*Open Problems in Communication and Computation* Thomas M. Cover, B. Gopinath, 2012-12-06 Thomas M Cover and B Gopinath The papers in this volume are the contributions to a special workshop on problems in communication and computation conducted in the summers of 1984 and 1985 in Morristown New Jersey and the summer of 1986 in Palo Alto California The structure of this workshop was unique no recent results no surveys Instead we asked for outstanding open problems in the field There are many famous open problems including the question P NP the simplex conjecture in communication theory the capacity region of the broadcast channel and the two helper problem in information theory Beyond these well defined problems are certain grand research goals What is the general theory of information flow in stochastic networks What is a comprehensive theory of computational complexity What about a unification of algorithmic complexity and computational complexity Is there a notion of energy free computation And if so where do information theory communication theory

computer science and physics meet at the atomic level Is there a duality between computation and communication Finally what is the ultimate impact of algorithmic complexity on probability theory And what is its relationship to information theory The idea was to present problems on the first day try to solve them on the second day and present the solutions on the third day In actual fact only one problem was solved during the meeting El Gamal's problem on noisy communication over a common line
