Numbers Of Things

William Kingdon Clifford

Numbers Of Things:

Doctrine and Doxography David Sider, Dirk Obbink, 2013-10-30 Pythagoras and Heraclitus developed theories of the universe and mankind's place in it which were taken seriously by all later Greek thinkers. None of their works remains however except in later paraphrases that all too often are misrepresentations. Pythagoras had followers who attributed their own ideas to their master. Heraclitus wrote in a prose style so ambiguous that he came to be known as the Shadow so that even the most earnest attempts to paraphrase his views had to smooth out his intentional rough edges. Nonetheless enough remains to allow the authors of this volume edited by David Sider and Dirk Obbink Oxford to offer new ways of viewing their views and the way others perceived them.
