Shadow Clock:

Sticks, Stones, and Shadows Martin Isler, 2001 What do the pyramids of Egypt really represent What could have driven so many to so great and often so dangerous an effort Was the motivation religious or practical Illustrated with more than 300 photographs and drawings this book presents an original approach to the subject of pyramid building It reveals the connection between devices that served both a practical need for survival and a spiritual belief in gods and goddesses It examines Egyptian technologies and techniques from the origins of pyramid development to the step by step details of how the ground was leveled how the site was oriented and how the stone was raised and placed to meet at a distant point in the sky Here the author also asks and answers questions virtually ignored for the last century He discloses for example the ancient use of shadows now denigrated to the ornamental back yard sundial but once an important tool for telling the height of an object geographical directions the seasons of the year and the time of day He also reinterprets the ancient stretching of the cord ceremony which once was thought to have only religious significance but here is shown as the means of establishing the sides of a pyramid

Beyond Silvia Zago,2022-02-01 This volume offers the first comprehensive overview of the evolution over time of a foundational concept of the Egyptian afterlife beliefs the Duat or netherworld The Duat is a complicated multifaceted notion which was never canonized into a single version of the beyond but offered instead a variety of alternatives attempting to describe the metaphysical realms beyond the visible world and beyond life Theological speculations gave rise to a rich textual and visual repertoire which underwent a process of evolution over thousands of years during which newer ideas and images were constantly introduced Through the analysis of royal and non royal funerary texts from the late Old Kingdom to the end of the New Kingdom this book traces the development of the conceptualization of the notion of Duat outlining what it encompassed and where it was imagined to be located In addition to the translation and discussion of the most significant passages of the texts analyzed each chapter also provides an overview of the individual compositions and of the relevant theological cosmological and astronomical notions complementing the conceptual framework of which the Duat formed but a part Additionally discussions of concurrent changes in Egyptian culture society and ideology are included in order to clarify the context in which afterlife beliefs and related texts evolved An analysis of the correlation between funerary compositions and their material supports complements the study emphasizing the Egyptians belief in a magical synergy between texts images and their contexts in the activation of a suitable effective afterlife for the recipients of the texts **How STEM Built**
