Only rarely however has privacy attracted the attention of American literary criticism In his ingeniously argued new study Louis A Renza extends the idea of privacy beyond the received wisdom of its popular legal and psychological conceptions and iconoclastically beyond its conception in postmodern literary theory to show that the public private paradigm has import for American literary texts past and present It is a truism of cultural studies that the interior space of imagination is socially constructed and thus that the private is ineluctably political But Renza shows through a brilliantly original analysis of works by Edgar Allan Poe and Wallace Stevens that as an effect of reading and writing a real or radical privacy continually resists appropriation In admirably close readings of Poe s tales his long essay Eureka and Stevens s Harmonium poems Renza demonstrates that both writers ground the concept of privacy in the possibility of multiple interpretations of their texts Neither Poe nor Stevens resists meaning or sense but by thematically engaging in their work the inescapable public private dichotomy of artistic creation they create a highly personal idiom that like Poe s purloined letter allows them to hide in plain sight and in that way to finesse public constructions of meaning Thus surprisingly privacy can always be conceived as something more than what current social cultural codes urge us to believe The poetics Renza compellingly elucidates does not deny the insights of current theory but offers a refreshing alternative that allows for the radical autonomy of authorship without resorting to vague elitist claims of individual genius His thoughtful readings are a major contribution to traditional Poe and Stevens scholarship and his challenging thesis will provoke new investigations into the privacy issue in American literature as a whole *The Impact of the Family* John Witte,Michael Welker,Stephen Pickard,2022-02-22 The family is humanity s oldest and most basic social institution but today it is fragile fractured and fraught in many liberal lands This volume gathers scholars from sociology psychology history religion ethics law and medicine from five continents to analyze the complex nature and place of the family in character formation and human flourishing The chapters study the impact of

catechesis schooling work and discipline on the development of individual moral agency and responsibility They document the critical roles of family love trust fidelity and story telling in shaping the moral character of all family members from infancy to old age They describe effective strategies of resistance and resilience for family members who face abuse divorce death chauvinism racism and homophobia And several chapters challenge modern arguments and policies that aim to flatten if not abolish the marital family even while they call for family law reforms Contributions by Enola G Aird Helen Alvar Robert N Bellah Margaret Jane Brining Michael J Broyde Marcia Bunge Stephen Carter Jean Bethke Elshtain Robyn Fivuush Patrick Hornbeck Andreas Kruse Nadia Marais Gordon Mikoski Bonnie Miller McLemore Patrick Parkinson Katja Patzel Mattern Sabina Pauen Stephen G Post Eugene C Roehlkepartain and Thomas Xutong Qu *Matters of Mind* Scott Sturgeon,2003-08-27 Matters of Mind examines the mind body problem It offers a chapter by chapter analysis of debates surrounding the problem including visual experience consciousness and the problem of Zombies and Ghosts It will prove invaluable for those interested in epistemology philosophy of mind and cognitive science **Legislating Privacy** Priscilla M.
