Nurses Matter Reclaiming Our Professional Identity

Arthur James Wells

Nurses Matter Reclaiming Our Professional Identity:

Nurses Matter Verena Tschudin, 1999-11-11 Today's nurses find themselves in the position of having to redefine their identity. They must ask themselves why they matter, what is important about them as professionals and how they contribute as team members. Starting from an ethical standpoint, this book explores the nature of nursing and the dilemmas facing today's professionals. The author shares her vision of a new kind of professional, a vision which will empower readers to discover fresh meaning in their work and in their role.

The Globalisation of Nursing Verena Tschudin, Anne Davis, 2023-03-31 Globalisation affects health care and nursing and has the potential to change the very nature of what we now take for granted in health care and how we obtain it. Nursing as a profession faces multiple challenges, many of them because of globalization. Nurses have always seen their profession as a passport to the world. In the past, the move

Spiritual Care in Everyday Nursing Practice Janice Clarke, 2013-05-31 As changes in technology, policy and management put an increasing emphasis on processes and procedures in nursing and health care, how do we continue to make room for compassion, the ancient human value that calls most nurses to the profession? In *Spiritual Care in Everyday Nursing Practice*, Janice Clarke argues that it is compassionate care of the whole person, body and soul, which is at the heart of nursing practice. That values the individual and respects their dignity. Rather than seeing spiritual care as an addition to what nurses already do, this new approach considers it a natural part of compassionate care, which doesn't present the nurse with an extra, ambiguous burden to deal with. Providing a brief historical introduction to the concept of spirituality, Clarke examines the ways in which our spiritual life, a source of strength and meaning, can be influenced by factors such as age, illness and suffering, and mental illness, as well as our religious beliefs. Providing a practical guide to talking about and working with spirituality, she explores how nurses might imbue all their practice, including the physical aspects of care, from use of touch to helping patients to move, bathe and eat, with an attention to spiritual needs. A timely, accessible and practical introduction to a concept that is under-explored in contemporary nursing literature, this book will be of great value to students and professionals alike.

Care in Nursing Wilfred McSherry, Robert McSherry, Roger Watson, 2012-02-09 *Care in Nursing* addresses the fundamental caring principles, values and skills nurses require to provide sound care to their patients and to meet the challenges of nursing in the future. Exploring essential knowledge and competencies, the authors explore research evidence and real-life practice before outlining practical skills which will empower nurses to deliver quality care. Written by nurses and health professionals from both practice and academia, *Care in Nursing* explores how care underpins every element of nursing, including patient-centred care, cultural diversity, sociology, psychology, communication, partnership, working law and ethics, management and leadership, and more. A specific chapter also addresses how nurses can develop self-care techniques to meet the pressures and demands of a challenging yet ultimately rewarding career. Relevant to nurses in all fields and a diverse range of clinical and non-clinical settings, this is essential reading for nursing students, qualified nurses, mentors, nursing

academics as well as nurse managers and leaders

A Theory of

Cancer Care in Healthcare Settings Carol Cox, Maya Zumstein-Shaha, 2017-09-01. This book provides healthcare professionals with a practice theory for the care and management of patients who have been diagnosed with cancer. It explores what patients experience and how healthcare professionals can assist them in dealing with their uncertainty and fear as well as planning for the future. Unique to the book is its explication of the emerging theory, The Omnipresence of Cancer, which is set in the context of a discussion of earlier theories also concerned with cancer care. Chapters demonstrate how The

Omnipresence of Cancer has been developed, validated through research and being further tested in relation to cancer care.

In particular, a chapter on philosophical reflections using theory to produce knowledge for practice is included. Each chapter provides essential background, a synthesis of the current state of knowledge and practice examples associated with cancer care. The combination of theoretical reflection and practice examples is designed to promote comprehension and guidance on implementation of the theory as well as recommendations for practice. This book will be of significant interest to healthcare students and professionals working in the field of cancer care and oncology, particularly healthcare professionals working in advanced practice roles and nurse educators. It is also anticipated that professionals working in pastoral care, occupational therapy, social work and radiography will be interested in this book.
