Radar Foundations For Imaging And Advanced Concepts:

Radar Foundations for Imaging and Advanced Concepts Roger J. Sullivan, 2004-06-30 This book leads the reader through the development of modern airborne microwave radar including new results on theoretical 2D and 3D ISAR point spread functions PSF and current discussions concerning dechirp deskew processing layover in SAR images vibrating targets foliage penetration and image quality parameters It is the ideal book for basic airborne radar understanding *Radar Foundations For Imaging And Advanced Concepts* Sullivan, *Introduction to Adaptive Arrays* Robert A. Monzingo, Thomas W. Miller, 2004 Introduction to Adaptive Arrays serves as an introduction to the subject of adaptive sensor systems whose principle purpose is to enhance the detection and reception of certain desired signals The field of array sensor systems is now a maturing technology With applications of these systems growing more and more numerous there is a wealth of widely scattered literature on various aspects of such systems Unfortunately few books attempt to provide an integrated treatment of the entire system that gives the reader the perspective to organize the available literature into easily understood parts Intended for use both as a graduate level textbook and as a reference work for engineers scientists and systems analysts this book provides such an integrated treatment by emphasizing the principles and techniques that are of fundamental importance in modern adaptive array systems Microwave Passive Direction Finding Stephen E. Lipsky, 2004 Microwave Passive Direction Finding unifies direction finding DF theory and brings together into a single source wide ranging information on the technology of measuring the direction of arrival of microwave signals Throughout the material there is authoritative information useful to preparing a detailed technical proposal for new business that has been compiled from many years of defense industry presentations reports and systems development Diagrams and photographs of state of the art equipment depict the methods discussed and equations and charts facilitate a hands on approach to calculating system performance The book also presents rarely published systems concepts such as digital preprocessing supercommutation and wide RF bandwidth signal detection methods Specific sections cover evolution and use of monopulse passive DF receiver theory design of antenna elements for conformal DF coverage receiver configurations DF antenna arrays interferometer DF techniques computation methods for signal detection probability of detection accuracy of DF systems and signal processing and display methods More than any book on this technology Microwave Passive Direction Finding anticipates the questions that arise in the DF design process The chapters are organized to stand alone making the book useful as a text reference for the practicing engineer At the same time the material is organized inductively so that it can be used for a college or seminar text **Digital Techniques for Wideband Receivers** James B. Tsui, 2004-06-30 This book is a current comprehensive design guide for your digital processing work with today s complex receiver systems This book brings you up to date with the latest information on wideband electronic warfare receivers the ADC testing procedure frequency channelization and decoding schemes and the operation of monobit receivers Spaceborne Synthetic Aperture Radar Remote Sensing Shashi

Kumar,Paul Siqueira,Himanshu Govil,Shefali Agrawal,2023-03-31 This book provides basic and advanced concepts of synthetic aperture radar SAR PolSAR InSAR PolInSAR and all necessary information about various applications and analysis of data of multiple sensors It includes information on SAR remote sensing data processing and separate applications of SAR technology compiled in one place It will help readers to use active microwave imaging sensor based information in geospatial technology and applications This book Covers basic and advanced concepts of synthetic aperture radar SAR remote sensing Introduces spaceborne SAR sensors Discusses applications of SAR remote sensing in earth observation Explores utilization of SAR data for solid earth ecosystem and cryosphere including imaging of extra terrestrial bodies Includes PolSAR and PolInSAR for aboveground forest biomass retrieval as well as InSAR and PolSAR for snow parameters retrieval This book is aimed at researchers and graduate students in remote sensing photogrammetry geoscience image processing agriculture environment forestry and image processing
