Private Justice:

Private Justice Stuart Henry, 2015-07-30 This book first published in 1983 looks at discipline in industry and shows how private justice is integrally bound up with formal law It is a timely examination of the forms of social control that exist ostensibly outside the formal legal system but on which it crucially depends *Private Justice Towards Integrated Theorising in the Sociology of Law* will be of interest to students of law sociology and criminology Dr Stuart Henry is currently Professor and Director of the School of Public Affairs at San Diego State University where he has been since 2006 Since leaving Trent Polytechnic now Nottingham Trent University in 1983 he has held positions in the United States at Eastern Michigan University Wayne State University and the University of Texas at Arlington He is the author or editor of 30 books and over 100 articles on crime deviance and social control

The Unity of the Common Law Alan Brudner, 2013-10-03 In this classic study Alan Brudner investigates the basic structure of the common law of transactions For decades that structure has been the subject of intense debate between formalists who say that transactional law is a private law for interacting parties and functionalists who say that it is a public law serving the collective ends of society Against both camps Brudner proposes a synthesis of formalism and functionalism in which private law is modified by a common good without being subservient to it Drawing on Hegel's legal philosophy the author exhibits this synthesis in each of transactional law's main divisions property contract unjust enrichment and tort Each is a whole composed of private law and public law parts that complement each other and the idea connecting the parts to each other is also latently present in each Moreover Brudner argues a single narrative thread connects the divisions of transactional law to each other Not a row of disconnected fields transactional law is rather a story about the realization in law of the agent's claim to be a dignified end master of its body its acquisitions and the shape of its life Transactional law's divisions are stages in the progress toward that goal each generating a potential developed by the next Thus contract law fulfils what is incompletely realized in property law negligence law what is germinal in contract law public insurance what is seminal in negligence law and transactional law as a whole what is underdeveloped in public insurance The end point is the limit of what a transactional law can contribute to a life sufficient for dignity Reconfigured and expanded with a contribution by Jennifer Nadler *The Unity of the Common Law* stands out among contemporary theories of private law in that it depicts private law as purposive without being instrumental and as autonomous without being emptily formal

The Policing Web Jean-Paul Brodeur, 2010-09-30 Nearly all research devoted to policing focuses on public uniformed police and their legal use of force An overwhelming amount of this work draws on evidence from Anglo American police forces These twin emphases have led to a limited view Agencies such as criminal investigation units intelligence services private security companies and military policing organizations have almost entirely escaped scholarly attention In The Policing Web Jean Paul Brodeur looks at policing as a whole He illuminates its full diversity showing how it extends far beyond the confines of public police working in uniform and visible to all Brodeur considers military policing both when it complements the values of democracy and when it does not He also discusses criminal individuals acting as police informants and criminal organizations enforcing their own rules in urban zones deserted by the police Brodeur argues that the diverse strands of the policing web are united by a common definition that emphasizes the license granted to policing agencies legally or with impunity to use means otherwise forbidden to the rest of the population Employing an international and comparative approach Brodeur establishes a comprehensive model that links all the components of policing The policing web however is not a neat and well integrated structure There is not just one policing web There are several depending on the country police history and culture and the various public images of policing These often overlooked factors are essential components of the context of policing Wide ranging and authoritative The Policing Web expands the very idea of what policing is and how it works and presents a novel yet fundamental understanding of law enforcement

The Price of Justice Ronald Goldfarb, 2020-10-06 Attorney and literary agent Goldfarb editor After Snowden delivers a lacerating critique of inequities in America s criminal and civil justice systems and the role of lawyers in perpetuating them Legal professionals will want to take note Publisher s Weekly With foreword by Senator Bernie Sanders Real civil and criminal Justice is long overdue In The Price of Justice Money Morals and Ethical Reform in the Law veteran Washington Lawyer Ronald Goldfarb reveals the injustices in our legal system and how money and power have exceeded ethics in the legal profession for far too long Justice reform has become an increasingly present topic in the news and media with movements like I Can t Breathe and Black Lives Matter prompting national outcry from the public over the unethical actions of law enforcement and remains one of the most controversial and highly debated issues for politicians and citizens today With more than 2 million American s incarcerated it is beyond apparent that the

justice system intrinsically ensures that lower income people and minorities are shockingly under represented and offered little to no legal protection In *The Price of Justice* Goldfarb offers powerful testimonies media evidence and first hand expertise from working in the Justice Department as a longtime public interest lawyer to reveal how both the criminal and civil justice systems fail to serve lower and middle class citizens and makes an undeniable case for the profound justice reform that is so desperately needed Goldfarb asks that we examine closely a legal system that has become largely pay to play benefiting the administrators and those wealthy citizens who can afford to lawyer up and shows little mercy for the lower income citizens who fall victim to an endless cycle of conviction fines bail lack of counsel and capital punishment Goldfarb exposes a system that values money over ethics and lawyers who value winning cases over finding truth and serving justice pointing out that civil aid and public defenders are grossly under staffed and under financed making it nearly impossible to meet the challenges of well paid private lawyers This book begs the legal profession to consider it s ethical code when considering cases to represent not just represent crooks who can pay and turn away worthy clients who cannot afford absorbent fees and equips the public with the knowledge needed to advocate for justice reform

Supererogation
David Heyd,1982 David Heyd s study will stimulate philosophers to recognise the importance of the rather neglected topic of the distinctiveness of supererogation and the difficulty of accounting for it and to take a fresh critical look at their theories in the light of its singular importance

What Works for Crime Victims Alline Pedra Jorge,2021-01-26 After the Second World War the role of the victim in criminal conflict became an object of interest for academics But it was only in the 1960s that the importance of providing protection and assistance to crime victims was highlighted in particular by the victims movement which inaugurated a new era of criminal justice in systems throughout the world Moving beyond just the role of controlling crime and punishing the offender the criminal justice system also began to contribute to the victims rehabilitation and to help the victim to move on from the event psychologically and emotionally Although some criminological research was conducted on this topic the effect that the criminal justice system and victim support services have on the well being of crime victims is still uncertain The current study sought to understand the healing process of victims of crime the potential consequences of their participation on the criminal justice system and the support of victim centers Moreover it aimed to find out whether the existence of a Victim Support Act would change the treatment that the victim receives in the criminal justice system Thus this research was conducted based in two countries Switzerland and Brazil where the outcome of the victims movement on the criminal justice system was different as was the participation of the victim in the criminal justice system and the government s provision of support In order to conduct this research the qualitative method was employed which is the most efficient to gather sensitive information Interviews with crime victims were the main source of information Hearing observation and document research were used as complementary sources The results of this research show that victims who have contact with the criminal justice system and victim services are not more likely to recover than those who had no

contact This is to say the support offered has no major effects the influence of the criminal justice system and the victim support services in the emotional well being of crime victims is rather neutral However considering that the sample is not representative findings are not expected to be generalized Instead findings may give insight to practitioners or to future criminal justice policy makers suggesting what may work to improve the emotional well being of crime victims as well as suggesting further studies

Justice and Power in Sociolegal Studies Bryant G. Garth, Austin Sarat, 1998 Justice and Power in the Sociolegal Studies asks what interdisciplinary work in the law and society tradition tells us about the relationship of law and justice as well as the way power operates in and through law The fundamental concepts of justice and power provide points of departure for leading scholars to explore the various domains of socio legal research As they note the explicitness of the engagement with issues of power and the relative silence about or indirectness in taking on questions of justice found in most law and society research they ask how engagement with issues of power and silence about justice constituted law and society as a research field caught between a desire to have political impact and at the same time to maintain its scientific respectability

Michael Bohlander,2017-05-15 Genocide crimes against humanity war crimes ethnic cleansing are terms which in recent years have entered common usage The worst cases of these crimes seen in the Yugoslav secession conflict and the Rwandan slaughter resulted in attempts by the international legal community to initiate an international mechanism for establishing criminal accountability In 1998 after many States signed the Rome Statute it was expected that justice would prevail over state power and impunity be eliminated However there is a serious question mark over the effectiveness of this process That is the starting point for this collection It is not an acclamatory collection that is meant to celebrate the undoubted advances of international criminal justice The articles in the first part show the importance of comparative criminal law research to the development of international criminal justice and in the second part they deal with the foundations substantive and procedural aspects of international criminal law **Student Handbook of Criminal Justice and Criminology** John
