Tsui,Yanjie Bian,2014-12-18 One of the most important outcomes of market reforms in China over the past 20 years has been the emergence of a significant domestic private sector which now accounts for almost a third of China's GDP and is by far the country's most important source of employment growth This book is the first in depth analysis of the management and operation of these domestic private firms which are defined as companies or organizations created by PRC citizens including township enterprises and collectives The book provides a comprehensive and multidisciplinary perspective on the factors important to the successful operation and growth of these firms It begins with a review of the literature on the topic in three different disciplines economics sociology and management each followed by several chapters covering recent developments in these areas Featuring contributions by distinguished scholars and China experts the work concludes with an insightful chapter on the future of China's public sector in the global economy Private Business and Economic Reform in China Susan Young,2015-05-11 Based on Party and state documents Chinese newspaper reports and surveys the Chinese and Western scholarly literature and the author's own fieldwork this important study examines the private sector as a case study of the mechanics of reform in China emphasizing the relationships among local officials private businesses and central policy The book traces the growth of private business in China since 1978 and focuses on the interaction between private sector policy and other reforms and examines how this has affected China's political economy **Markets Over Mao** Nicholas R Lardy,2014-09-10 China's transition to a market economy has propelled its remarkable economic growth since the late 1970s In this book Nicholas R Lardy one of the world's foremost experts on the Chinese economy traces the increasing role of

market forces and refutes the widely advanced argument that Chinese economic progress rests on the government's control of the economy's commanding heights. In another challenge to conventional wisdom, Lardy finds little evidence that the decade of the leadership of former President Hu Jintao and Premier Wen Jiabao (2003-13) dramatically increased the role and importance of state-owned firms as many people argue. This book offers powerfully persuasive evidence that the major sources of China's growth in the future will be similarly market rather than state-driven, with private firms providing the major source of economic growth, the sole source of job creation, and the major contributor to China's still-growing role as a global trader. Lardy does, however, call on China to deregulate and increase competition in those portions of the economy where state firms remain protected, especially in energy and finance.

China's Emerging Private Enterprises Neil F. Gregory, Stoyan Tenev, Dileep M. Wagle, 2000-01-01. This report aims to take stock of the domestic private sector in China, which has emerged over the past twenty years. It is based on surveys and interviews carried out in four locations in China where private sector development is relatively advanced. These studies were supplemented by discussions with entrepreneurs, industry associations, and government officials. The report focuses on three main themes: the structure of private enterprises, the enabling environment for their development, and access to financing. For each of these areas, the report presents an analysis of constraints on private sector development and outlines an agenda for addressing these constraints. The report recommends that, in order to encourage continuing private sector growth, the government should create a level playing field for all enterprises by intervening less and focusing on improved commercial legislation and more open markets. Financial institutions must develop to serve the private sector, and private enterprises need to mature and improve their corporate governance in order to derive the most benefit from improvements in the business environment.

China's Domestic Private Firms Anne S. Tsui, Yanjie Bian, 2006. One of the most important outcomes of market reforms in China has been the emergence of a significant domestic private sector. This book presents an analysis of the management and operation of these domestic private firms, which are defined as companies or organizations created by PRC citizens, including township enterprises and collectives.

China's Rational Entrepreneurs Barbara Krug, 2004-07-31. The ability of China's entrepreneurs to establish firms in the midst of a strangling bureaucratic system is a topic which demands attention, not least because it forms the basis of China's economic development. Combining theoretical approaches with extensive fieldwork, *China's Rational Entrepreneurs* presents a fresh angle of analysis for understanding the behaviour of Chinese entrepreneurs and what kind of relations they have with local government in order to secure long-term business success.

China's Developmental Miracle Alvin Y. So, 2016-07-08. In contrast to the failure of economic reforms in Eastern Europe, China's economic reforms have been quite successful. Decollectivization, marketization, state enterprise reforms, and reintegration into the world economy have led to very rapid economic development in China over the past two decades. These economic reforms, in turn, triggered profound social and political changes. This collection examines the origins, nature, and impact, as well as the

future prospects of these reforms and changes The contributors are all active researchers from a variety of disciplines including economics sociology political science and geography

China's Middle Class Li Youmei, 2021-05-12 This book is a collection of empirical studies on China's middle class from top ranking Chinese sociologists discussing this newly identified social stratum with regard to the basic concept and scope of the group its functions formation identity consumption behavior patterns and value system As the first study of its kind the analysis of most chapters is based on a rich body of empirical data gathered from rigorous large scale surveys designed specifically for the Chinese middle class across megacities including Beijing Shanghai and Guangzhou The book traces the complex and dynamic formation process of China's middle class from different perspectives while dealing with issues of social concern such as rigid social stratification The findings shed light on the underlying logic of structural change in Chinese society over several recent decades with significant policy implications The book will attract sociologists students and policymakers interested in social structure social transformation and middle income groups in China
