in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea International Dispute Settlement MaryEllen O'Connell,2017-07-05 The very purpose of international law is the peaceful settlement of international disputes Over centuries states and more recently organizations have created substantive rules and principles as well as affiliated procedures in the pursuit of the peaceful settlement of disputes This volume of the Library of Essays in International Law focuses on the classic procedures of peaceful settlement negotiation good offices inquiry conciliation arbitration judicial settlement and agencies for dispute resolution The introduction provides a unique historic overview explaining how the procedures first developed and changed over time Each chapter features a seminal essay that helped create the changes described in the introduction Being at the center of international law dispute resolution has always been a core topic of international scholarship this volume brings together for the first time the pivotal writing in the field *The Transformation of Enforcement* Hans-W Micklitz,Andrea Wechsler,2016-04-07 This insightful book considers the phenomenon of the transformation of enforcement in European economic law while adopting a distinct global perspective The editors identify and respond to the need for reflection on transformation processes in the area of enforcement by bringing together the leading international and European scholars in a variety of disciplines to share and compare experiences and learning in different areas of law Rooted in a wide and regulatory understanding of enforcement this book showcases the transformation of enforcement with reference to both European economic law especially transnational commercial law competition law intellectual property law consumer law and to the current context of significant global economic challenges Comparative perspectives facilitate the formation of a holistic perspective on enforcement that reaches beyond distinct theoretical accounts political agendas regulatory systems institutional patterns particular remedies industry sectors and stakeholder perspectives As the first comprehensive and comparative analysis of the enforcement of European economic law that reaches beyond closely confined areas of law it constitutes a crucial contribution to the theoretical and policy questions of how to design a coherent European enforcement architecture in accordance with essential principles and objectives of the EU economic order This unique study will have broad appeal By exploring enforcement transformations from a legal and a cross disciplinary perspective it will be essential reading for scholars practitioners and policymakers from different disciplines Fundamental Principles in PPP Laws Reinaldo Fioravanti,Carolina Lembo,Gastón Astesiano,Rosane Lohbauer,Rodrigo Barata,Natasha Rosset,2019-05-07 Investment in infrastructure is admittedly one of the main forms of economic development Traditionally the Public Administration implements infrastructure projects committing taxpayers money to finance them For the past decades demand for infrastructure has been growing steadily but public funds for current and future needs are

limited and the public finances of many governments have increasingly reached a point where long term borrowing is not a ready option In a recent study GI Hub estimated the cumulative global infrastructure need from 2015 to 2040 and the investment gap for the period US 94 trillion would be needed in investment and the gap is US 15 trillion This has led the government to accept the growing importance of the private sector participation in the financing and management of infrastructure projects so it began seeking alternative methods of procurement One method whose applicability is increasing is the use of public private partnerships PPPs to finance and or manage infrastructure projects In this regard well prepared infrastructure projects can generate high social rate of returns and improves well being whereas inadequate infrastructure represents a barrier to growth and improved quality of life and can lead to unsustainable financial burdens for the government especially in developing countries Although not all infrastructure is suitable to follow the PPP route those policy makers that choose to shift from public infrastructure financing to private partner have to consider the nature and motivations of long term investors and the generation of value for money as well that is to align the interests of both the public and private sectors With the participation of a private partner in well prepared investment projects there may be larger investments and the population s life quality improvement Also PPPs are a way to introduce private sector technology and innovation into providing better public services through innovative planning and design and efficient project management Building and maintaining infrastructure are essential for economic expansion and social development if delivered efficiently and effectively it can translate into economic growth However the world is not spending enough on infrastructure to catch up with technological changes urbanization and shifting demographics The Inter American Bank IDB and the Global Infrastructure Hub GIH decided to analyze and carry out a research on the legal framework for PPPs in Latin America and the Caribbean Region to establish guidelines on PPP law leading practices
