A Transatlantic Political Theology of Psychedelic Aesthetics Roger K. Green, 2019-04-02 Arguing that we ought to look to psychedelic aesthetics of the 1960s in relation to current crises in liberal democracy this book emphasizes the intersection of European thought and the psychedelic The first half of the book focuses on philosophical influences of Herbert Marcuse and Antonin Artaud while the second half shifts toward literary and theoretical influences of Aldous Huxley on psychedelic aesthetics Framed within an emergent discourse of political theology it suggests that taking a postsecular approach to psychedelic aesthetics helps us understand deeper connections between aesthetics and politics

Failed God John A. Rush, 2019-04-16 On a 2001 trip to the cathedrals of Europe anthropologist John Rush and his wife entered St Mark's Basilica in Venice and encountered a mosaic depicting Jesus surrounded by mushrooms with an *Amanita muscaria* cap in his hand Examining the space with new eyes they discovered images of mushrooms and mind altering plants all over the Basilica Intrigued Dr Rush spent seven years researching and reflecting on the profound effects hallucinogens had on the founding of all three major Western religions He concluded that Judaism Christianity and Islam are political constructions evolving out of the use of not only *Amanita muscaria* but a plethora of mind altering substances *Failed God Fractured Myth in a Fragile World* re examines the scriptural stories of Judaism Christianity and Islam as told in the Bible and Qur'an and reveals them as concocted mythical charters stemming from drug induced romps with the super natural Rush shows how mind altering substances played an instrumental role in the birth and development of Western religions and explains how they contributed to reports of prophetic experiences including angry and

disturbing messages from the divine With chapters on Judaism Christianity and Islam Rush fully addresses the effects of mind altering substances on each tradition convincingly discrediting the idea that they stem from actual human interaction with the divine He also shows how an intoxicated and over zealous Apostle Paul corrupted Jesus s simple message of human decency forming an oppressive religious system based on fear In a thought provoking conclusion Rush asks how we can continue to attribute authority to traditions that were so clearly irrationally founded and incompatible with today s world

existence of life and the functioning of mind are the result of a naturally intelligent self organizing Universe he explains how sacred mushrooms provide a direct link to the wisdom of Nature and the meaning of life **Neurons, Oxygen & Nanak**

Abhijit Naskar, One of twenty first century s most influential minds in Brain Science investigates the molecular underpinnings of one of the youngest religions of the world Sikhism With the tools of modern Neuroscience at his disposal Abhijit Naskar a globally acclaimed author delves deep into the neuronal basis of the origin of Sikhism He coaxes us to look behind the curtain of a legendary divine experience that led to the rise of this less known religion from India In his peerlessly lucid explanatory ways Naskar takes us inside the protoplasmic realm of the brain of Guru Nanak the founding father of Sikhism and reveals to us how a conscientious man from the 15th century stepped outside the primeval cocoon of religious orthodoxy in order to restore humanism in the heart of humanity **Neurons Oxygen Nanak** is the work of a twenty first century humanitarian thinker about another humanitarian thinker from the fifteenth century **The Re-Enchantment of the West, Vol 2** Christopher Partridge, 2006-06-20 Challenging some assessments of religion in the West this study argues that although much organized religion particularly Christianity is in numerical decline in actual fact we are witnessing an alternative spiritual re enchantment of society and culture **Shamans/Neo-Shamans** Robert J. Wallis, 2003-12-08 In popular culture such diverse characters as occultist Aleister Crowley Doors musician Jim Morrison and performance artist Joseph Beuys have been called shamans In anthropology on the other hand shamanism has associations with sorcery witchcraft and healing and archaeologists have suggested the meaning of prehistoric cave art lies with shamans and altered consciousness Robert J Wallis explores the interface between new and prehistoric shamans The book draws on interviews with a variety of practitioners particularly contemporary pagans in Britain and north America Wallis looks at historical and archaeological sources to explore contemporary pagan engagements with prehistoric sacred sites such as Stonehenge and Avebury and discusses the controversial use by neo Shamans of indigenous particularly native American shamanism **A Secret History of Consciousness** Gary Lachman, 2003 For the last four centuries science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to Recently this effort was extended to try to include the inner world of human beings Gary Lachman argues that this view of consciousness is misguided and unfounded He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s In this secret history of consciousness consciousness is seen not as a result of neurons and molecules but as responsible for them meaning is not imported from the outer world but rather creates it In this view consciousness is a living evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader more expansive state What that consciousness may be like and how it may be achieved is a major concern of this book Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open As this history unfolds we encounter the ideas of many modern thinkers from esotericists like P D Ouspensky Rudolf Steiner and

Colin Wilson to more mainstream philosophers like Henri Bergson William James Owen Barfield and the psychologist Andreas Mavromatis Two little known but important thinkers play a major role in his synthesis Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness An important contribution to the study of consciousness a must read Contents Foreword by Colin Wilson Introduction Consciousness Explained The Search for Cosmic Consciousness Esoteric Evolution The Archaeology of Consciousness Participatory Epistemology The Presence of Origin Last Words Playing for Time Selected Bibliography A marvelously exhilarating gallop through every important modern theory of consciousness from Steiner to Maslow from Bucke's cosmic consciousness to Gebser's integral consciousness Colin Wilson author of *The Outsider* and *Access to Inner Worlds* Opens up vast vistas of possibility suggesting that what we experience as the earth may in itself be inseparable from our state of mind and that the evolution of human consciousness may be as fundamental a process as our development through genetics A must read for those seeking an escape from our contemporary culture's cul de sac Daniel Pinchbeck author of *Breaking Open the Head* Thinking outside the box Lachman challenges many contemporary theories by reinserting a sense of the spiritual back into the discussion Profoundly erudite yet easy to read this book is a provocative mind stretcher Leonard Shlain author of *Art Physics Alphabet* versus the Goddess and *Sex Time Power*

Consciousness Susan Blackmore, 2013-11-26 Is there a theory that explains the essence of consciousness Or is consciousness itself just an illusion The last great mystery of science consciousness is a topic that was banned from serious research for most of the last century but is now an area of increasing popular interest as well as a rapidly expanding area of study for students of psychology philosophy and neuroscience This ground breaking textbook by best selling author Susan Blackmore was the first of its kind to bring together all the major theories of consciousness studies from those based on neuroscience to those based on quantum theory or Eastern philosophy The book examines topics such as how subjective experiences arise from objective brain processes the basic neuroscience of consciousness altered states of consciousness out of body and near death experiences and the effects of drugs dreams and meditation It also explores the nature of self the possibility of artificial consciousness in robots and the question of whether animals are conscious The new edition has been fully revised to include the latest developments in neuroscience brain scanning techniques and artificial consciousness and robotics The new website includes self assessment exercises advanced further reading flashcards and MCQs For all those intrigued by what it means to be to exist this book could radically transform your understanding of your own consciousness
