Private Independent Schools 2003:

Private Education Geoffrey Walford, 2005-11-24 Private schools are central to the reproduction of social inequality For example whilst in the UK providing only about seven per cent of the school population about half of the undergraduates at Oxford and Cambridge still come from the private sector Private schools have long been associated with privilege and elitism While this traditional elitist aspect to the private sector is still central the private school sector is actually far more diverse that is usually acknowledged It now includes many small schools and faith based schools that may not offer the traditional advantages of the private sector but which provide a particular environment deemed desirable by parents In spite of their educational and social importance there has been very little academic research and writing on private schools The proposed book will be the culmination of Professor Walford's research into private schools over the past twenty years

institutions providing a Protestant education have always been respected and sought after for their rigor and relative freedom from dogma and despite today's secularism and plurality they remain so. This international handbook is the ultimate companion to Protestant schooling worldwide. Its 39 chapters form the most comprehensive and wide-ranging treatment of the subject yet available, addressing Protestant education on all six inhabited continents and featuring the perspectives of leading authorities and public figures. The contributions cover in detail not only the facts and features of Protestant schooling in sundry nations but also integrate a range of themes common to them all, themes so vital that they are of central concern to Christians around the world and of whatever denomination. Some of these topics are school choice, globalization, Bible pedagogy and character education, the fine arts, parental involvement and the rise of Christianity in previously inaccessible locations such as China. The handbook's stellar list of authors is a Who's Who of authorities on the subject and includes a renowned American evangelical, a former historian of the US House of Representatives and White House consultants responsible for framing legislation. The many contributors from outside the USA are leading academics conducting seminal research on numerous topics in the field. Both exhaustive and authoritative, *The International Handbook of Protestant Education* will be an invaluable asset to educators, ministers, parents, policy makers, political leaders of any denomination or none.

Race at Predominantly White Independent Schools Bonnie E. French, 2017-11-22 In *Race at Predominantly White Independent Schools* Bonnie E French investigates the management of diversity at predominantly White independent schools in the northeastern United States By conducting in depth interviews with diversity policy developers and implementers within the independent school community French explores current efforts toward racial equity and the relationship between racial equity and diversity Data collected from interviews are supplemented with numerical data from the National Association of Independent Schools that chronicles enrollment and employment of people of color as well as with content analysis of published materials from the independent school community Using Critical Race Theory to frame this critique French argues that the diversity movement by not seeking to challenge the current state of inequality in a meaningful way only serves to strengthen the segregated and unequal status quo

Educating Citizens Patrick J. Wolf, Stephen Macedo, 2004-09-30 The United States is in the midst of historic experiments with publicly funded choice in K 12 education experiments that recently received a green light from the Supreme Court Other nations have long experience with the funding and regulation of nonpublic schools including religious schools This book asks what U S policymakers public officials and citizens can learn from these experiences In particular how do other countries regulate or structure publicly funded educational choice with an eye toward civic values looking not only for improvements in test scores but also in tolerance civic cohesion and democratic values such as integration across the lines of class religion and race The experience of Europe and Canada with school choice is both extensive and varied In England and Wales public school choice is widespread as parents play a significant role in selecting the school their children will attend In the Netherlands and much of Belgium a majority of students attend religious schools at government expense In Canada France and Germany state financed school choice is limited to circumstances that serve particular social and governmental needs In Italy school choice has just recently arrived on the policy agenda In spite of the diversity of national experiences in all of these countries choice is regulated by the government in significant and varied ways to promote civic values In several of these countries school choice policy itself appears to have played an

important role in promoting social cohesion and integration This book presents a wealth of experience designed to aid policymakers and citizens as they consider historic changes in American public education policy

Transnational Influences on Values and Practices in Nordic Educational Leadership Lejf Moos, 2013-03-15 This book explores to what extent transnational influences change national local values and practices in the Nordic educational systems It provides country cases and thematic chapters that give nuanced insights into the influence of transnational agencies on national governance and discourses It describes how national discourses and regulation influences school leadership values culture and practice in competition with traditional values The transnational and global discourse on educational leadership is mostly formed according to Anglo American thinking and tradition Pivotal foundations of this discourse are strong hierarchical societies class societies with liberal democracies and clearly streamed education systems The Nordic discourse however builds on a more equal society and flat hierarchies with participatory democracy and on comprehensive schooling with strong local community roots Leadership thinking and practices are formed by the culture and context they are part of they are primarily shaped by the national local values traditions and practices and only partially shaped by politics discourses and literature Due to the fact that a great deal of the literature that is being used in the Nordic contexts is of Anglo American origin and many of the research projects have Anglo American foundations it is difficult to distinguish the sources for leadership thinking and practice This book distinguishes the Nordic from the Anglo American thinking and presents important findings and arguments for leadership practitioners inside as well as outside the Nordic countries
