negative impact of seizures while trying to minimize the difficulties in social life imposed by people's fears of seizures can be a difficult challenge. This is most difficult when discussing seizure-related death. However, our position must be to inform patients and families so they can make their life and treatment choices with complete understanding of choices and risks. Delivering a Package of Care: Delivering continuity of health care will be a major need throughout John's lifespan. This continuity should cover seizure assessment and management yet also be responsive to changes in the care environment. A person with ID who is no longer resident in the family home is likely to undergo many changes in staffing over a lifetime. As for many people, their ability to communicate their health needs will be compromised and these changes in staff can offer considerable risks in chronic disease management.
