Prisoners In Prison Societies:

Prisoners in Prison Societies Ulla Bondeson, 1989-01-01 Prisoners in Prison Societies is a study of criminal career patterns over time demonstrating specifically how and in what ways imprisonment has a positive correlation with later recidivism The book combines original research and a ten year follow up study of Swedish inmates surveying their attitudes on everything from political ideology to prison reform The work is much more than a survey of prisoner attitudes however it includes official statements and administrative staff assessments at the institutions examined As a result it is many sided and avoids the usual special pleading of criminological writings Among its unique features Prisoners in Prison Societies analyzes thirteen correctional institutions ranging from training schools to youth and adult prisons as well as a preventative detention facility These four types cover representative samples of male and female young and old offenders In individual and group interviews conducted with a time interval the author finds that the form of incarceration is less significant in determining prisoner behavior than the fact of incarceration as such Whether one looks at the data across variables or in longitudinal terms the fact of criminalization rather than the goal of rehabilitation creates conditions of permanent incarceration A leitmotif of the book is comparison of penal institutions and policies in the United States and Sweden with an encyclopedic presentation of the sociological and criminological literature From the American tradition Bondeson distinguishes between program research and sanction research Her notion of prisonization as a special form of socialization derives from the work of scholars from Clemmer to Goffman her work utilizes notions of informal social systems within formal systems especially how the former preempt the latter The interplay of hard and original research at the prison level coupled with a sweeping command of the basic literature makes this book unique in contemporary criminology
