Behavioral Aspects of AIDS David G. Ostrow, 2013-06-29 As we enter the last decade of the twentieth century the AIDS epidemic looms ever larger and threatening The specter of upwards of a million deaths in the United States and perhaps many millions worldwide from a sexually transmitted virus shakes our belief in modern medical science while challenging the foundations of democratic society Almost ten years into the epidemic and with an enormous body of basic science research on the Human Immunodeficiency Virus HIV we still do not know why AIDS emerged when it did or how to stop its spread A very humbling experience for scientists clinicians public health experts politicians and the general public Yet there are signs that a well coordinated multidisciplinary research program can conquer the epidemic and perhaps provide the basis for preventing future epidemics The HIV family of viruses is now better understood both in terms of structure and function than any other virus Genetically engineered peptides and nucleic acids are being tested as specific treatments or vaccines against HIV infection disease Most promising are the strides which have been made in understanding those aspects of human behavior which have contributed to the spread of HIV infection and which must be substantially modified if AIDS is to be controlled and eventually eradicated The basis of that understanding has roots in a diverse set of disciplines which have converged in the work presented in this book

Macho Love Jacobo Schifter, 2014-01-14 *Macho Love* Sex Behind Bars in Central America is the first in depth study of sexual culture and AIDS in Latin prisons Psychologists social workers criminologists and AIDS specialists will discover how the interplay of sexual ideals prostitution manipulation resistance and power relationships among prisoners and some staff are based on money sex drugs and violence *Macho Love* gives you a stirring and emotional look at the various risks and dangers lurking in the Latin American prison culture and discusses how Costa Rican and Central American prisons are improving the situation with new intervention programs Fascinating and informative *Macho Love* explores the dangerous Latin prison culture as it discusses new HIV AIDS prevention programs implemented in some Costa Rican and Central American prisons the frequency and types of prostitution and rape in prison drug and alcohol addiction and their effects on the spread of HIV AIDS an understanding of why rehabilitation programs fail or succeed the lack of opportunities to work or to study that leaves the inmates vulnerable to the only freedom they have left sex why a cachero or a man who penetrates another man is not considered a homosexual and often refuses to wear a condom which tremendously increases the risk of HIV AIDS *Macho Love* explores the life threatening sexual culture in prisons to bring you the realities of the Latin prison culture This revealing book examines the different types of relationships which occur in prisons and the factors that place inmates at risk for contracting the HIV virus such as not wearing a condom because of intoxication due to drugs and alcohol *Macho Love* also shows you how the new HIV AIDS intervention programs in Costa Rica are combatting these serious problems to lower HIV infection rates and avoid the spread of this deadly and dangerous disease

Male Homosexual Behavior and the Effects of AIDS Education B R Simon Rosser, 1991-11-30 Since the AIDS epidemic was recognized information on safer sex has been assumed to be the most crucial means of preventing further spread of the disease But how well has AIDS education worked What kinds of education work best and for whom This study is the first to provide an in depth analysis of the results of AIDS education programs and to explore the psychosocial factors that affect behavioral responses to education B R Simon Rosser provides a detailed profile of a specific population at risk including factors such as sexual behavior psychology religious affiliation legal status and discrimination Using comparative measures of behavior personality social status attitudes and risk taking he identifies important differences between homosexual men who engage in safer sex and those who do not Finally he evaluates the impact of different

approaches to AIDS education Examining both positive and negative effects Rosser shows that the spread of the HIV virus was actually accelerated by a national education campaign utilizing fear and contrasts this result with four international gay sensitive education campaigns that produced positive changes in behavior and lifestyle He discusses ways in which AIDS education must develop in order to become more effective together with crucial changes that are needed in both the gay population and the larger community if HIV transmission is to be halted This study is a valuable resource for education and research in AIDS prevention sexual behavior psychovenereology education health and related disciplines **McCary's Human Sexuality** James Leslie McCary, Stephen P.
