**Exploring Perspectives on Creativity Theory and Research in Education** Daniel A. Tillman, 2024-04-16

Collectively the sixteen chapters in this book investigate the power of creativity in the classroom many through the specific lens of limited resources as an opportunity The chapters are divided into two sections eight chapters comprising Section I Theory and Research and then the eight chapters comprising Section II Additional Perspectives and Future Directions Within these two sections the more than two dozen authors that contributed to this book tackle a wide range of the possibilities for designing creative classroom based instruction wherein limited resources are highlighted and valued rather than avoided or lamented The two main sections of this book are each preceded by a brief introductory summary highlighting those sections attributes and objectives with the intention of providing helpful structure to the reader but the book has also been designed such that each chapter stands independently and can be jumped to directly like a handbook In its totality this book exploring perspectives on creativity theory and research in education is designed to serve as a valuable resource for teachers teacher

educators school administrators parents and education researchers along with anyone else that is interested in optimizing our opportunities for nurturing creativity within classrooms

**Visualisation and Epistemological Access to Mathematics Education in Southern Africa** Marc Schäfer,2023-04-27 This book demonstrates that using visualisation processes in mathematics education can help to enhance teaching and learning and bridge the inequality gap that exists between well resourced and under resourced schools in Southern Africa Drawing on classroom research conducted in the Southern African region it examines how epistemological access in a context of gross inequality can be constructively addressed by providing research based solutions and recommendations The book outlines the visualisation process as an integral but often overlooked process of mathematics teaching and learning It goes beyond the traditional understanding of visualisation processes such as picture forming and using tools and considers visualisation processes that are semiotic in nature and includes actions such as gestures in combination with language It adds value to the visualisation in mathematics education research discourse and deliberation in Africa With a unique focus on Southern Africa and open avenues for further research and collaboration in the region it will be a highly relevant reading for researchers academics and post graduate students of mathematics education comparative education and social justice education
