Exploring the Role of Responsible Leadership in Business and Industry

Moiz Lalani, 2014 The study of responsible leadership is in infancy stage There is a huge demand for further understanding on responsible leadership but most responsible leadership dimensions remain under researched According to a common understanding among researchers responsible leadership addresses both the existing gap in leadership theory as well as its practical challenges Research indicated the need for more lucidity to the definition of responsible leadership the values and behaviors of responsible leaders the drivers of responsible leadership and who should be included in the network of leader stakeholder relationships This qualitative descriptive research study explored the role of responsible leadership by seeking clarity into the above areas and developing concepts and paradigms for preventing unethical business practices using responsible leadership and the development and implementation of responsible leadership in business and industry The research data were collected through an online questionnaire via the Fluid Surveys website filled by eight diverse community members and recorded telephone interviews with three business leaders and five MBA graduates The data were coded axially into different themes and subthemes using Microsoft Excel software and qualitative analysis techniques of keyword in context KWIC and word counts This research did not attempt to come up with any definitive answers but provided further insight and information on the emerging field of responsible leadership as a research interest

Good Dividends Steve Kempster, Thomas Maak, Ken Parry, 2019-02-14 This book seeks to answer the question of leadership for what We shall outline an answer by focusing on responsible leadership of purpose through an inter disciplinary perspective Responsible leadership moves the axis of leadership from leader followers to leader stakeholders away from looking at leadership as person centric the qualities abilities and effectiveness of the leader to a focus on the purposes responsibilities and activities of leadership Leadership orientation is about realising value for a range of constituencies not just the shareholders of the business In this way this book offers up an alternative business model to that of dominant neo liberal approaches to capitalism and its flow on effect to the leadership project This is a model that draws on a most obvious assumption if leaders maximise the use of all the capitals of their business they will maximise their dividends and thus deliver their responsibility to the shareholders as well as other relevant stakeholders This book explores how five dividends based on five capitals can be developed through attention to a sixth dividend and sixth capital the dividend from our planet and communities The planetary dividend is the flourishing of humanity but it is also a significant dividend to the business For example by engaging the business in a purpose led orientation to enhance the planetary dividend the dividend from human resourcefulness becomes manifest employee sense of purpose commitment passion and energy The realisation of such can also connect with dividends from innovation operations and brands For example the business benefits from a purpose driven brand In short responsible leadership of purpose outlines a case for leadership to focus on a connected portfolio of good dividends as an answer to the question leadership for what The book is written by academics and organisational leaders It draws on a range of research with leaders

from a variety of contexts to illustrate the challenges but also the benefits of this argument It is an ambitious book ambitious in terms of moving leadership towards realising purpose ambitious by seeking to align a range of business disciplines around responsible leadership and ambitious because it challenges the dominant assumptions that shape business leadership However it is based on a simple question why would a business not wish to generate good dividends for all its stakeholders

The Responsible Leader Tim Richardson, 2015 Responsibility as a leader is the ability to respond quickly to a complex and changing business environment It means using values to make decisions that not only affect brand trust and corporate reputation but impact upon employees and the wider community In today's increasingly interconnected world it is more important than ever that managers can achieve goals and desired results while still maintaining a degree of authenticity ethics and stewardship The Responsible Leader identifies what it means to be an authentic leader taking in intra organizational relationships role modelling and ethical practice Addressing the practical challenge of implementing a framework of corporate social responsibility in an organization that may embrace thousands of people The Responsible Leader sets out what this strategy looks like in practice and advises on creating a new and hopeful narrative for the future Drawing on in depth case studies from HSBC PwC Oasis and Marks and Spencers that chart the journey to responsible and sustainable management in challenging environments it presents a fresh vision for leadership success that goes beyond simple compliance

Responsible Leadership Nicola M. Pless, Thomas Maak, 2012-11-27 These chapters on Responsible Leadership represent the latest thinking on a topic of increasing relevance in a connected world There are many challenges that still remain when it comes to establishing responsible leadership both in theory and practice Whilst offering conceptualisations for the improvement of leadership is a first and perhaps easier response what is more difficult is to facilitate the actual change to happen These chapters will not only generate interest in the emerging domain of studies on responsible leadership but also will pave the way for future research in this area in the years to come Previously Published in the Journal of Business Ethics Volume 98 Supplement 2 2011
