Monetary and Capital Markets Department,2015-04-02 This paper discusses key findings of the Detailed Assessment of Observance of the Basel Core Principles for Effective Banking Supervision BCP on the United States The U S federal banking agencies have improved considerably in effectiveness These improvements are reflected in the high degree of compliance with BCP in this current assessment Shortcomings have been observed particularly in the treatment of concentration risk and large exposures but they do not raise concerns overall about the authorities ability to undertake effective supervision These shortcomings should however be addressed if the United States is to achieve the standards of supervisory effectiveness expected of one of the most systemically important financial systems in the world      *Basel Compliance and Financial Stability* Mohammad Bitar,Mr.Sami Ben Naceur,Rym Ayadi,Thomas Walker,2017-07-18 The paper provides robust evidence that compliance with Basel Core Principles BCPs has a strong positive effect on the Z score of conventional banks albeit less pronounced on the Zscore of Islamic banks Using a sample of banks operating in 19 developing countries the results appear to be driven by capital ratios a component of Z score for the two types of banks Even though smaller on Islamic banks individual chapters of BCPs also suggest a positive effect on the stability of conventional banks The findings support the effective role of BCP standards in improving bank stability whose important implications led to the Islamic Financial Services Board IFSB publication of new recommendations in 2015 to bring BCP standards in line with the Core Principles for Islamic Finance Regulation CPIFRs standards Our findings suggest that because Islamic banks are benchmarked closely to BCPs the implementation of CPFIRs should also positively affect their stability      **United Republic of Tanzania** International Monetary Fund. Monetary and Capital Markets Department,2018-12-04 Tanzania s bank dominated financial sector is small concentrated and at a relatively nascent stage of development Financial services provision is dominated by commercial banks with the ten largest institutions being preeminent in terms of mobilizing savings and intermediating credit Medium to small banks rely systematically more on costlier short term interbank financing and institutional deposits and have markedly higher operating costs These structural features underpin financial stability challenges which are significant Bank asset quality has deteriorated sharply in recent years and under provisioning is significant belying the apparently comfortable capital cushions Credit growth has fallen precipitously corporate debt loads have risen and their cash flows are weak Dollarization of bank balance sheets raises the possibility of solvency stress under shocks being exacerbated by funding liquidity pressures especially at smaller banks      Brazil International Monetary Fund.

Monetary and Capital Markets Department,2018-11-30 The Central Bank of Brazil BCB has shown a determined commitment to enhancing its standards and practices of banking supervision Changes in the thinking and practices of the BCB s supervision are not limited to responses to the demands of the international regulatory reform agenda Overall the BCB has been guided by the principle of integration both in terms of the expectations that it places on its own internal operations but on the standards it expects the financial institutions to meet in governing their own risks and activities One example is the BCB s innovative and challenging work in the field of contagion analysis at the systemic level which is a perspective it also seeks to embed in its analysis of contagion risk in its prudential work at firm level Boosting staff levels in conduct supervision introducing a form of twin peaks contagion risk analysis and the prudential conglomerate approach also exemplify welcome developments

Management Of Banking And Financial Services, 2/E Suresh Padmalatha,2011-09 The dynamic banking and financial services environment in the country calls for prudent decision making under pressure Management of Banking and Financial Services provides students and practitioners with a thorough understanding of managerial issues in the banking and financial services industry enabling them to evaluate the overall organisational impact of their decisions The first section of the book focuses on the basic concepts of banking and financial services and the other sections explain how these concepts are applied in the global banking environment as well as in India In addition to presenting the big picture of the banking and financial services industry the book also provides useful tips on the trade off between risk and return
