Quotations as Pictures

Josef Stern, 2022-02-15 The proposal of a semantics for quotations using explanatory notions drawn from philosophical theories of pictures In Quotations as Pictures Josef Stern develops a semantics for quotations using explanatory notions drawn from philosophical theories of pictures He offers the first sustained analysis of the practice of quotation proper as opposed to mentioning Unlike other accounts that treat quotation as mentioning Quotations as Pictures argues that the two practices have independent histories that they behave differently semantically that the inverted commas employed in both mentioning and quotation are homonymous that so called mixed quotation is nothing but subsentential quotation and that the major problem of quotation is to explain its dual reference or meaning its ordinary meaning and its metalinguistic reference to the quoted phrase attributed to the quoted subject Stern argues that the key to understanding quotation is the idea that quotations are pictures or have a pictorial character As a phenomenon where linguistic competence meets a nonlinguistic symbolic ability the pictorial quotation is a combination of features drawn from the two different symbol systems of language and pictures which explains the exceptional and sometimes idiosyncratic data about quotation In light of this analysis of

verbal quotation in the last chapters Stern analyzes scare quotation as a nonliteral expressive use of the inverted commas and explores the possibility of quotation in pictures themselves *Data Mining for Social Network Data* Nasrullah Memon, Jennifer Jie Xu, David L. Objects and Attitudes Friederike Moltmann, 2024 *Objects and Attitudes* develops a radically novel semantics of attitude reports modal sentences and quotation based on an ontology of attitudinal modal and phatic objects entities such as claims thoughts intentions desires requests utterances as well as needs obligations permissions offers and abilities It systematically pursues a methodology of descriptive metaphysics specifically natural language ontology and argues that natural language reflects an ontology of attitudinal and modal objects rather than an ontology of abstract propositions The book gives a new development of truthmaker semantics object based truthmaker semantics for which attitudinal and modal objects provide specific support The semantics of attitude reports modal sentences and quotation pursues the emerging view that clausal complements do not generally act as proposition referring terms but rather as predicates of the content bearing object described by the embedding predicate It also develops novel truthmaker based conceptions of facts and states of affairs the referents of clauses on a secondary nominal function *Objects and Attitudes* pursues the syntactic view that attitude verbs are underlying complex predicates consisting of a light verb and a noun for an attitudinal object Within that view it gives a new syntactic and semantic analysis of special quantifiers something several things as complements of attitude verbs and verbs of saying on which such quantifiers range over attitudinal or phatic objects **ANALYTICAL MOTIVATIONAL AND**

Truth-Conditional Pragmatics Xiaofei Wang,2017-12-22 In the past decades quotation theories have developed roughly along three lines quotation types meaning effects and theoretical orientations toward the semantics pragmatics distinction Currently whether the quoted expression is truth conditionally relevant to the quotational sentence and if there is a truth conditional impact whether it is generated via semantic or pragmatic processes have become the central concerns of quotation studies In this book quotation is clearly defined for the first time as a constituent embedded within yet distinctive from the quotational sentence Also as the first monograph to address the semantics pragmatics boundary dispute over quotation it argues that the semantic content of quotation amounts to its contribution to the intuitive truth conditional content of the quotational utterance via two modes of presentation which are incarnated in the functioning of quotation marks and manifested as use and mention The use mention based analysis in this book can shed light on the semantic theorizing of other metalinguistic phenomena while the semantics pragmatics perspective will provide methodological implications for other relevant studies The new conception of quotation and thought provoking analysis on use mention truth conditional pragmatics and the semantics pragmatics boundary in this book will appeal to scholars and students in philosophy of language and linguistics It will also serve as a clear guide to the current state of quotation studies and how to formulate a semantic theory of quotation Louisiana Planter and Sugar Manufacturer ,1927 **Powerful Attitudes for a**
