Number Theory And Modular Forms Papers Dedicated To The Memory Of Robert Rankin:

Number Theory and Modular Forms Bruce C. Berndt, Ken Ono, 2013-11-11 Robert A Rankin one of the world's foremost authorities on modular forms and a founding editor of The Ramanujan Journal died on January 27 2001 at the age of 85 Rankin had broad interests and contributed fundamental papers in a wide variety of areas within number theory geometry analysis and algebra To commemorate Rankin's life and work the editors have collected together 25 papers by several eminent mathematicians reflecting Rankin's extensive range of interests within number theory Many of these papers reflect Rankin's primary focus in modular forms It is the editors fervent hope that mathematicians will be stimulated by these papers and gain a greater appreciation for Rankin's contributions to mathematics This volume would be an inspiration to students and researchers in the areas of number theory and modular forms **American Book Publishing Record**, 2004 *The British National Bibliography* Arthur James Wells, 2004 Elliptic and Modular Functions from Gauss to Dedekind to Hecke Ranjan Roy, 2017-04-18 This thorough work presents the fundamental results of modular function theory as developed during the nineteenth and early twentieth centuries It features beautiful formulas and derives them using skillful and ingenious manipulations especially classical methods often overlooked today Starting with the work of Gauss Abel and Jacobi the book then discusses the attempt by Dedekind to construct a theory of modular functions independent of elliptic functions The latter part of the book explains how Hurwitz completed this task and includes one of Hurwitz's landmark papers translated by the author and delves into the work of Ramanujan Mordell and Hecke For graduate students and experts in modular forms this book demonstrates the relevance of these original sources and thereby provides the reader with new insights into contemporary work in this area *Ramanujan's Place in the World of Mathematics* Krishnaswami Alladi, 2021-09-17 The First Edition of the book is a collection of articles all by the author on the Indian mathematical genius Srinivasa Ramanujan as well as on some of the greatest mathematicians in history whose life and works have things in common with Ramanujan It presents a unique comparative study of Ramanujan's spectacular discoveries and remarkable life with the monumental contributions of various mathematical luminaries some of whom like Ramanujan overcame great difficulties in life Also among the articles are reviews of three important books on Ramanujan's mathematics and life In addition some aspects of Ramanujan's contributions such as his remarkable formulae for the number π his path breaking work in the theory of partitions and his fundamental observations on quadratic forms are discussed Finally the book describes various current efforts to ensure that the legacy of Ramanujan will be preserved and continue to thrive in the future This Second Edition is an expanded version of the first with six more articles by the author Of note is the inclusion of a detailed review of the movie *The Man Who Knew Infinity* a description of the fundamental work of the SASTRA Ramanujan Prize Winners and an account of the Royal Society Conference to honour Ramanujan's legacy on the centenary of his election as FRS **Mathematical Reviews**, 2005 **Books In Print 2004-2005** Ed Bowker Staff, Staff Bowker, Ed, 2004 *International Books in Print*

,1991 **Number Theory Related to Modular Curves** Joan-Carles Lario,V. Kumar Murty,2018-01-29 This volume contains the proceedings of the Barcelona Boston Tokyo Number Theory Seminar which was held in memory of Fumiyuki Momose a distinguished number theorist from Chuo University in Tokyo Momose who was a student of Yasutaka Ihara made important contributions to the theory of Galois representations attached to modular forms rational points on elliptic and modular curves modularity of some families of Abelian varieties and applications of arithmetic geometry to cryptography Papers contained in this volume cover these general themes in addition to discussing Momose s contributions as well as recent work and new results **Some Applications of Classical Modular Forms to Number Theory** Riad Mohamad Masri,2005 **Number Theory** David V. Chudnovsky,Gregory V. Chudnovsky,Melvyn B. Nathanson,2012-12-06 This volume is dedicated to Harvey Cohn Distinguished Professor Emeritus of Mathematics at City College CUNY Harvey was one of the organizers of the New York Number Theory Seminar and was deeply involved in all aspects of the Seminar from its first meeting in January 1982 until his retirement in December 1995 We wish him good health and continued hapiness and success in mathematics The papers in this volume are revised and expanded versions of lectures delivered in the New York Number Theory Seminar The Seminar meets weekly at the Graduate School and University Center of the City University of New York CUNY In addition some of the papers in this book were presented at a conference on Combinatorial Number Theory that the New York Number Theory Seminar organized at Lehman College CUNY Here is a short description of the papers in this volume The paper of R T Bumby focuses on elementary fast algorithms in sums of two and four squares The actual talk had been accompanied by dazzling computer demonstrations The detailed review of H Cohn describes the construction of modular equations as the basis of studies of modular forms in the one dimensional and Hilbert cases **Modular Functions and Dirichlet Series in Number Theory** Tom M Apostol,1989-12-01 *Additive Number Theory, Modular Forms, and the Partition Function* Jesse Emiliano Hahnel,1998 **Modular Forms and Related Topics in Number Theory** B. Ramakrishnan,Bernhard Heim,Brundaban Sahu,2020-11-25 This book collects the papers presented at the Conference on Number Theory held at the Kerala School of Mathematics Kozhikode Kerala India from December 10 14 2018 The conference aimed at bringing the active number theorists and researchers in automorphic forms and allied areas to demonstrate their current research works This book benefits young research scholars postdoctoral fellows and young faculty members working in these areas of research **Analytic Number Theory** B. Berndt,2012-12-06 On April 25 27 1989 over a hundred mathematicians including eleven from abroad gathered at the University of Illinois Conference Center at Allerton Park for a major conference on analytic number theory The occa sion marked the seventieth birthday and impending official retirement of Paul T Bateman a prominent number theorist and member of the mathe matics faculty at the University of Illinois for almost forty years For fifteen of these years he served as head of the mathematics department The conference featured a total of fifty four talks including ten in vited lectures by H Delange P Erdos H Iwaniec M Knopp M Mendes France H L Montgomery C Pomerance W

Schmidt H Stark and R C Vaughan This volume represents the contents of thirty of these talks as well as two further contributions The papers span a wide range of topics in number theory with a majority in analytic number theory

Advances in the Theory of Numbers Şaban Alaca, Kenneth S. Williams, 2015 The theory of numbers continues to occupy a central place in modern mathematics because of both its long history over many centuries as well as its many diverse applications to other fields such as discrete mathematics cryptography and coding theory The proof by Andrew Wiles with Richard Taylor of Fermat's last theorem published in 1995 illustrates the high level of difficulty of problems encountered in number theoretic research as well as the usefulness of the new ideas arising from its proof The thirteenth conference of the Canadian Number Theory Association was held at Carleton University Ottawa Ontario Canada from June 16 to 20 2014 Ninety nine talks were presented at the conference on the theme of advances in the theory of numbers Topics of the talks reflected the diversity of current trends and activities in modern number theory These topics included modular forms hypergeometric functions elliptic curves distribution of prime numbers diophantine equations L functions Diophantine approximation and many more This volume contains some of the papers presented at the conference All papers were refereed The high quality of the articles and their contribution to current research directions make this volume a must for any mathematics library and is particularly relevant to researchers and graduate students with an interest in number theory The editors hope that this volume will serve as both a resource and an inspiration to future generations of researchers in the theory of numbers

Reviews in Number Theory, as Printed in Mathematical Reviews, 1940 Through 1972, Volumes 1-44 Inclusive William Judson LeVeque, 1974 Number Theory Hans P. Schlickewei, 1989-06-28 The 15 papers of this selection of contributions to the *Journal of Arithmetical Theory* 1987 include both survey articles and original research papers and represent a cross section of topics such as Abelian varieties algebraic integers arithmetic algebraic geometry additive number theory computational number theory exponential sums modular forms transcendence and Diophantine approximation uniform distribution

Number Theory in Memory of Eduard Wirsing Helmut Maier, Jörn Steuding, Rasa Steuding, 2024-08-29 Eduard Wirsing was an outstanding number theorist In his research he made significant contributions to various subfields of number theory and also collaborated with other eminent scientists e g with the Fields Medalist Alan Baker as well as Don Zagier This commemorative volume includes numerous papers on current research in number theory by well known experts as well as some personal recollections by companions of Wirsing The topics covered in this volume include arithmetical functions continued fractions elementary proofs of the prime number theorem friable integers the Goldbach problem Dirichlet series Euler products and more There is something for every interested reader
