Principle-Based Stepped Care and Brief

Psychotherapy for Integrated Care Settings Alexandros Maragakakis, William T. O'Donohue, 2018-02-13 This timely volume provides the practitioner with evidence based treatments for many of the clinical problems encountered in integrated care. It applies the core concepts of stepped care to integrating brief mental health interventions as a way to address ongoing problems in the modern healthcare landscape. It sets out in depth the state of the healthcare crisis in terms of costs, staffing and training issues, integration logistics and management system culture and a variety of clinical considerations. Central to the book is a best practice template for providing behavioral stepped care in medical settings including screening and assessment levels of intervention and treatment referrals and collaboration with primary care and other specialties. Using this format, contributors detail specific challenges of and science based interventions for a diverse range of common conditions and issues including Depression, Anxiety disorders, Adherence to chronic obstructive pulmonary disorder management, Alcohol and other substance misuse, Attention deficit hyperactivity disorder, Chronic pain, Neurocognitive disorders, Paraphilias, problematic sexual interests, WU3 Sexual abuse and PTSD in children. A solid roadmap for widescale reform. **Principle Based Stepped Care and Brief Psychotherapy for Integrated Care Settings** is deeply informative reading for health psychologists, social workers, psychiatrists and clinical psychologists. It also clarifies the research agenda for those seeking improvements in healthcare quality and delivery and patient satisfaction.

Therapy with Children Debbie Daniels, Peter Jenkins, 2010-10-15 *Therapy with Children* is a vital resource for any practitioner navigating the legal minefield of working with children and young people. Prioritising the needs of the child as the client, the authors explore the legal and professional dimensions of working therapeutically with children. This long awaited second edition responds to significant shifts in policy and the revised text additionally addresses the importance of confidentiality in establishing a working alliance and maintaining a secure environment for therapy with children, the conflicting pressures faced by therapists concerning issues of parental involvement and children at risk, changes in light of the Children Act 2004, Mental Health Act 2007 and the Axon case, changes in the organisation of child protection, increased provision of therapeutic services for children particularly in school settings and the growing numbers of counsellors working with children, the relevance of psychoanalysis in development of child focused therapy as well as reference to other therapeutic approaches to child therapy, the urgent case for developing confidential spaces within therapeutic services for children and young people. Illustrated with vivid case examples, *Therapy with Children* provides stimulating reading and is an excellent source of reference for all psychotherapists and counsellors working with children. The issues here will also be of direct relevance to youth workers, teachers, social workers and health professionals.

A Comprehensive Guide to Child Psychotherapy and Counseling Christiane Brems, Christina H. Rasmussen, 2018-08-08 Christiane Brems in collaboration with new coauthor Christina Rasmussen introduces prospective and practicing clinicians to theories and principles of applied clinical work with children ages three to twelve years. The authors take an integrated approach to understanding children and their families using a

biopsychosociocultural model for conceptualization and treatment planning Their methods are practical and compassionate as well as contextually grounded and individually tailored Chapters follow the logical development of clinicians mirroring the natural flow of work with children Coverage ranges from the importance of a beginning practitioner s introspection and of ethical and legal issues to a variety of intervention techniques and strategies and finally termination Case studies showcase individualized and mindful treatment for each child with whom a clinician works Outstanding Features of the Fourth Edition Essential attention to how clinicians self awareness can lead to positive therapeutic relationships with children and their families Thorough discussions of the biopsychosociocultural model for conceptualization and treatment planning Emphasis on intensive assessment prior to treatment planning to address the needs of each child and family A compelling practical exploration of mindfulness intervention with children The authors methodology addresses the profound effects of the larger environment and culture on children By adopting the authors integrated approach clinicians are better able to understand important and complicated aspects of a child s and family s life From there compassionate thoughtful and relevant intervention ensues *Encyclopedia of Clinical Child and Pediatric Psychology* Thomas H.
