*Investigating Reproductive Tract Infections and Other Gynaecological Disorders* Shireen Jejeebhoy, Michael Koenig, Christopher Elias, 2003-02-13 Reproductive tract infections and other gynaecological disorders among women represent an enormous global health burden This significant book will help focus research on this important though neglected area The primary aims of the book are to provide an overview of reproductive tract infections and other gynaecological disorders to highlight the conceptual and methodological challenges associated with undertaking research on this subject and to serve as a reference for future research in this area The book focuses on developing country settings and recognizes that gathering this sort of information requires a multidisciplinary and culturally sensitive approach Findings from the research described in this book will undoubtedly assist physicians social scientists epidemiologists and public health practitioners in evaluating the magnitude of this problem within the community at large and in identifying potentially effective medical and behavioural interventions to address this problem

*Women and Politics in Contemporary Ireland* Yvonne Galligan, 1998-01-01 As Ireland made the transition from a rural to a post industrial society from the 1970s onwards Irish women developed a significant political voice Long excluded from participation in the civic arena they organised to make new challenging and specific demands on government The relationship between feminist representatives and political decision makers is at the core of this book It shows how Irish women developed the political skills required to represent women s interests to government effectively and finds that the political activity of the women s movement in the Republic of Ireland contributed to the dismantling of a range of discriminatory policies against women Galligan discusses the compromises made by both sides as the political system slowly moved to accomodate the feminist agenda In doing so she explores the dynamics of Irish politics from a different yet complementary perspective from the institutional approach which characterizes other studies of the Irish political system This book clearly marks the significant points in the creation of a more woman friendly society in Ireland from the 1970s to the present day It is the story of women s rights in contemporary Ireland

**Female Genital Cutting** Elizabeth Heger Boyle, 2005-09-09 The practice of female genital cutting sometimes referred to as female circumcision and common in a number of African states

has attracted increasing attention in recent years and mobilized strong international opposition While it typically produces a visceral response of horror and revulsion in Westerners the practice is widely regarded in some cultures as essential for proper development into womanhood and is defended by women who have themselves experienced it and who have had the procedure performed on their own daughters It is also perceived in many Islamic communities as religiously prescribed although most Islamic clerics do not condone the practice In this study sociologist Elizabeth Boyle examines this controversial issue from the perspectives of the international system governments and individuals Drawing on previous scholarship records of international organizations demographic surveys and the popular media Boyle examines how the issue is perceived and acted upon at international national and individual levels Grounding her work in the sociological theory of neoinstitutionalism Boyle describes how the choices made by governments and individual women are influenced by the often conflicting principles of individual human rights and sovereign autonomy She concludes that while globalization may exacerbate such conflicts it can ultimately lead to social change

*Radical Women in Latin America* Victoria González-Rivera, Karen Kampwirth, 2010-11-01 The rationale stated for studying radical women of Latin America is first to throw light on the development of dictatorship and authoritarianism second to transcend the stereotype of inherently violent men and inherently peaceful women and finally to demonstrate that there is no automatic sisterhood among women even of the same class and ethnicity Brief chronologies of three countries each in Central and South America open the two sections The contributors are historians and political scientists primarily from the US Annotation copyrighted by Book News Inc Portland OR

DiClemente,Sten H. Vermund,2006-04-11 Globally action to prevent HIV spread is inadequate Over 16 000 new infections occur every day Yet we are not helpless in the face of disaster as shown

by the rich prevention experience analyzed in this valuable new compendium Best practice exists a set of tried and tested ways of slowing the spread of HIV of persuading and enabling people to protect themselves and others from the virus Individually features of best practice can be found almost everywhere The tragedy on a world scale is that prevention is spotty not comprehensive the measures are not being applied on anywhere near the scale needed or with the right focus or synergy The national response may concentrate solely on sex workers for example Elsewhere efforts may go into school education for the young but ignore the risks and vulnerability of men who have sex with men Action may be patchy geographically AIDS prevention may not benefit from adequate commitment from all parts and sectors of society compromising the sustainability of the response In some countries matters are still worse there is still hardly any action at all against AIDS and scarcely any effort to make HIV visible It is no wonder that the epidemic is still emerging and in some places is altogether out of control
