Private Parties In European Community Law Challenging Community Measures:

Soft Law in European Community Law Linda Senden, 2004-09-30 This book offers the first systematic investigation of the phenomenon of soft law within the framework of the EC the first pillar of the EU and its use by the European Commission and Council of Ministers It focusses upon how soft law fits into the Community legal system and how it is used and in particular how it relates to Community legislation Differentiation of the Community instruments including the instruments of soft law is often thought to enhance the effectiveness legitimacy and transparency of the Community This book asks whether soft law indeed provides a satisfactory alternative to legislation from this perspective and if so in what cases and under what conditions Furthermore the author asks to what extent the use of soft law implies good governance and throws fresh light on this very heterogeneous phenomenon by looking at frequently used instruments in many different areas of Community law such as competition law state aid environment social policy etc in the process identifying their different characteristics aims functions and legal effects What emerges is that the conditions under which soft law is used may be problematic in relation to increasing the legitimacy effectiveness and transparency of Community action This is a work which will interest legal practitioners confronted with the use of soft law and the question of its possible legal effect in an increasing number of sectors and academics interested in the vexed question of how the increased use of soft law can be justified in a Community legal order built upon the rule of law It is also critical of developments taking place within the framework of the European Convention and the proposed European Constitution and goes beyond the immediate problems of soft law to touch upon issues such as competence legal protection division of powers between the EC and the Member States institutional balance lawmaking by the Community Courts the scope of Community legal principles and the influence of soft law on the progressive development of both Community and national law

The Concept of

Legislation in European Community Law Alexander Türk, 2006-01-01 A notable trend in recent scholarship on the nature of the European Union and its democratic legitimacy focuses on the concept of legislation and its employment within the European Community's legal system. In this remarkable work of synthesis Alexander Türk exposes and elucidates the underlying uncertainty as to the meaning of the term and even its legitimate use within the Community's legal order. He arrives at a clear evaluation of the extent to which the concept of legislation can be applied in the EC through a comparative analysis of the British, French and German constitutional systems and proceeds to reveal and highlight aspects of the concept of legislation derived from this analysis appearing in areas of EC law. A number of crucially significant insights emerge among them the following: the distinction between legislation in form and legislation in substance; defining the addressee of Community acts; judicial determination of the general application of an act; the relevance of the EU's system of functional rather than personal representation; and the co-decision and assent procedures of the EU institutions as legislation in form. All those interested in the nature of the EC legal system and the state of its development will find this study richly rewarding. Building rigorously on detailed analysis of EC case law and on prior scholarship the book shows the way to a new understanding of the relevance of the concept of legislation to the solution of some of the EU's most pressing legal issues.

The Interim Protection of Individuals Before the European and National Courts Dimitrios Sinaniotis, 2006-01-01 This thesis focuses on the interim protection of the individual in the Community legal order. An analysis will be made of the avenues available to individuals for requesting interim relief when a case is brought before the European or the national courts. An extensive examination of the relevant case law will be performed to reveal what appears to be an evolving concept of the individual's interim protection in the European Community structure and to suggest any possible changes in order to guarantee an effective remedy of interim relief.

National Remedies Before the Court of Justice Michael Dougan, 2004-12-31 The Court of Justice has delivered an extensive body of caselaw concerning the obligation of domestic courts to provide effective judicial protection to claimants relying upon Community law rights including such landmark judgments as Factortame and Francovich This book offers a critical analysis of the Court's fast changing approach to national procedural autonomy and explores the difficult conceptual framework underpinning the caselaw The author demonstrates how Community intervention in the domestic systems of judicial protection cannot remain unaffected by wider debates about the evolving European integration project in particular the tension between uniformity and differentiation as competing values influencing the exercise of Community regulatory competence Because of its emphasis on an ideal of uniformity which has become increasingly untenable within the contemporary Community legal order much of the existing academic discourse about national remedies and procedural rules now seems ripe for reconsideration It is argued that the Court's jurisprudence on the decentralised enforcement of Treaty norms needs to be interpreted afresh having regard to the recent growth of regulatory differentiation within the Community system National Remedies Before the Court of Justice provides a challenging account of this crucial field of EU legal studies It includes detailed discussion of issues such as Member State liability in damages Community control over national limitation periods and the principles governing state aid and competition law enforcement This book is of value to academics and practitioners alike

The Engines of European Integration Mark A. Pollack, 2003 This study of delegation and agency in the European Union examines the role of supranational actors like the Commission the Court of Justice and the European Parliament in the process of European integration and in contemporary EU governance

Judicial Control in the European Union Alicia Hinarejos Parga, 2009 The EU's activity under its intergovernmental pillars The Common Foreign and Security Policy and Justice and Home Affairs has traditionally been beyond the scope of judicial control offered by the central EC legal system The increasing importance of this activity and its growing intrusion into the lives of individuals has led to a sense that the level of judicial oversight and protection is insufficient and that the constitutional

balance of the Union stands in urgent need of reform While the need for reform is widely recognised wholesale constitutional change has been stalled by the failure to ratify the Constitutional Treaty and the delay in ratifying the Treaty of Lisbon This book charts the attempts to develop more satisfactory judicial control over the intergovernmental pillars in the face of such constitutional inertia It examines the leading role played by the European Court of Justice in reforming its own jurisdiction and analyses the ECJ's development as a constitutional court in comparison with more established constitutional adjudicators Throughout the book the current constitutional position is compared extensively to the reforms introduced by the Treaty of Lisbon offering a timely snapshot of the EU's federal structure in a state of flux

Judicial Review in EU Law Alexander H. Türk, 2010-01-01 Judicial review constitutes an important aspect of any legal system operating under the rule of law This book provides a comprehensive account of judicial review in EU law by assessing the vast and complex case law of the European Court of Justice ECJ in this area and the academic opinion which has accompanied its rulings over the years It questions the prevalent view in academic literature that the Court's restrictive approach to allowing individuals direct access to the Community Courts in case of a challenge against normative acts amounts to a denial of an effective remedy The author argues that the emerging constitutional nature of the European Union and its federal structure requires a more balanced view While it will improve direct access for individuals to the Union's judiciary the Lisbon Treaty will not radically alter the system of judicial review in the European Union Judicial Review in EU Law will be of great interest to academics and given its detailed discussion of case law of the ECJ it will also appeal to postgraduate students of European law Dealing with an important aspect of legal practice it will be invaluable reading for practitioners in law firms and officials working in local regional and central government

The EU and Human Rights Philip Alston, Mara R. Bustelo, James Heenan, 1999 For all its achievements in integrating Europe the EU lacks a human rights policy which is coherent balanced and professionally administered Whether in relation to access to Community justice sex equality race and disability discrimination or policing or

in its external policies from Kosovo to China the Union needs new principles procedures and institutions to design and implement an effective set of human rights policies The introduction of a single currency the problems of racism and xenophobia the need for a humane refugee policy the growing powers of the EU in many fields and the Unions imminent eastward expansion all make it urgent to adopt such policies In this volume the leading experts in the field including individuals from every EU country provide an insightful critique of current policies and detailed recommendations for the future The volume includes comprehensive analyses of the competencies of the EU in human rights access to justice the Third Pillar Research Handbook on Cross-Border Bank Resolution Matthias Haentjens,Bob Wessels,2019 Since 2008 many countries across the globe have witnessed the introduction of new recovery and resolution regimes for banks Whereas much may have been achieved on regional levels this has not been perfect and many global challenges remain unsolved The Research Handbook on Cross Border Bank Resolution analyses the strengths and weaknesses of the current regulatory framework for cross border bank crises with contributions from eminent experts from the US EU Japan and China The topic is addressed from both economic and legal perspectives with a special section devoted to real life cases **No Citizens Here: Global Subjects and Participation in International Law** René Urueña,2012-03-23 International legal scholarship has traditionally celebrated the possibility of individuals being considered as subjects of international law This book challenges that narrative and reveals hidden patterns in the way we think about legal subjects in global governance Building on the notion of a risk society this book argues that international law creates fragmented subjectivities whose conflicting identities help perpetuate a certain global loss of sense that is characteristic of our times An innovative contribution that draws on a wealth of international legal materials including human rights EU law international economic law and international organizations this book is useful to those with an interest in international legal theory new approaches to international law global constitutionalism and global administrative law *EU Counter-Terrorist Policies and Fundamental Rights* Christina Eckes,2009-12-10 Of individual sanctions could comply with general principles of EU law Readership Academics graduate students and practitioners interested in sanctions against individuals *The Italian Influence on European Law* Daniele Gallo,Roberto Mastroianni,Fernanda G.
