Literature and Human Rights in a 'Post'-Colonial World, 2021-10-18 Studying postcolonial literatures in English can and indeed should make a human rights activist of the reader there is after all any amount of evidence to show the injustices and inhumanity thrown up by processes of decolonization and the struggle with past legacies and present corruptions Yet the human rights aspect of postcolonial literary studies has been somewhat marginalized by scholars preoccupied with more fashionable questions of theory The present collection seeks to redress this neglect whereby the definition of human rights adopted is intentionally broad The volume reflects the human rights situation in many countries from Mauritius to New Zealand from the Cameroon to Canada It includes a focus on the Malawian writer Jack Mapanje The contributors concerns

Denniston, Frederick Mansfield Hodges, Marilyn Fayre Milos, 2013-06-29 Every year in the United States and the third world combined 13 3 million boys and 2 million girls are circumcised Whether because of perceived medical cultural or religious necessity most of these parents feel they have no alternative but to allow their children to undergo this surgery Sparking intense debate the circumcision of children is a highly controversial and complex phenomenon that touches a variety of sociological areas such as religious beliefs identity issues medical conceptualizations fear and superstition The contributors to this volume comprise an international panel of experts in the fields of medicine psychology law ethics sociology anthropology history theology and politics In 18 chapters they discuss the history of circumcision document the physical and psychological consequences of circumcision present the latest anatomical discoveries about the male prepuce analyze the role of circumcision in various traditions reveal the medical industry's investment in the practice describe current legislative efforts to protect children from circumcision and outline effective culturally sensitive methods that are being implemented today to safeguard the human rights of at risk children For its insights into this troubling aspect of culture Understanding Circumcision A Multi Disciplinary Approach to a Multi Dimensional Problem is a critically important contribution to the growing body of literature on this subject

**The Female Circumcision Controversy** Ellen Gruenbaum, 2015-03-17 To the Western eye there is something jarringly incongruous even shocking about the image of a six year old girl being held down by loving relatives so that her genitals can be cut Yet two million girls experience this each year Most Westerners upon learning of the practice of female circumcision have responded with outrage those committed to improving the status of women have gone beyond outrage to action by creating various programs for eradicating the practice But few understand the real life complexities families face in deciding whether to follow the traditional practices or to take the risk of change In The Female Circumcision Controversy Ellen Gruenbaum points out that Western outrage and Western efforts to stop genital mutilation often provoke a strong backlash from people in the countries where the practice is common She looks at the validity of Western arguments against the practice In doing so she explores both outsider and insider perspectives on female circumcision concentrating particularly on the complex attitudes of the individuals and groups who practice it and on indigenous efforts to end it Gruenbaum finds that the criticisms of outsiders are frequently simplistic and fail to appreciate the diversity of cultural contexts the complex meanings and the conflicting responses to change Drawing on over five years of fieldwork in Sudan where the most severe forms of genital surgery are common Gruenbaum shows that the practices of female circumcision are deeply embedded in Sudanese cultural traditions in religious moral and aesthetic values and in ideas about class ethnicity and gender Her research illuminates both the resistance to and the acceptance of change She shows that change is occurring as the result of economic and social developments the influences of Islamic activists the work of Sudanese health educators and the efforts of educated African

women That does not mean that there is no role for outsiders Gruenbaum asserts and she offers suggestions for those who wish to help facilitate change By presenting specific cultural contexts and human experiences with a deep knowledge of the tremendous variation of the practice and meaning of female circumcision Gruenbaum provides an insightful analysis of the process of changing this complex highly debated practice

**Compromised Bodies** Sarah O'Neill, 2025-03-25 This ethnography unravels the continuing political tensions surrounding Senegal's 1999 national ban on female genital mutilation The Senegalese parliament authorized a national ban on Female Genital Mutilation in 1999 Because only a third of the Senegalese population practiced female genital cutting FGC at the time policy makers did not expect that the new law would cause controversy or provoke commotion Yet in Fouta Toro and among Fulani who traditionally practiced FGC the response to the new law was fury and frustrations often turned violent More than a decade after the ban Fouta Toro was considered the most difficult region for anti FGC activists both from inside and outside the government Tires were burned international NGO delegates were threatened and activists publicly speaking out against the practice were religiously condemned Animosity toward the ban remains palpable in the region to this day The ban many but not all locals say is nothing other than an overt act of Western cultural imperialism imposed on their community For these individuals resisting the ban is critical for maintaining the autonomy and integrity of a traditional way of life And from the outside opposition to the law and NGOs can seem unified However anthropologist Sarah O'Neill discovers that on the ground there are tensions between those who oppose the ban and those who support it even as that support is nuanced and often complicated This ethnography unravels the continuing political tensions surrounding both national and international interventions in Fouta Toro and in Senegal that place protection of the female body at the center of their concerns By way of the many stories of ordinary women and men caught up in debates around the value of the practice and meaning of FGC **Compromised Bodies** reveals the personal struggles and difficult decisions Fulani face be they traditional cutters religious leaders mothers husbands divorced women or anti FGC activists

Denniston, Frederick Mansfield Hodges, Marilyn Fayre Milos, 2013-03-09 Who owns your sex organs Different cultures today and in different epochs have given a variety of answers to this question It may seem self evident that every individual owns and has sovereignty over his or her own body parts such as the head legs nose stomach pancreas and other body parts The sex organs however seem to be an exception Even though they are as much an integral part of the individual as a leg or a liver the sex organs are unique in that many cultures have established laws and taboos over the use and even the mere display of the sex organs Thus certain cultures have placed constraints over the individual's ownership of his or her sex organs and actively regulate and restrict the individual's access and use of those organs In other cultures the question of ownership of the sex organs is more decisively answered In any culture where circumcision to any degree of either the male or female is practiced permitted encouraged or even merely tolerated it is clear that the individual is not considered to own his own sex organs In the United States today the medical establishment has created an is considered acceptable and desirable that anyone for environment where it any reason can authorize or execute the amputation of the foreskin from a male child's penis
