    Privacy in Context Helen Nissenbaum,2009-11-24 Privacy is one of the most urgent issues associated with information technology and digital media This book claims that what people really care about when they complain and protest that privacy has been violated is not the act of sharing information itself most people understand that this is crucial to social life but the inappropriate improper sharing of information Arguing that privacy concerns should not be limited solely to concern about control over personal information Helen Nissenbaum counters that information ought to be distributed and protected according to norms governing distinct social contexts whether it be workplace health care schools or among family and friends She warns that basic distinctions between public and private informing many current privacy policies in fact obscure more than they clarify In truth contemporary information systems should alarm us only when they function without regard

for social norms and values and thereby weaken the fabric of social life   Proceedings 2002 VLDB Conference

Prevention and Other National Goals,2008-09-26 All U S agencies with counterterrorism programs that collect or mine
personal data such as phone records or Web sites visited should be required to evaluate the programs effectiveness
lawfulness and impacts on privacy A framework is offered that agencies can use to evaluate such information based
programs both classified and unclassified The book urges Congress to re examine existing privacy law to assess how privacy
can be protected in current and future programs and recommends that any individuals harmed by violations of privacy be
given a meaningful form of redress Two specific technologies are examined data mining and behavioral surveillance
Regarding data mining the book concludes that although these methods have been useful in the private sector for spotting
consumer fraud they are less helpful for counterterrorism because so little is known about what patterns indicate terrorist
activity Regarding behavioral surveillance in a counterterrorist context the book concludes that although research and
development on certain aspects of this topic are warranted there is no scientific consensus on whether these techniques are
ready for operational use at all in counterterrorism   Information Privacy United States. Congress. House. Committee on
