Navajo Missile Project The Story Of The Know How Missile Of American Rocketry:

The Navaho Missile Project James N. Gibson, 1996 The Navaho program is the least known yet the most important of the United States early missile programs In rocket technology alone the Navaho made possible the Thor Jupiter and Redstone missiles It also allowed the construction of the Atlas ICBM s engines and in the years to come this engine technology would power the Apollo moon rocket and our present day Space Shuttle The Navaho project achieved major advances in every discipline of engineering and electronics The program also gave us the airborne digital computer modular electronic circuitry and the all inertial navigation system The development of modular circuitry alone revolutionized the electronics industry improving the reliability and repairability of countless electronic devices In just ten years this program accomplished several technological firsts The X 10 test drone was the first turbojet powered vehicle to exceed Mach 2 It also was the first aircraft to fly a complete mission under inertial computer guidance Later the G 26 ramjet powered vehicle became the first jet aircraft to reach Mach 3 and an altitude of 77 000 feet Even the Navaho booster engine would set a record by producing 405 000 lbs of thrust a benchmark that would last for five years These accomplishments have escaped public notice for more than three decades due to the program s Top Secret classification Forty years after its cancellation many of its documents are still classified as Secret James Gibson s new book explains the technical and historical aspects of the Navaho program here for the first time
