Rachel Carson Environmemnt New Directions:

New Directions in Global Political Governance John J. Kirton, Jun'ichi Takase, 2002 Focused on politics and security this volume extends the G8 and Global Governance series into the domain of international security in both its classic and newer forms Going beyond the conventional focus on globalization it takes up the central question of shaping international order looking at the emergence of several important phenomena including The advent of human security The global importance of once deeply domestic security issues Enhanced demands for civil society participation Sections on Japan's perspective on the G8 and international order critical issues in global security governance and the role of international institutions and American leadership therein make this a distinctive account of international security in the 21st century

Rachel Carson the Environmental Movement Elizabeth Ring, John Henricksson, 1991-01-01 A biography of the biologist focusing on her childhood in Pennsylvania her growing interest as an adult in environmental concerns and the importance of her book *Silent Spring* in exposing the environmental harm done by pesticides *Rail Transport of Hazardous Materials* United States. Congress. Senate. Committee on Governmental Affairs. Subcommittee on Federal Spending Practices and Open Government, 1979 **Rachel Carson** John Henricksson, 1991 A biography of the biologist focusing on the events that led her to expose pesticide pollution in her book *Silent Spring* and her legacy as a founder of the environmental movement [Routledge Handbook of Environmental Anthropology](#) Helen Kopnina, Eleanor Shoreman-Ouimet, 2016-08-12 Environmental Anthropology studies historic and present human environment interactions This volume illustrates the ways in which today's environmental anthropologists are constructing new paradigms for understanding the multiplicity of players pressures and ecologies in every environment and the value of cultural knowledge of landscapes This Handbook provides a comprehensive survey of contemporary topics in environmental anthropology and thorough discussions on the current state and prospective future of the field in seven key sections As the contributions to this Handbook demonstrate the subfield of environmental anthropology is responding to cultural adaptations and responses to environmental changes in multiple and complex ways As a discipline concerned primarily with human environment interaction environmental anthropologists recognize that we are now working within a pressure cooker of rapid environmental damage that is forcing behavioural and often cultural changes around the world As we see in the breadth of topics presented in this volume these environmental challenges have inspired renewed foci on traditional topics such as food procurement ethnobiology and spiritual ecology and a broad new range of subjects such as resilience nonhuman rights architectural anthropology industrialism and education This volume enables scholars and students quick access to both established and trending environmental anthropological explorations into theory methodology and practice **The Ashgate Research Companion to Modern Imperial Histories** John Marriott, 2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from

the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of a specific empire while at the same time placing it within the complex patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the scientist and the artist alongside the structures which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire The Old and New Persistent Organic Pollutants Ravi

Naidu, 2025-08-01 Our understanding of persistent organic pollutants POPs their exposure pathways and their impact on the environment and human health is constantly evolving and the list of new and emerging POPs is constantly changing This book provides a comprehensive coverage of new and old hazardous chemicals their physical and chemical properties their breakdown products their fate in the environment and the environmental and human risk impact It discusses global policies based on the United Nations FAO frameworks explains the severity of contamination and raises awareness on the assessment and remediation of contaminated sites in developed and developing countries Features Provides a broad temporal perspective on POPs with contributions from a global team of experts Covers chemistry toxicology remediation regulation and conventions related to POPs Explains systematically the fate and behavior of POPs and their effect on the environment

and ultimately the impact on human health Brings together for the first time information on global policies on POPs Includes case studies that detail assessment criteria of old and new POPs as well as remediation technologies This book is an excellent resource for professionals researchers academics and students who work in or study environmental risk assessment and remediation The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Environmental Sustainability Education for a Changing World Erika Péntzesné Kónya, Martin Haigh, Josef Křeček, 2021-06-22 Globally there is a need to promote and empower practical action towards better environmental conservation and greater sustainability education aspires to achieve and motivate this one mind at a time This book advances a future oriented vision of the development of environmental sustainability education in settings outside the high school It provides practical guidance for teacher practitioners and policy makers in community oriented environmental sustainability education It promotes a modern holistic approach to sustainability learning in and by the community through participative engagement with sustainability issues Its special foci include working with volunteers and citizen scientists through museums or through re purposing Higher Education Its approach emphasises the implementation of the United Nations Sustainable Development Goals and cooperation with environmental management professionals This book's cosponsors include the International Association for Headwater Control and FAO European Forestry Commission's Working Party on the Management of Mountain Watersheds as well as the International Environmental Education Conferences Eger Hungary and the Hungarian Academy of Science's Subcommittee on Future Studies Community education has long been a goal for environmental management whose practitioners realise that interventions such as biodiversity conservation are only truly sustainable when supported by the local land user and stakeholder communities this depends upon these stakeholders understanding why intervention is necessary

Civilizing Nature Bernhard Gissibl, Sabine Höhler, Patrick Kupper, 2012-01-15 Since their first designation in the United States in the 1860s and 1870s they have become a global phenomenon

Sustainable Environmental Management Jatna Supriatna, Ralph Lenz, 2025-08-02 Environmental sustainability in the developing world is the focus of this book Our purpose will not however be to produce an endless list of huge numbers of facts about the many developing countries Indonesia could be considered a proto typical example of a developing world country As an archipelago situated along the equator in Southeast Asia its location is ideal for a prototype almost all developing countries are tropical Kalimantan Sumatra and Papua in particular contain a substantial portion of the world's remaining equatorial rainforests rainforest management is among the most pressing global sustainability problems However Indonesia's forests are far from monolithic they include a large set of different biome types Indonesia's population is multi ethnic a characteristic not only of other very large developing countries like India and Nigeria but of nearly every African country and of many other formerly colonized regions Another factor favoring a prototype designation is a relatively recent escape from the category of severe

under development Indonesia ranked eighth in the world in real per capita GDP growth rate between 1960 and 2018 not an atypical outcome for Southeast Asian market economies Thailand Malaysia Singapore and Myanmar ranked even higher EarthTrends of World Resources Institute Like most developing countries economic growth has mainly been sparked by exports of energy and mineral extraction products and plantation crops There is also manufacturing growth Indonesia has seven million cities and the world's sixth largest metro area by population At the same time many of the population remain engaged in agriculture many are extremely impoverished Environmental problems Indonesia encounters in its path to economic development are typical of those in other developing countries and solutions it may find can serve as guidelines for other developing countries anticipating a similar economic take off This book consists of 21 chapters on sustainability efforts in Indonesia by many stakeholders government local government private sectors NGOs and communities [EPA Journal](#), 1978

Industrial Disasters and Environmental Policy Denise L. Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both

global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

The Place with No Edge Adam Mandelman, 2020-04-08 In *The Place with No Edge* Adam Mandelman follows three centuries of human efforts to inhabit and control the lower Mississippi River delta the vast watery flatlands spreading across much of southern Louisiana He finds that people's use of technology to tame unruly nature in the region has produced interdependence with rather than independence from the environment Created over millennia by deposits of silt and sand the Mississippi River delta is one of the most dynamic landscapes in North America From the eighteenth century establishment of the first French fort below New Orleans to the creation of Louisiana's Coastal Master Plan in the 2000s people have attempted to harness and master this landscape through technology Mandelman examines six specific interventions employed in the delta over time levees rice flumes pullboats geophysical surveys dredgers and petroleum cracking He demonstrates that even as people seemed to gain control over the environment they grew more deeply intertwined with and vulnerable to it The greatest folly Mandelman argues is to believe that technology affords mastery Environmental catastrophes of coastal land loss and petrochemical pollution may appear to be disconnected but both emerged from the same fantasy of harnessing nature to technology Similarly the levee system's failures and the subsequent deluge after Hurricane Katrina owe as much to centuries of human entanglement with the delta as to global warming's rising seas and strengthening storms *The Place with No Edge* advocates for a deeper understanding of humans' relationship with nature It provides compelling evidence that altering the environment whether to make it habitable profitable or navigable inevitably brings a response sometimes with unanticipated consequences Mandelman encourages a mindfulness of the ways that our inventions engage with nature and a willingness to intervene in responsible respectful ways

Buying Power Lawrence B. Glickman, 2009-06-10 A definitive history of consumer activism *Buying Power* traces the lineage of this political tradition back to our nation's founding revealing that Americans used purchasing power to support causes and punish enemies long before the word boycott even entered our lexicon Taking the Boston Tea Party as his starting point Lawrence Glickman argues that

the rejection of British imports by revolutionary patriots inaugurated a continuous series of consumer boycotts campaigns for safe and ethical consumption and efforts to make goods more broadly accessible He explores abolitionist led efforts to eschew slave made goods African American consumer campaigns against Jim Crow a 1930s refusal of silk from fascist Japan and emerging contemporary movements like slow food Uncovering previously unknown episodes and analyzing famous events from a fresh perspective Glickman illuminates moments when consumer activism intersected with political and civil rights movements He also sheds new light on activists relationship with the consumer movement which gave rise to lobbies like the National Consumers League and Consumers Union as well as ill fated legislation to create a federal Consumer Protection Agency
