book examines the development of four key movements that mediated the construction of the carceral state in important ways the victims movement the women s movement the prisoners rights movement and opponents of the death penalty This book argues that punitive penal policies were forged by particular social movements and interest groups within the constraints of larger institutional structures and historical developments that distinguish the United States from other Western countries

Caught Marie Gottschalk, 2014-12-07 A major reappraisal of crime and punishment in America The huge prison buildup of the past four decades has few defenders today yet reforms to reduce the number of people in U S jails and prisons have been remarkably modest Meanwhile a carceral state has sprouted in the shadows of mass imprisonment extending its reach far beyond the prison gate It includes not only the country s vast archipelago of jails and prisons but also the growing range of penal punishments and controls that lie in the never never land between prison and full citizenship from probation and parole to immigrant detention felon disenfranchisement and extensive lifetime restrictions on sex offenders As it sunders families and communities and reworks conceptions of democracy rights and citizenship this ever widening carceral state poses a formidable political and social challenge In this book Marie Gottschalk examines why the carceral state with its growing number of outcasts remains so tenacious in the United States She analyzes the shortcomings of the two dominant penal reform strategies one focused on addressing racial disparities the other on seeking bipartisan race neutral solutions centered on reentry justice reinvestment and reducing recidivism In this bracing appraisal of the politics of penal reform Gottschalk exposes the broader pathologies in American politics that are preventing the country from solving its most pressing problems including the stranglehold that neoliberalism exerts on public policy She concludes by sketching out a promising alternative path to begin dismantling the carceral state

Crimes of Punishment Theodore L. Dorpat, 2007 This groundbreaking book by an award winning psychoanalyst and forensic psychiatrist presents a comprehensive exploration of a timely but often taboo topic the failure of punishment to deter crime and violence an issue that affects us both individually and as a culture Written at the culmination of the author's fifty year career as a psychoanalyst forensic psychologist and scholar this wide ranging work identifies the origins of violence and investigates the surprising consequences of punishment from a multitude of perspectives In his treatment of the topic Dr Dorpat utilizes scientific research ethical reasoning and his vast clinical experience and insight He also suggests the benefits of new and emerging humane alternatives to the revenge punishment model currently entrenched in our society such as restorative justice In contrast to most contemporary measures these new approaches while still imprisoning dangerous individuals effectively stress reparation and forms of sanctioning other than incarceration When restitution replaces revenge everyone benefits Crimes of Punishment examines four key interrelated social methods of punishment These are 1 the corporal punishment of children 2 the incarceration of adults in prisons 3 capital punishment the death penalty and 4 emotional verbal abuse As he elucidates and analyzes each of these forms of punishment Dr Dorpat clearly and logically makes the case that punishment is not only ineffectual but that it also engenders more of what it ostensibly aims to stop violence and misbehavior Both children and adults who are subjected to punishment tend to become more violent individuals In covering the full scope of our contemporary justice system Dr Dorpat brings to the

forefront those who are often overlooked or dismissed the victims of crime His concluding chapters present and clarify the psychological wounds and needs of these individuals and demonstrate how restorative justice is effective in attending to victims in an ethical and healing manner In a humane and ethically evolved society restitution replaces punishment Market Comparison Crimes of Punishment is unique in that it covers not just one but four different types of punishment the corporal punishment of children the incarceration of adults the death penalty and verbal emotional abuse Two earlier books written by psychiatrists expose the terrible conditions in America s prisons They are The Crime of Punishment New York Viking 1968 by Karl Menninger and Prison Madness by Terry Kupers San Francisco Jossey Bass 1999 This book differs in two important ways from the books written by Menninger and Kupers First The Crimes of Punishment covers other kinds of punishment while those authors deal only with the punishment of incarceration Secondly the reforms they recommend are merely piecemeal modifications of the present criminal justice systems whereas Dr Dorpat argues for a radical change that includes the abolition of today s punitive prison Retributive Justice system and the establishment of a new and different system namely Restorative justice a system that has been developed over the past decade in Australia and New Zealand The Crimes of Punishment differs from Menninger s book in covering the many changes that have occurred in prisons since 1968 In several short chapters on restorative justice the book also explores this exciting new approach and serves as an informed introduction to a new important and effective moral approach to the treatment of criminals

The Rich Get Richer and the Poor Get Prison Jeffrey Reiman, Paul Leighton, 2023-04-28 For 40 years this classic text has taken the issue of economic inequality seriously and asked Why are our prisons filled with the poor Why aren t the tools of the criminal justice system being used to protect Americans from predatory business practices and to punish well off people who cause widespread harm This new edition continues to engage readers in important exercises of critical thinking Why has the U S relied so heavily on tough crime policies despite evidence of their limited effectiveness and how much of the decline in crime rates can be attributed to them Why does the U S have such a high crime rate compared to other developed nations and what could we do about it Are the morally blameworthy harms of the rich and poor equally translated into criminal laws that protect the public from harms on the streets and harms from the suites How much class bias is present in the criminal justice system both when the rich and poor engage in the same act and when the rich use their leadership of corporations to

perpetrate mass victimization The Rich Get Richer the Poor Get Prison shows readers that much of what goes on in the criminal justice system violates citizens sense of basic fairness It presents extensive evidence from mainstream data that the criminal justice system does not function in the way it says it does nor in the way that readers believe it should The authors develop a theoretical perspective from which readers might understand these failures and evaluate them morally and they do it in a short text written in plain language Readers who are not convinced about the larger theoretical perspective will still have engaged in extensive critical thinking to identify their own taken for granted assumptions about crime and criminal justice as well as uncover the effects of power on social practices This engagement helps readers develop their own worldview New to this edition Presents recent data comparing the harms due to criminal activity with the harms of dangerous but not criminal corporate actions Updates research on class discrimination at every stage of the criminal justice system Updates statistics on crime victimization incarceration and wealth Increased material for thinking critically about criminal justice and criminology New material on global warming and why Black Lives Matter protests did not cause increases in crime in 2020 Expanded discussion of marijuana and drug legalization Stronger chapter overviews clearer chapter structure and expanded review questions Streamlined and condensed prose for greater clarity Rich Get Richer and the Poor Get Prison, The (Subscription) Jeffrey Reiman,Paul Leighton,2015-07-14 Illustrates the issue of economic inequality within the American justice system The best selling text The Rich Get Richer and the Poor Get Prison contends that the criminal justice system is biased against the poor from start to finish The authors argue that even before the process of arrest trial and sentencing the system is biased against the poor in what it chooses to treat as crime The authors show that numerous acts of the well off such as their refusal to make workplaces safe refusal to curtail deadly pollution promotion of unnecessary surgery and prescriptions for unnecessary drugs cause as much harm as the acts of the poor that are treated as crimes However the dangerous acts of the well off are almost never treated as crimes and when they are they are almost never treated as severely as the crimes of the poor Not only does the criminal justice system fail to protect against the harmful acts of well off people it also fails to remedy the causes of crime such as poverty This results in a large population of poor criminals in our prisons and in our media The authors contend that the idea of crime as a work of the poor serves the interests of the rich and powerful while conveying a misleading notion that the real threat to Americans comes from the bottom of society rather than the top Learning Goals Upon completing this book readers will be able to Examine the criminal justice system through the lens of the poor Understand that much of what goes on in the criminal justice system violates one's own sense of fairness Morally evaluate the criminal justice system's failures Identify the type of legislature that is biased against the poor *Children of the Drug War* Damon Barrett,2011 Book Description A unique collection of original essays that investigates the impacts of the war on drugs on children and young people With contributions from around the world and utilizing a wide range of styles and approaches including ethnographic studies personal accounts and interviews the

book asks three fundamental questions What have been the costs to children of the war on drugs Is the protection of children from drugs a solid justification for current policies What kinds of public fears and preconceptions exist in relation to drugs and the drug trade

Recognizing Race and Ethnicity, 2018-05-15 This book approaches the study of race ethnicity through a sociological lens It focuses on a few social policies that are perceived as race related such as affirmative action to an understanding of the historical racialization of the US welfare state overall

The Economic Anatomy of a Drug War David W. Rasmussen, Bruce L. Benson, 1994 This book explores the economics of illicit drug markets the connection between these markets and other crime and the adjustments these markets make when faced with changes in drug enforcement Focusing specifically on the most recent escalation of drug enforcement during the period from 1984 1989 Rasmussen and Benson adopt an economic perspective to explore the origins and effects of American drug policy Rasmussen and Benson argue that effective drug policy is only possible if we realize that increasing drug enforcement can be a tragedy of the commons because criminal justice resources are diverted from other uses and many unintended consequences are generated by politically popular drug enforcement initiatives
