Teaching and Learning the Arts in Higher Education with Technology Joyce Hwee Ling Koh, Rebecca Yen Pei Kan, 2021-12-02 This book is an inquiry about the possibilities of using technology to support the education of artists within higher education contexts Even though technology enhanced learning and teaching may seem incongruent with the long established studio based cultures of making and performing it is increasingly becoming a pivotal point to connect artistes to potential audience and markets Amidst the COVID 19 pandemic technology is also the crucial linchpin for educational continuity of student artists This book explores how technology could enhance the education of artists and designers as they continue to create make and add value to life and society through their artistry It draws upon the experiences of the Nanyang Academy of Fine Arts NAFA a pioneering arts institution in Singapore with over 80 years of institutional history Through 9 vignettes this book illustrates technology enhanced pedagogical practices that have been implemented in different artistic learning spaces including

classroom studio and stage as well as institutional support strategies With a naturalistic stance these chapters seek to illuminate realistic pictures of teaching and learning that are being uncovered by artist educators as they sought to integrate technology within teaching practices using available technologies and within the classes that they are teaching It is hoped that this book will stimulate conversation among artist educators about possible pedagogical models as well as inform higher arts institutions about the contextual strategies needed to support the creation of technology enhanced pedagogical practices
