Community Health Psychology Victor De La Cencela, Jean Lau Chin, Yvonne Jenkins, 2016-01-28. As the number of people of color rapidly grows within the US population, health providers in these communities have become increasingly aware of the need to address the concerns and problems particular to each group. It's also become clear that as the delivery of our health care systems evolve, a new approach must be summoned to build systems both cost effective and socially responsible. *Community Health Psychology* offers a new and different perspective for redressing the gaps in our systems of care. The authors contend that in order to begin an attempt at eradicating the more intractable societal problems, health providers need to tailor themselves to a more culturally competent approach which addresses all members of a community they claim to serve.

The Lives of Community Health Workers Kenneth Maes,2016-12-01 The importance of community health workers is increasingly recognized within many of today s most high profile global health programs including campaigns focused on specific diseases and broader efforts to strengthen health systems and achieve universal health care Based on ethnographic work with Ethiopian women and men who provided home based care in Addis Ababa during the early roll out of antiretroviral therapies this book explores what it actually means to become a community health worker in today s global health industry Drawing on the author s interviews with community health workers as well as observations of their daily interactions with patients and supervisors this volume considers what motivates them to improve the quality of life and death of the most marginalized people The Lives of Community Health Workers also illuminates how their contributions at a micro level are intricately linked to policymaking and practice at higher levels in the field of global health It shows us that many of the challenges that community health workers face in their daily lives are embedded in larger social economic and political contexts and it raises a resounding call for further research into their labour and health systems they inhabit
