Number Synchronicity A Beacon of Light for the Souls Journey stands as a definitive exploration of a phenomenon affecting millions of people around the world In exploring the inexplicable it becomes necessary to go beyond the amusement of numerology books that show how to gain insight from numbers in a name or birth date Plenty of good books for that already exist Bridging the gap between scientific objectivity and outrageous speculation Number Synchronicity maintains the middle path In pursuit of the truth seemingly separate threads weave the fabric of a new understanding Abundant facts and convincing evidence equate number synchronicity to a beacon of light in a storm providing guidance and comfort during times of chaos transition and uncertainty

### **Space Travelers and the Genesis of the Human Form**

Joan D'Arc,2000

Can Darwinian evolution actually prove that we are alone in the Universe This book illustrates that Darwinian evolution is not an empirically predictable or testable scientific paradigm Also shows that ancient artifacts on Mars and the Moon are evidence of Game Wardens in our own solar system Could the Earth be a controlled DNA repository for the ongoing creation and dissemination of life forms including humans The author puts forth compelling evidence in this well researched work

### Ecomysticism

Carl von Essen,2010-10-19 Explores the philosophy science and spirituality of nature mysticism and its Green calling Offers a solid bridge between spiritual practice and environmental activism Reveals how we can heal the environment by renewing our connection to it Shows how spiritual encounters in nature are healing the Nature Deficit Disorder of our psyches and bodies Many have been struck by a majestic moment in nature a sole illuminated flower in a shady grove an owl swooping silently across a wooded path or an infinitely starry sky and found themselves in a state of expanded awareness so profound they can feel the interconnectedness of all life These trance like moments of clarity unity and wonder often incite a call to protect and preserve the earth to support Nature as she supports us Termed nature mysticism people from all cultures have described such experiences However the ever increasing urbanization of the world s population is threatening this ancient connection as well as the earth itself In Ecomysticism Carl von Essen explores nature mysticism through the recorded experiences of outdoor enthusiasts as well as scientific studies in biology psychology and neuroscience Citing consciousness scholar William James and a variety of well known nature lovers such as Ansel Adams Henry David Thoreau and Ralph Waldo Emerson von Essen shows how the spiritual transcendence from an encounter in nature like other mystical experiences is healing the Nature Deficit Disorder of our psyches and bodies leading to an expansion of our worldview and a clearer understanding of our self and of our natural world Offering a solid bridge between spiritual practice and environmental activism von Essen s spiritual ecology reveals how only through a renewal of humanity s spiritual connection to nature can we effect true environmental healing

### **Phenomenal World**

Joan D'Arc,2000-11

For centuries mankind has been exploring the nature of reality The materialistic scientific worldview would have us believe that physically measurable phenomena are

all that exist Yet the answers to the key of reality go far beyond this mindset This book explores the clues we have about the nature of reality especially those aspects that cannot yet be proven If we can understand the most baffling aspects of reality then we will move closer toward understanding its ultimate cause and nature     The New Testament as True Fiction Douglas Templeton,2004-11-24 An original provocative and thoughtful series of readings of the New Testament and extra biblical texts Making forays into literary criticism philosophy and theology Templeton draws upon a rich diversity of sources He proposes that we read the New Testament not as history true or false in what is still the dominant hermeneutic but rather as true fiction     **The Encarta Book of Quotations** Bill Swainson,2000-09-30 Here are 25 000 quotations drawn from the history politics literature religions science and popular culture of the world ranging from the earliest Chinese sages through Shakespeare to the present day     **Does it Matter?** Graham Dunstan Martin,2005 Materialists claim that the mind consciousness life evolution and the universe can be explained as the purposeless dance of unconscious particles governed by chance This books asks does materialism make sense Graham Dunstan Martin delves into areas as diverse as quantum physics cosmology artificial intelligence brain science biology mysticism and philosophy to assess the probabilities that the materialists are right Are we he asks living souls Does our universe in fact have a Designer He concludes that computers will never become conscious that the mind is not the same as the brain that we genuinely and creatively possess free will and that our experience of diverse levels of consciousness simply cannot be explained by materialism This book is for all enquiring minds who are dissatisfied with the current reigning creed     Resurgence ,1996     New Comparison ,1993     *Living on Purpose* Graham Dunstan Martin,2008 Living On Purpose addresses several large issues including the problem of evil the mystery of the afterlife and evidence for a spiritual dimension to human experience Ultimately the author insists that our human intuitions offer genuine hope of a moral and rational order in the universe     Forthcoming Books Rose Arny,1997-04

Robbin,2008-10-01 In this insightful book which is a revisionist math history as well as a revisionist art history Tony Robbin well known for his innovative computer visualizations of hyperspace investigates different models of the fourth dimension and how these are applied in art and physics Robbin explores the distinction between the slicing or Flatland model and the projection or shadow model He compares the history of these two models and their uses and misuses in popular discussions Robbin breaks new ground with his original argument that Picasso used the projection model to invent cubism and that Minkowski had four dimensional projective geometry in mind when he structured special relativity The discussion is brought to the present with an exposition of the projection model in the most creative ideas about space in contemporary mathematics such as twistors quasicrystals and quantum topology Robbin clarifies these esoteric concepts with understandable drawings and diagrams Robbin proposes that the powerful role of projective geometry in the development of current mathematical ideas has been long overlooked and that our attachment to the slicing model is essentially a conceptual block that hinders progress in understanding contemporary models of spacetime He offers a fascinating review of how projective ideas are the source of today s most exciting developments in art math physics and computer visualization

*Human-Earth Expressions on Integrative Health and Our Environment* Shelley R. Noble-Letort,2021-05-07 A lost art and science of medicine which may have begun evolving out of the cave more than 10 000 years ago is resurfacing and reforming into a new map of medicine that is transforming contemporary patient care This book unearths and transfigures human earth expressions of healing through the exploration of metaphorical and symbolic images of caves revealed as recurrent symbols for mental states and physical environments These caves of healing are introduced as the caves of the human body caverns of heart and brain and the caves of the earth body caverns within below and above the earth which expand across cultures ancient and modern shamanic and alchemical initiatory and technological intuitive and inventive and imaginal and scientific A mythological map is unfolded for navigating the relationship between the mind and the body and healthcare and our environment which invites a deeper more integrative dialogue into much needed philosophical ethical and political discussions The idea that the force of health is a force of Nature that becomes a fulcrum for healing is clarified here as a possibility for a new medicine for the 21st century called Integrative Health which advances not only ancient and modern technologies but also education policy research and clinical care by promoting the empowerment of personal responsibility prevention of disease continuity of care and compassionate engagement between patients and healthcare practitioners This
