**Economic Analysis of Property Law Cases** Boudewijn R. A. Bouckaert, 2020-03-02 The discipline of law and economics has earned a reputation for developing plausible and empirically testable theories on the social functions and the impact of legal institutions Property rights are a field in which this has been very successful In this book economic property rights theories are applied to case law in order to examine the practice and solution of real life conflicts The author examines the economic problems which are dealt with in these cases and evaluate the courts decisions from an economic angle Cases are examined from across the UK the US Germany Belgium and Canada to allow international comparisons to be made These comparisons reveal that regardless of the legal system many legal issues have similar economic roots and therefore similar models of economic analysis can be applied The analysis of these cases also shows that the discipline of law and economics is not only successful in developing explanatory models but also useful to generate better considerations and solutions for legal conflicts in individual cases This book aims to bridge the gap between the academic and professional literature and demonstrate the benefits of the economic analysis of property rights cases to all those who are interested in law and economics

**Common-Property Arrangements and Scarce Resources** Edward M. Barbanell, 2001-09-30. It is widely held that private ownership is the preferred end state for all scarce resources. Those who hold this view have not looked closely enough at water in the American West. Barbanell contends. Because of water's special attributes, private ownership is an ineffective means for protecting individuals' interests. Splitting the various rights of ownership between individual resource users and the community to which they belong can better protect those interests. Barbanell develops a conception of this form of common ownership, a common property arrangement, and shows that it can function effectively for water in the West. More generally, he offers an expanded framework for analyzing right relationships and examining problems related to resource scarcity. Some economists argue that John Locke's account of property justifies the private ownership of water in the West. Barbanell argues, however, that because Locke did not think carefully enough about the variable nature of resources, his account does not support that conclusion. Although economists recognize that private ownership may not be perfectly suited to all resources, they are nonetheless skeptical about common ownership alternatives. Barbanell shows that this skepticism is unwarranted. When the rights relationship among members of a resource community is based on mutual expectations of reciprocal behavior, then a common property arrangement can function effectively to control the degradation and depletion of a scarce resource. Barbanell's argument that common ownership is a conceptually sound and politically viable alternative for water will be of particular interest to public policy makers, environmentalists, resource economists, and political philosophers.

**Common Property, the Golden Age, and Empire in Acts 2:42-47 and 4:32-35** Joshua Noble, 2020-10-15. Joshua Noble focuses on the rapid appearance and disappearance in Acts 2 and 4 of the motif that early believers hold all their property in common and argues that these descriptions function as allusions to the Golden Age myth. Noble suggests Luke's claims that the believers had all things in common and that no one claimed private ownership of any possessions, a motif that does not appear in any biblical source, rather calls to mind Greek and Roman traditions that the earliest humans lived in utopian conditions when no one possessed any private property but all things were common. By analyzing sources from Greek, Latin, Jewish, and Christian traditions and reading Acts 2:42-47 and 4:32-35 as Golden Age allusions, Noble illustrates how Luke's use of the motif of common property is significant for understanding his attitude toward the Roman Empire. Noble suggests that Luke's appeal to this myth accomplishes two things: it characterizes the coming of the Spirit as marking the

beginning of a new age the start of a universal restoration that will find its completion at the Second Coming of Christ and it creates a contrast between Christ who has actually brought about this restoration and the emperors of Rome who were serially credited with inaugurating a new Golden Age
