Worlds of Sense Constance Classen, 2023-02-28 First published in 1993 *Worlds of Sense* is an exploration of the historical and cultural formation of the senses As the author demonstrates different cultures have strikingly different ways of making sense of the world In the modern urban West we are accustomed

to thinking in terms of visual models such as world view whereas the Ongee of the Andaman Islands for example live in a world ordered by smell and the Tzotzil of Mexico hold that temperature is the basic force of the cosmos In a fascinating examination of the role of the senses in diverse societies and eras Constance Classen shows the extent to which perception is shaped by and expressive of cultural values This book will be of interest to students of cultural studies sociology anthropology and philosophy The Gateways of Knowledge J. A. Dell, 2012-01 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy *A Cultural History of the Senses: In the Middle Ages* Constance Classen, J. P. Toner, Richard Newhauser, Herman Roodenburg, Anne C. Vila, David Howes, 2014 The Cultural History of the Senses set delves into the sensory foundations of Western civilization taking a comprehensive period by period approach which provides a broad understanding of the life of the senses from antiquity to the modern day Each of the volumes explores the following topics The Social Life of the Senses Urban Sensations The Senses in the Marketplace The Senses in Religion The Senses in Philosophy and Science Medicine and the Senses The Senses in Literature Art and the Senses and Sensory Media Superbly illustrated this six volume set is the most authoritative and comprehensive historical survey of the senses available Page 4 of cover **Sensorial Investigations** David Howes, 2023-03-16 David Howes's sweeping history of the senses in the disciplines of anthropology and psychology and in the field of law lays the foundations for a sensational jurisprudence or a way to do justice to and by the senses of other people In part 1 Howes demonstrates how sensory ethnography has yielded alternative insights into how the senses function and argues convincingly that each culture should be approached on its own sensory terms Part 2 documents how the senses have been disciplined psychologically within the Western tradition starting with Aristotle and moving through the rise of Lockean empiricism and cognitive neuroscience Here Howes presents an anthropologically informed critique of experimental and cognitive psychology sensory science and phenomenology In part 3 he introduces the paradigm of the historical anthropology of the senses and sensation and applies it to the analysis of trade relations between Europe and China in the early modern period to the treaty making process in North America during the colonial period and to all the unresolved disputes over land rights and Indigenous sovereignty that continue to this day arguing that these differences are rooted in a cultural clash of sensoria Designed for the classroom **Sensorial Investigations** displays an expansive critical engagement with generations of scholarship It is essential reading for students and scholars of the history and anthropology of the senses the psychology of sensation and socio legal studies **Synaesthesia and the Ancient Senses** Shane Butler, Alex Purves, 2014-09-03 Like us the ancient Greeks and Romans came to know and understand the world through their senses Yet sensory experience has rarely been considered in

the study of antiquity and when the senses are examined sight is regularly privileged Synaesthesia and the Ancient Senses presents a radical reappraisal of antiquity's textures, flavours and aromas, sounds and sights. It offers both a fresh look at society in the ancient world and an opportunity to deepen the reading of classical literature. The book will appeal to readers in classical society and literature, philosophy and cultural history. All Greek and Latin is translated and technical matters are explained for the non-specialist. The introduction sets the ancient senses within the history of aesthetics and the subsequent essays explore the senses throughout the classical period and on to the modern reception of classical literature.

Our Senses Rob DeSalle, 2018-01-01 A lively and unconventional exploration of our senses: how they work, what is revealed when they don't, and how they connect us to the world. Over the past decade, neuroscience has uncovered a wealth of new information about our senses and how they serve as our gateway to the world. This splendidly accessible book explores the most intriguing findings of this research. With infectious enthusiasm, Rob DeSalle illuminates not only how we see, hear, smell, touch, taste, maintain balance, feel pain, and rely on other, less familiar senses, but also how these senses shape our perception of the world aesthetically, artistically, and musically. DeSalle first examines the question of how perception and consciousness are formed in the brain, setting human senses in an evolutionary context. He then investigates such varied themes as supersenses and diminished senses, synesthesia, and other cross-sensory phenomena, hemispheric specialization, diseases, anomalies induced by brain injuries, and hallucinations. Focusing on what is revealed about our senses through the extraordinary, he provides unparalleled insights into the unique wonders of the human brain.

The Routledge History of the Senses Andrew Kettler, Will Tullett, 2025-06-26 The Routledge History of the Senses presents readers with an overview of the field. As well as pointing to directions for the future of the discipline, it illustrates the extent to which the subject offers a considerable space for the exploration of diverse historical topics through the lens of sensory experience. The handbook brings together essays and case studies from some of the leading academics on the history of the senses. Together, they not only chart topics and arguments in existing scholarship but introduce fresh methodologies for future analyses. Specifically, the chapters collectively show that the senses of the historical body often portray the intensity of the invasion of capital upon the functions of the mind throughout global history. As a global history, this work arrives at a time when many sensory historians are looking for a touchstone for moving beyond the often heavily Western frameworks that dominate the existing literature on the historical senses. Not only will this book appeal to students and scholars of the history of senses, visual studies, art history, food studies, and many of the social sciences, but individual chapters also offer useful reading material for a wide range of history modules and contemporary topics.
