Private Future Causes And Consequences Of Community Collapse In The West:

The Private Future Martin Pawley,1975 The Future Of U.s. Politics In An Age Of Economic Limits Bruce Shefrin,2019-07-18 This study of the future of U S politics begins with an in depth examination of the political social and economic dynamics of the present Dr Shefrin demonstrates that economic growth has been a key element in maintaining political stability by diverting the attention of materially deprived groups away from disruptive political activity Examining the interaction of technological and political forces in the physical and social environment he argues that an expectation of economic limits is reasonable and perhaps undeniable and focuses on the changes in the political system that can be anticipated in a no growth or slow growth society Dr Shefrin employs a nondeterministic social choice approach to reach the conclusion that because the shape of the future is of major political significance it will be the focus of intense political conflict The four scenarios he presents reflect the major alternative directions possible for U S society according to current social theory Dr Shefrin feels that the conflict among supporters of these alternatives will constitute the politics of the future

Towards Universality Richard Padovan,2013-07-04 There is no shortage of books about Le Corbusier or Mies van der Rohe or De Stijl However this book considers them in relation to each other observing how a study of one can illuminate the works of the others Going beyond a superficial look at the end products of these architects this book examines the philosophical foundations of their work taking as its central theme the aim of universality as opposed to the individual and the particular Each of these three aimed at universality but for each this concept took on a different form The universality of De Stijl and artists like Van Doesburg and Mondrian resembled that of the universe itself it was boundless going beyond the limits of the canvas and seeking to abolish the wall as the boundary between interior and exterior space In contrast each of Le Corbusier s creations was a self contained universe within a clear frame while Mies fluctuated between these two perspectives

the purpose of architecture Countering the habitual building practice of setting walls and spaces in place Archigram architects wanted to provide the equipment for amplified living and they welcomed any cultural rearrangements that would ensue Archigram Architecture without Architecture the first full length critical and historical account of the Archigram phenomenon traces Archigram from its rediscovery of early modernist verve through its courting of students to its ascent to international notoriety for advocating the disappearance of architecture
