Amelia Earhart's prominence in American aviation during the 1930s obscures a crucial point she was but one of a closely knit community of women pilots. Although the women were well known in the profession and widely publicized in the press at the time, they are largely overlooked today. Like Earhart, they wrote extensively about aviation and women's causes, producing an absorbing record of the life of women fliers during the emergence and peak of the Golden Age of Aviation, 1925-1940. Earhart and her contemporaries, however, were only the most recent in a long line of women pilots whose activities reached back to the earliest days of aviation. These women too wrote about aviation, speaking out for new and progressive technology and its potential for the advancement of the status of women. With those of their more recent counterparts, their writings form a long sustained text that documents the maturation of the airplane, aviation, and women's growing desire for equality in American society. *In Their Own Words* takes up the writings of eight women pilots as evidence of the ties between the growth of American aviation and the changing role of women. Harriet Quimby (1875-1912), Ruth Law (1887-1970), and the sisters Katherine and Marjorie Stinson (1893-1977, 1896-1975) came to prominence in the years between the Wright brothers and World War I. Earhart (1897-1937), Louise Thaden (1905-1979), and Ruth Nichols (1901-1960) were the voices of women in aviation during the Golden Age of Aviation. Anne Morrow Lindbergh (1906-2001), the only one of the eight who legitimately can be called an artist, bridges the time from her husband's 1927 flight through the World War II years and the coming of the Space Age. Each of them confronts issues relating to the developing technology and possibilities of aviation. Each speaks to the importance of assimilating aviation into daily life. Each details the part that women might and should play in advancing aviation. Each talks about how aviation may enhance women's participation in contemporary American society, making their works significant documents in the history of American culture.

The Pulitzer Air Races Michael Gough, 2013-05-17 Three years after American raceplanes failed dismally in the most important air race of 1920, a French magazine lamented that American pilots have broken the records which we here in France considered as our own for so long. The Pulitzer Trophy Air Races, 1920 through 1925, endowed by the sons of publisher Joseph Pulitzer in his memory, brought about this remarkable turnaround. Pulitzer winning speeds increased from 157 to 249 mph, and Pulitzer racers mounted on floats twice won the most prestigious international air race, the Schneider Trophy Race for seaplanes. Airplanes, engines, propellers, and other equipment developed for the Pulitzers were sold domestically and internationally. More than a million spectators saw the Pulitzers; millions more read about them and watched them in newsreels. This is the first book about the Pulitzers, telling the story of businessmen, generals, and admirals who saw racing as a way to drive aviation progress; designers and manufacturers who produced record-breaking racers and dashing pilots who gave the races their public face. It emphasizes the roles played by the communities that hosted the races: Garden City, Long Island; Omaha; Detroit; and Mt. Clemens, Michigan; St. Louis; and Dayton. The book concludes with an analysis of the Pulitzers' importance and why they have languished in obscurity for so long.
