Otto L. Shaw, 1969 **Crime in the Public Mind** Kathlyn Taylor Gaubatz, 2025-10-01 Crime in the Public Mind explores the politics of crime and criminal justice examining in depth what Americans think about penalties for criminal offenders While some are resigned others are desperate a few are hopeful and forgiving but most are frustrated and angry In fact fully eighty percent of the population believes that the court system should deal more harshly with criminal offenders In this readable account Kathlyn Taylor Gaubatz makes use of intensive interviews with Americans from varied walks of life in order to reveal the fascinating nuances in the public's views on criminal justice and in their motivations for holding these views She questions our easy acceptance of the very existence of a public consensus around such a complex intractable issue as crime Why do Americans support harsh penal policies when crime rates are actually falling How does this attitude square with our increasingly liberal social ideas What logic is there to support stiff sentencing when the vast majority of the public acknowledges that prisons have been powerless to reduce crime in our nation to an acceptable level The author powerfully weaves narratives from those she interviewed to construct an in depth theory about who joins and who spurns the consensus on criminal justice She explores the complex relationship between our political beliefs and our attitudes toward crime revealing in some cases a telling dissonance Through careful argumentation and demonstration Crime in the Public Mind concludes that Americans have become harsher on crime not in spite of becoming more liberal on a variety of other social issues but at least in part because we have done so At a time when crime has been called the political issue of the decade

Crime in the Public Mind forces us to confront our assumptions to sort through our fear. It gives us an opportunity to balance our desire for safety and our desire to see justice done with our innate compassion and understanding. By exposing the paradoxes of our beliefs, the author pushes us to reconsider whether incarceration really is the answer to every criminal offense and invites us to contemplate saner and perhaps more effective approaches to criminal justice. In the great tradition of Robert Lane's Political Ideology, Gaubatz has discovered that what the common man and woman believes about crime and punishment is more complicated than the polling numbers would allow. While clearly in sympathy with those who dissent from get tough approaches, she offers a balanced, insightful and timely understanding of public attitudes about criminal justice. Experts, policymakers, students and concerned citizens should read this fine book. John J. DiIulio Jr., Princeton University and Director, Brookings Institution Center for Public Management. Kathryn Taylor Gaubatz holds a Ph.D. in politics from Princeton University and is Executive Director of a non-profit agency that provides housing, counseling, child care and other services to homeless families and individuals in San Francisco.

Inside the Criminal Mind (Newly Revised Edition) Stanton Samenow, 2014-11-04. A brilliant, no-nonsense profile of the criminal mind, newly updated in 2022 to include the latest research, effective methods for dealing with hardened criminals, and an urgent call to rethink criminal justice from expert witness Stanton E. Samenow, Ph.D. Utterly compelling reading, full of raw insight into the dark mind of the criminal. John Douglas, author of the 1 New York Times bestseller Mind Hunter. Long-held myths defining the sources of and remedies for crime are shattered in this groundbreaking book, and a chilling profile of today's criminal emerges. In 1984, Stanton Samenow changed the way we think about the workings of the criminal mind with a revolutionary approach to habilitation. In 2014, armed with thirty years of additional knowledge and insight, Samenow explored the subject afresh, explaining criminals' thought patterns in the new millennium, such as those that lead to domestic violence, internet victimization, and terrorism. Since then, the arenas of criminal behavior have expanded even further, demanding this newly updated version, which includes an exploration of social media as a vehicle for criminal conduct, new pharmaceutical influences, and the impact of the opioid crisis. Recent genetic and biological research into whether some people are wired to become criminals, new findings on the effectiveness of cognitive behavioral therapy, and a fresh take on criminal justice reform. Throughout, we learn from Samenow's five decades of experience how truly vital it is to know who the criminals are and how they think. If equipped with that crucial understanding, we can reach reasonable, compassionate, and effective solutions. From expert witness Dr. Stanton E. Samenow, a brilliant, no-nonsense profile of the criminal mind, updated to include new influences and effective methods for dealing with hardened criminals.

Changing Habits of Mind presents a theory of personality that integrates homeostatic dynamics of the brain with self-processes, emotionality, cultural adaptation, and personal reality. Informed by the author's brain-based, relational psychotherapeutic practice, the book discusses the brain's evolutionary growth, the four information processing areas of the brain, and the cortex in relationship to the limbic system.

Integrating the different experiences of sensory and non sensory processes in the brain the text introduces a theory of personality currently lacking in psychotherapy research that integrates neurobiology and psychology for the first time Readers will learn how to integrate psychodynamic processes with cognitive behavioral techniques while clinical vignettes exemplify the interaction of neurophysiological process with a range of psychological variables including homeostasis developmental family dynamics and culture Changing Habits of Mind expands the psychotherapist s perspective exploring the important links between an integrated theory of personality and effective clinical practice [Can Prisons Work?](#)

Stephen Duguid,2000-01-01 Duguid shows that both critics and defenders of incarceration have erred by making prisoners the object rather than the subject of their discourse **Out of Sight, Out of Mind** John Podmore,2012-01-19 At the heart of his book is his conclusion that prison simply does not work failing on three fundamental levels The view of the popular media is that when prisoners are locked up they cannot commit crime This is not true Podmore shows how crime actually proliferates in prison how serious organised crime is allowed to flourish there through bad management and how the UK s prisons are a multi million pound investment bank for the black economy The public sees prison as a deterrent This book shows that whilst it may deter the white middle classes for the majority of those behind bars it is merely a social tax or as Norman Stanley Fletcher was told in Porridge an occupational hazard It shows that for many across the spectrum of social exclusion it is a place of safety and preferable to life on the streets Also whatever spin is put on the figures it is clear that the majority of those leaving prison will quickly reoffend OUT OF SIGHT OUT OF MIND is a remarkable book that seeks to ignite a debate across society about a vital subject we ignore at our peril [Reports of the Directors of Convict Prisons on the Discipline and Management of Pentonville, Millbank, and Parkhurst Prisons, and of Portland, Portsmouth, Dartmoor, Chatham, Brixton, and Woking Prisons for Male Convicts ... killed the wife of the doctor who treated him for cancer Charlie explained to many people including those working for the police department that a computer chip that was placed in his brain made him do this killing He figured that this chip gave him hallucinations and much pain especially when he failed to do exactly what he was told to do during the hallucinations the police did not believe Charlie at first mainly because no image of such a chip showed up on x rays At the time experts who studied computer chips that could create hallucinations knew of many of those kinds of chips but none of them failed to show an image on x rays Later in the novel Charlie took many actions with the hope of persuading the police and the public at large to take seriously the notion that a computer chip might have been planted in his brain One such action that Charlie took when his situation seemed especially desperate resulted in the breaking of his skull
