**Justice and Power in Sociolegal Studies** Bryant G. Garth, Austin Sarat, 1998 Justice and Power in the Sociolegal Studies asks what interdisciplinary work in the law and society tradition tells us about the relationship of law and justice as well as the way power operates in and through law The fundamental concepts of justice and power provide points of departure for leading scholars to explore the various domains of socio legal research As they note the explicitness of the engagement with issues of power and the relative silence about or indirectness in taking on questions of justice found in most law and society research they ask how engagement with issues of power and silence about justice constituted law and society as a research field caught between a desire to have political impact and at the same time to maintain its scientific respectability

**Alternative Dispute Resolution in Civil Justice Systems** Roger E. Hartley, 2002 Hartley examines the introduction of alternative dispute resolution e g mediation in a court system in Georgia Attorneys supported the introduction of mediation to consolidate control of the legal process and to add it to their practices They also used mediation to settle some cases more quickly Mediation gave judges flexibility to weed out minor cases and process others more quickly However these changes were not so great as to put a dent in settlement or trial rates and Hartley concludes that while changes in court procedures have effects researchers need to examine the behavior of actors in depth in order to discover these effects

**Constructive Interventions** L. Kirchhoff, 2008-05-16 In the contemporary discipline of conflict resolution adjudication and alternative dispute resolution ADR are often seen as antagonistic trends This important book contends that on the contrary it is the bringing together of these trends that holds the most promise for an effective system of international justice With great insight and passion built firmly on a vast knowledge of the field Lars Kirchhoff exposes the contemporary structural barriers to effective conflict resolution defining where adjudication ends and ADR and particularly the recent development of mediated third party intervention from an art to a veritable science must come into play The work starts by defining the challenges potentials and shortcomings of different approaches to conflict resolution in an interdependent world where the multiplicity of actors topics and interests involved even in seemingly bilateral conflict situations is clearly manifest and goes on to define useful models and connect the various elements relevant for the resolution of conflicts in a transparent way In the course of its investigation the book accomplishes the following illustrates the various departure points and perspectives scholars of conflict resolution have taken as the basis for their work discusses who should become involved in conflicts as a third party and by which techniques this should occur systematically conveys the nature and consequences of intervention through mediation focusing on the method's critical challenges and clarifies the particular model of international mediation under development through UN initiatives In approaching these intertwined topics the author draws concrete conclusions for

the realms of international law and related disciplines as well as for the organizational context of the United Nations He explores such diverse scenarios as conflicts between States conflicts involving international organizations and in accordance with the changing parameters of international law even conflicts involving individuals clarifying which constellations can be tackled by international mediation and which conflicts should be dealt with by other forms of diplomacy or adjudication It is the conviction of many intermediaries and scholars that the considerable potential inherent in resolving conflicts peacefully is rarely put into practice Although some of the reasons for this phenomenon are beyond the influence of scholarly debate in many instances the reasons for failure of peaceful resolution processes are more structural or systemic in nature It is the great virtue of this book that it establishes enough clarity in an unclear and complex field to make concrete and workable recommendations in these instances and for that reason it will be of immeasurable value and benefit to all scholars policymakers and activists dedicated to the pursuit of peace
