Rethinking Water Management Caroline M. Figueres, Johan Rockstrom, Cecilia Tortajada, 2005 **Rethinking Water Management** Caroline Figueres, Johan Rockström, Cecilia Tortajada, 2003 Table of contents **Rethinking Water Management** Cecilia Tortajada And Johan Rockstroem Edited By Caroline M. Figueres, 2003 If water resources are to be distributed efficiently equitably and cost effectively in this rapidly changing world then it is clear that current water management practices are no longer feasible Innovative approaches are required to meet the increasing water demands of a growing world population and economy and the needs of the ecosystems supporting them New approaches have to be employed at global national and local levels In *Rethinking Water Management* a new generation of water experts from around the world examine the critical challenges confronting the water profession including rainwater and groundwater management recycling and reuse water rights transboundary access to water and financing of water They offer important new perspectives on the use management and conservation of fresh water in terms of both quantity and quality for the domestic agricultural and industrial sectors and show how a new set of paradigms can be applied to successfully manage water for the future Caroline Figueres is Head of the Urban Infrastructure Department at UNESCO IHE Water Education Institute in The Netherlands Cecilia Tortajada is Vice President of the Third World Centre for Water Management in Mexico and Vice President elect of the International Water Resources Association Johan Rockström is Water Resources Expert at UNESCO IHE *Mountain Area Research and Management* Martin F. Price, 2013-06-17 This book brings together scientists and practitioners from five continents to present their experience in undertaking activities that contribute to our understanding and informed management of mountain areas In particular they address the challenges of working in interdisciplinary teams and of effectively involving stakeholders The result is a powerful book that integrates research from different disciplines in the natural and social sciences and in some cases indigenous knowledge to address the question of how knowledge is gained about mountain areas and how can it be integrated and used in effective management A comprehensive introduction covers the challenges in mountain area research and management and the need for integrated approaches This is followed by chapters that look at key areas of mountain research and management over the past 25 years covering interdisciplinary research subsistence cultures and sustainable development innovations in watershed management and biodiversity conservation

Subsequent chapters cover key areas of research and management on five continents with a focus on comparison of common challenges and solutions across regions The concluding chapter brings these experiences together Published with Parks Canada

Water Governance, Policy and Knowledge Transfer Cheryl De Boer, Joanne Vinke-de Kruijf, Gül Özerol, Hans Th. A. Bressers, 2013-05-29 In an increasingly global community of researchers and practitioners new technologies and communication means have made the transfer of policies from one country or region to another progressively more prevalent There has been a lot of attention in the field of public administration paid to policy transfer and institutional transplantation This book aims to create a better understanding of such transfers in the water management sector These include the adoption of modern water management concepts such as integrated water resources management and forms of water governance which are strongly promoted and sometimes also imposed by various international organizations Transfers also occur within the scope of development aid or for the purpose of creating business opportunities In addition many research organisations consultancies and governmental agencies are involved in cross border work The purpose of this book is therefore to present practical examples of the transfer of modern water management from one locality to another and to critically discuss the transferability of policy and governance concepts by analysing the contextual needs and factors Case studies are included from North America Europe the Middle East and Asia It is argued that in many cases context matters in water management and that there is no panacea or universal concept that can be applied to all countries or regions with different political economic cultural and technological contexts Yet it is also shown that some countries are facing pressing and similar water management issues that cut across national borders and hence the transfer of knowledge may be beneficial

International Law, Sustainable Development and Water Management Antoinette Hildering, 2004 Publisher Description

The United Nations World Water Development Report Cosgrove, Catherine E., Cosgrove, William J., UNESCO World Water Assessment Programme, 2012-12-31 [Handbook on Water Security](#) Claudia Pahl-Wostl, Anik Bhaduri, Joyeeta Gupta, 2016-01-29 Water security has received increasing attention in the scientific and public policy communities in recent years The Handbook on Water Security is a much needed resource that helps the reader navigate between the differing interpretations of water security It explains the various dimensions of the topic by approaching it both conceptually and thematically as well as in relation to experiences in different regions of the world The international contributors explore the various perspectives on water security to show that it has multiple meanings that cannot easily be reconciled Topics discussed include challenges from human security to consumerism how trade policies can help to achieve water security in a transboundary setting the potential of risk based governance arrangements and the ecology of water security Scholars and postgraduate students in the social sciences working on water related issues will find this book to be of substantial interest It will strongly appeal to policymakers and practitioners looking at the strengths and limitations of water security

Recarbonizing global soils - A technical manual of recommended management practices Food and

Agriculture Organization of the United Nations, Intergovernmental Technical Panel on Soils, 2021-09-08 During the last decades soil organic carbon SOC attracted the attention of a much wider array of specialists beyond agriculture and soil science as it was proven to be one of the most crucial components of the earth's climate system which has a great potential to be managed by humans Soils as a carbon pool are one of the key factors in several Sustainable Development Goals in particular Goal 15 Protect restore and promote sustainable use of terrestrial ecosystems sustainably manage forests combat desertification and halt and reverse land degradation and halt biodiversity loss with the SOC stock being explicitly cited in Indicator 15.3.1 This technical manual is the first attempt to gather in a standardized format the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments including the advantages drawbacks and constraints This manual presents different sustainable soil management SSM practices at different scales and in different contexts supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications Volume 4 includes 51 case studies dealing with cropland grassland integrated systems and farming approaches *Re-thinking Water and Food Security* Luis Martinez-Cortina, Alberto Garrido, Elena Lopez-Gunn, 2010-09-30 This book provides an overview by leading world experts on key issues in global water and food security The book is divided in a series of overarching themes and sections The first part of the book provides an overview of water and food security The second and third sections look at global trade and virtual water trade and provide some **Water and Post-Conflict Peacebuilding** Erika Weinthal, Jessica J. Troell, Mikiyasu Nakayama, 2014-02-24 Water is a basic human need and despite predictions of water wars shared waters have proven to be the natural resource with the greatest potential for interstate cooperation and local confidence building Indeed water management plays a singularly important role in rebuilding trust after conflict and in preventing a return to conflict Featuring nineteen case studies and analyses of experiences from twenty eight countries and territories in Africa Asia Europe the Americas and the Middle East and drawing on the experiences of thirty five researchers and practitioners from around the world this book creates a framework for understanding how decisions governing water resources in post conflict settings can facilitate or undermine peacebuilding The lessons will be of value to practitioners in international development and humanitarian initiatives policy makers students and others interested in post conflict peacebuilding and the nexus between water management and conflict Water and Post Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post conflict peacebuilding and natural resource management The project has generated six edited books of case studies and analyses with contributions from practitioners policy makers and researchers Other books in this series address high value resources land livelihoods assessing and restoring natural resources and governance *Natural Resource Conflicts* M. Troy Burnett, 2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies This case based examination of a wide range of natural resource disputes exposes readers to many contemporary

examples that offer reasons for both hope and concern The Rwandan genocide the Sudanese civil war and perpetual instability in the Middle East and Africa each of these crises have arguably been instigated and maintained by natural resource disputes China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert Will it work and is it worth it These and many other cases of conflict stemming from natural resource or environmental concerns are explained and debated in this up to date examination of contemporary and ongoing topics The book examines conflicts over precious resources and minerals such as diamonds oil water and fisheries as well as the pursuit of lesser known minerals like Coltan and other rare earth elements important resources in our technological age in remote locations such as Greenland and the Congo Each topic contains an overview and two position essays from different authors thereby providing the reader with highly informative and balanced perspectives Reference entries accompany each topic as well helping students to better understand each issue As the world hurtles into the 21st century these natural resource issues are becoming increasingly important with all global citizens having a significant stake in how these conflicts arise and play out

Natural Resource Degradation and Human-Nature Wellbeing Rashed Al Mahmud Titumir,Tanjila Afrin,Mohammad Saeed Islam,2023-03-09 The book addresses the gaps in the body of knowledge from two grounds Firstly it adds value through explaining the dynamics of natural resource governance by focusing on the particular arenas of biodiversity resources water resources and climate change in developing country context Secondly it critically scrutinizes the market centric perspectives on one hand and combines political economy questions that are generally overlooked in discussions of current resource governance framework on the other It develops a new framework to examine the reasons behind the degradations of natural resources to offer sustainable solutions to the problems It shows that the natural resources have been exploited beyond sustainable limits due to the structural rigidities embedded in and reproduced by fragile institutions and unequal power sharing arrangements under the market centric economic system The book formulates a new understanding of sustainability in case of usage and management of natural resources by incorporating the idea of human sociality It highlights the importance of the well being of nature and human beings must go side by side one without the other is not a sustainable option The book contains key learnings for scholars and researchers working in the field of development studies who wish to gain a deeper understanding on the sustainable natural resource governance specifically in the contexts of developing countries For policymakers and policy advocates the book serves as the groundwork on policies regarding biodiversity resources water resources and climate change specific to the context of developing countries providing more relevant contents in terms of laying out justification for policy objectives

Innovations and Interdisciplinary Solutions for Underserved Areas Abdulhameed Danjuma Mambo, Assane Gueye, Ghada Bassioni, 2023-01-31 This book constitutes the refereed post conference proceedings of the 5th EAI International Conference on Innovations and Interdisciplinary Solutions for Underserved Areas InterSol 2022 held in Nile University of Nigeria Abuja Nigeria in March 2022 The 26 papers presented were selected from 66 submissions and issue different problems in underserved and unserved areas They face problems in almost all sectors such as energy water communication climate change food education transportation social development and economic growth

Prospects for productive use of saline water in West Asia and North Africa, 2006 This study of the potential to use saline water for irrigation in Egypt Jordan Syria and Tunisia concludes that it is technically feasible but its economic viability remains to be established Expert opinion suggests that saline irrigated agriculture is most likely to succeed in the West Asia North Africa region as a complement to small scale mixed livestock and cropping farming systems Precise quantification of the available saline water resources is not possible because of the lack of hard data As a result precise quantification of the likely impact of introducing saline irrigated agriculture on poverty alleviation and food security is also impossible although anecdotal evidence suggests that this would be positive The report argues that the environmental effects of saline irrigated agriculture both positive and negative need to be integrated into policies and decisions on the use of saline water Uses other than agricultural for example amenity uses industrial landscaping carbon sequestration or biomass production for energy also need to be considered and may be more socially and economically beneficial
