On Depiction: Selected Writings on Art Avigdor Arikha, 2019-08-25 A marvellous book which teaches us how to see There is not a word out of place And the author's seriousness allows us to feel his full passion what really matters for him This book will provide me lasting company and I will often look in its pages for backing for my own judgements

Jean Starobinski When a great painter also happens to be an intelligent and cultivated one his observations on art count a hundred times more than a critic's or a historian's do A man's knowledge of his own craft is both irreplaceable and indispensable

Simon Leys Throughout his whole development I have never ceased to admire the acuteness of his vision and his faultless insight into the art of the past

Samuel Beckett Avigdor Arikha was one of the most important artists of the twentieth century He was born in Romania to German speaking Romanian Jewish parents and spent most of his life in Paris A talented child he started drawing early on During the Second World War he was deported to a concentration camp in the Ukraine where he drew the horrors he witnessed These drawings saved his life During the 1950s he established himself in Paris and was enjoying a successful career as an abstract painter In 1965 a Caravaggio exhibition prompted him to convert to drawing from life He stopped using colour until 1973 when he started again to paint He worked with a religious almost war like intensity until his death Arikha was also an erudite and passionate scholar endowed with a deep understanding of the history of art and its techniques well versed in world history and fascinated by science He wrote many essays and curated important exhibitions of masters such as Poussin Velazquez and Ingres In this collection of essays that he wrote between 1965 and 1994 Arikha expounds on art and artists Mantegna Velazquez Poussin David Ingres Degas Matisse and more technique seeing and the state of culture in his day which one could argue is no more hopeful today almost thirty years later

The Grammar of the Machine Edward Stevens, 1995-01-01 During the late eighteenth and early nineteenth centuries the American economy moved toward a manufacturing base and mass production creating a demand for a literacy that encompassed not only the traditional alphabetic form of expression but also scientific and mathematical notation and spatial and graphic representation How did

the world of learning respond to this demand What kinds of educational institutions teachers textbooks and patterns of instruction emerged Edward Stevens Jr describes the important technological changes that took place in antebellum America and the challenges they posed for education Investigating the instruction curricula and textbooks used in the common schools in the mechanics institutes and specifically at the Troy Female Seminary and the Rensselaer School in upstate New York he demonstrates how advocates of technical literacy attempted to teach new skills Stevens shows that the tensions between the liberal and the vocational between a culture of print and a nonverbal culture of experience persisted in technical education through the first half of the nineteenth century but were resolved temporarily by a common moral vision

The Birthright Lottery Ayelet Shachar, 2009-04-30 The vast majority of the global population acquires citizenship purely by accidental circumstances of birth There is little doubt that securing membership status in a given state bequeaths to some a world filled with opportunity and condemns others to a life with little hope Gaining privileges by such arbitrary criteria as one's birthplace is discredited in virtually all fields of public life yet birthright entitlements still dominate our laws when it comes to allotting membership in a state In The Birthright Lottery Ayelet Shachar argues that birthright citizenship in an affluent society can be thought of as a form of property inheritance that is a valuable entitlement transmitted by law to a restricted group of recipients under conditions that perpetuate the transfer of this prerogative to their heirs She deploys this fresh perspective to establish that nations need to expand their membership boundaries beyond outdated notions of blood and soil in sculpting the body politic Located at the intersection of law economics and political philosophy The Birthright Lottery further advocates redistributive obligations on those benefiting from the inheritance of membership with the aim of ameliorating its most glaring opportunity inequalities

The Luck of the Draw Peter Stone,2011-04-15 From the earliest times people have used lotteries to make decisions by drawing straws tossing coins picking names out of hats and so on We use lotteries to place citizens on juries draft men into armies assign students to schools and even on very rare occasions select lifeboat survivors to be eaten Lotteries make a great deal of sense in all of these cases and yet there is something absurd about them Largely this is because lottery based decisions are not based upon reasons In fact lotteries actively prevent reason from playing a role in decision making at all Over the years people have devoted considerable effort to solving this paradox and thinking about the legitimacy of lotteries as a whole However these scholars have mainly focused on lotteries on a case by case basis not as a part of a comprehensive political theory of lotteries In The Luck of the Draw Peter Stone surveys the variety of arguments proffered for and against lotteries and argues that they only have one true effect relevant to decision making the sanitizing effect of preventing decisions from being made on the basis of reasons While this rationale might sound strange to us Stone contends that in many instances it is vital that decisions be made without the use of reasons By developing innovative principles for the use of lottery based decision making Stone lays a foundation for understanding when it is and when it is not appropriate to draw lots when making political decisions both large and small
