DRYER DESCRIPTION

INTERDEPENDENT EQUITY

Interdependent equity is a concept that refers to the relationship between the equity of one individual and the equity of another. In this context, equity refers to the fair and just distribution of resources and opportunities. Interdependent equity suggests that the equity of one individual is not independent of the equity of others, but rather, it is interconnected and interdependent. This means that the equity of one individual can be affected by the equity of others, and vice versa. For example, if one individual has a high level of equity, it may lead to a higher level of equity for others, and if one individual has a low level of equity, it may lead to a lower level of equity for others. This concept is often used in the context of social justice and equity, where the goal is to ensure that all individuals have a fair and just distribution of resources and opportunities.

may exist in the future and people now deceased differ from relations between contemporaries and in ways that raise new conceptual logical and substantive questions Among the questions addressed in this volume are what is the status of people now deceased and people who may exist in the future Can the latter be harmed by the actions of people alive today What duties of justice do we have towards people with whom we can neither interact nor co operate and can people who are indirect victims of past injustices legitimately claim compensation Answers to these questions are relevant in a number of policy areas most notably in issues regarding reparations for historical injustice and responding to climate change and its consequences
