Entrepreneurship in the Informal Economy Mai Thi Thanh Thai, Ekaterina Turkina, 2013 Although entrepreneurship in the informal economy occurs outside state regulatory systems informal commercial activities account for an estimated 30% of economic activity around the world Informal entrepreneurship goes unmonitored despite the fact that it significantly contributes to poverty reduction and economic development As a result the informal sector is open to unethical practices including corruption worker exploitation and natural environment abuse to name just a few In the media debates have formed around whether informal entrepreneurship

Uncertainty doubt about what is or could be fuels our ambitions and fears Tantalizing possibilities spur us to innovate and explore Yet we also strive to reduce uncertainty Mountain climbers and deep sea divers plan carefully Rules routines and research in business the law and medicine are designed to increase predictability and forestall unpleasant surprises Mainstream economics however hides from uncertainty banishing it to the mystical world of unknown unknowns or reducing it to mechanistic calculation Its textbooks ignore everyday problems that lack demonstrably correct solutions But resolute responses to such problems require confidence Where does confidence come from especially when we go beyond the known How do we justify our fallible judgments to ourselves and others Drawing on more than thirty years of teaching and research Amar Bhidé offers compelling answers Inspired by while modernizing the forgotten ideas of the economist Frank Knight and other great twentieth century thinkers Bhidé challenges both hyper rational economic orthodoxy and claims of pervasive behavioral biases He shows that

while big bets require more justification the facts alone don't persuade skeptics. Instead, narratives that combine reason, contextual evidence, and creative interpretations align our imaginations. Bhid's framework and rich examples explain neglected and surprising features of entrepreneurship. He shows how startups and giant corporations coexist, how seemingly bureaucratic procedures encourage the giants to undertake complex, high-stakes initiatives, and how vividly described possibilities help make the imagined real. Cutting through esoteric theories but avoiding glib prescriptions, *Uncertainty and Enterprise* examines the foundations of bold yet reasonable action. **The Industrial Policy Revolution I** Justin Lin Yifu, 2013-12-16 This volume is the result of the 2012 International Economic Association's series of roundtables on the theme of Industrial Policy. The first *New Thinking on Industrial Policy* was hosted by the World Bank in Washington D.C. and the second *New Thinking on Industrial Policy: Implications for Africa* was held in Pretoria, South Africa. **OECD Territorial Reviews: The Metropolitan Region of Rotterdam-The Hague, Netherlands** OECD, 2016-02-01 This report examines the Netherlands' new Metropolitan Region of Rotterdam-The Hague MRDH, drawing on lessons from governance reforms in other OECD countries and identifying how the MRDH experience could benefit policy makers beyond Dutch borders. **The Capacity to Innovate** Sarah Giest, 2021-04-07 In *The Capacity to Innovate*, Sarah Giest provides insight into the collaborative and absorptive capacities needed to provide public support to local innovation through cluster organizations. The book offers a detailed view of the vertical, multi-level and horizontal dynamics in clusters and cluster policy and addresses how they are managed and supported. Using the biotechnology field as an example, Giest highlights challenges in the collaborative efforts of public bodies, private companies, and research institutes to establish a successful ecosystem of innovation in this sector. The book argues that cluster policy in collaboration with cluster organizations should focus on absorptive and collaborative capacity elements missing in the cluster context in order to improve performance. Currently, governments operate at different levels from the local to the supranational in order to support clusters, and cluster policies are often pursued alongside other programs, leading to uncoordinated efforts and ineffective cluster strategies. *The Capacity to Innovate* advocates for a coordinated effort by government and cluster organizations to support capacity elements lacking within the specific cluster context. **Incentivising Angels** Stephen Barkoczy, Tamara Wilkinson, 2019-04-24 This book examines tax incentives for investors in start-up companies through a critical analysis of Australia's early-stage investors' ESI program and a comparison of that program with the United Kingdom's Seed Enterprise Investment Scheme (SEIS), upon which it is loosely modelled. It discusses the importance of innovation and the special role that venture capital plays in supporting start-ups and explains the policy rationale for introducing the ESI program as well as dissecting its technical requirements in detail. Special attention is devoted to the program's early-stage and innovation requirements, which are crucial for determining whether a start-up qualifies for the tax incentives. The book is the first in-depth scholarly legal analysis of the ESI program and the first occasion it has been compared and contrasted with a foreign program. The comparative discussion of

the ESI program with the SEIS program enables the authors to make suggestions for reforms to the ESI program so that it can better achieve its policy objectives The fact that the book includes reform suggestions makes it particularly interesting for policy makers It is also of broad relevance to legal and finance scholars and students as well as entrepreneurs angels venture capitalists and their advisors *Venture Capital Law in China* Lin Lin,2021-02-18 Provides an in depth comparative empirical and critical analysis of the law and practice of venture capital in China Private Equity and Financial Development in Latin America Ignacio Puente,2022-02-01 Shallow capital markets are a key bottleneck for private sector development in Latin America Still there is not a large literature on capital markets and corporate governance or on the politics of regulatory reform and business associations focused on this region To help address this gap this new book introduces private equity into the financial development debate through a Latin American lens The author looks at the cases of Brazil Mexico Chile Colombia and Argentina And proposes a shift in the financial development discussion from institutional explanations focused only on rules to an actor based argument centered on the role of institutional investors in particular pension funds Theory and Practice in Policy Analysis M. Granger Morgan,2017-10-12 Many books instruct readers on how to use the tools of policy analysis This book is different Its primary focus is on helping readers to look critically at the strengths limitations and the underlying assumptions analysts make when they use standard tools or problem framings Using examples many of which involve issues in science and technology the book exposes readers to some of the critical issues of taste professional responsibility ethics and values that are associated with policy analysis and research Topics covered include policy problems formulated in terms of utility maximization such as benefit cost decision and multi attribute analysis issues in the valuation of intangibles uncertainty in policy analysis selected topics in risk analysis and communication limitations and alternatives to the paradigm of utility maximization issues in behavioral decision theory issues related to organizations and multiple agents and selected topics in policy advice and policy analysis for government **Igniting Innovation** Itzhak Goldberg,John Gabriel Goddard,Smita Kuriakose,Jean-Louis Racine,2011-09-22 Innovation and technology absorption are now firmly recognized as one of the main sources of economic growth for emerging and advanced economies alike International R D collaboration and FDI are critical and require government support programs specially financial ones *Entrepreneur* ,1995 *Evolving properties of intellectual capitalism* Ove Granstrand,2018 Intellectual capitalism is evolving driving and driven by technological innovations and various forms of entrepreneurship The purpose of this eagerly anticipated book is to analyze the linkages between R D patents innovations entrepreneurship and growth Based on a large array of national empirical and policy studies it elaborates on a comprehensive range of innovation and IP issues that are pertinent not only to Europe but to the world as a whole These issues include the role of patents and licensing in the governance of technology and innovation and the various uses and abuses of patents It further elaborates on new IP phenomena in an increasingly patent intensive world with patent rich multinationals and patent savvy new entrants from Asia

In a world facing challenges that call for innovative responses the book contains a set of valuable policy recommendations for strengthening innovativeness for economic growth and ultimately for social value creation *How Silicon Valley Unleashed Techno-feudalism* Cédric Durand,2025-10-21 The promise of the new economy gone we have regressed into the age of techno feudalism The rise of the IT industry in the nineties promised a new era of freedom and prosperity It didn t deliver Today algorithms are everywhere but digital monopolies push us towards the feudal logic of rent dispossession and personal domination How Silicon Valley Unleashed Techno feudalism tears apart the Silicon Valley consensus to reveal the new economic order in which capital has abandoned production to focus on predation The Decade of the Multilatinas Javier Santiso,2013-04-25 Latin American multinationals multilatinas have been central in the rise of emerging markets in the last few decades Their development comprises part of the global shift of wealth and power between nations The rise of firms in a broad range of sectors including construction oil telecommunications and the aeronautical industry as important regional and global players is spreading companies in Brazil Mexico Colombia Chile and many others are part of this increasing phenomenon This book analyses the trends the countries and the firms involved and explores the implications for the US China Spain and the rest of Europe In particular Javier Santiso examines how Spain might profit from positioning itself as a unique hub between Europe and Latin America The Decade of the Multilatinas includes a wide range of statistical data which will be useful to scholars policymakers and commentators on Latin America in particular and international business and emerging markets more generally
