Neuroscience of Eating: From Physiology to Pathology Kiyoshi Nakahara, Junichi Chikazoe, Thomas Hummel, Anne Roefs, Masahiro Yamaguchi, 2022-03-09 The ASMBS Textbook of Bariatric Surgery Christopher Still, David B. Sarwer, Jeanne Blankenship, 2014-09-17 Developed by the American Society for Metabolic and Bariatric Surgery ASMBS The ASMBS Textbook of Bariatric Surgery provides a comprehensive guide of information dealing with the ever evolving field of bariatric surgery Volume II Integrated Health is divided into 3 sections bariatric medicine psychosocial and nutritional aspects of bariatric surgery The first section deals with the psychosocial issues associated with morbid obesity The second section deals with the role of bariatric physicians in preoperative and postoperative support of the bariatric patients The nutritional section discusses the preoperative and postoperative nutritional support for the bariatric patient The ASMBS Textbook of Bariatric Surgery will be of great value to surgeons residents and fellows bariatric physicians psychologists psychiatrists and integrated health members that manage the morbidly obese

The Handbook of the Neurobiology of Eating Disorders Oxford Editor, 2025-10-03 The handbook provides readers with a useful and accessible reference that summarizes and highlights critical findings in eating disorders to provide foundational knowledge of biological and brain function in eating disorders how this relates to symptom expression and maintenance and how this can inform future research and treatment development efforts needed to improve efficacy

Eating - Pathology and Causes José Vicente Martínez-Quinones, Ignacio Jáuregui-Lobera, 2024-01-31 *Eating Pathology and Causes* reflects on current problems related to eating disorders and obesity It includes six chapters that address such topics as the impact of media and social networks on the prevalence of eating disorders among youth epidemiological issues and the impact of the COVID 19 pandemic on the development and aggravation of eating disorders nutritional therapy and obesity and lifestyle genetic and psychological factors of obesity *Handbook of Behavior, Food and Nutrition* Victor R. Preedy, Ronald Ross Watson, Colin R. Martin, 2011-04-15 This book disseminates current information pertaining to the modulatory effects of foods and other food substances on behavior and neurological pathways and importantly vice versa This ranges from the neuroendocrine control of eating to the effects of life threatening disease on eating behavior The importance of this contribution to the scientific literature lies in the fact that food and eating are an essential component of cultural heritage but the effects of perturbations in the food cognitive axis can be profound The complex interrelationship between neuropsychological processing diet and behavioral outcome is explored within the context

of the most contemporary psychobiological research in the area This comprehensive psychobiology and pathology themed text examines the broad spectrum of diet behavioral and neuropsychological interactions from normative function to occurrences of severe and enduring psychopathological processes

Alexander Haslam, 2018-05-01 British Psychology Society Textbook of the Year 2020 Why do people who are more socially connected live longer and have better health than those who are socially isolated Why are social ties at least as good for your health as not smoking having a good diet and taking regular exercise Why is treatment more effective when there is an alliance between therapist and client Until now researchers and practitioners have lacked a strong theoretical foundation for answering such questions This ground breaking book fills this gap by showing how social identity processes are key to understanding and effectively managing a broad range of health related problems Integrating a wealth of evidence that the authors and colleagues around the world have built up over the last decade The New Psychology of Health provides a powerful framework for reconceptualising the psychological dimensions of a range of conditions including stress trauma ageing depression addiction eating behaviour brain injury and pain Alongside reviews of current approaches to these various issues each chapter provides an in depth analysis of the ways in which theory and practice can be enriched by attention to social identity processes Here the authors show not only how an array of social and structural factors shape health outcomes through their impact on group life but also how this analysis can be harnessed to promote the delivery of social cures in a range of fields This is a must have volume for service providers practitioners students and researchers working in a wide range of disciplines and fields and will also be essential reading for anyone whose goal it is to improve the health and well being of people and communities in their care
