Cinematic Encounters with Disaster Simon R. Troon,2024-06-13 Cinematic Encounters with Disaster takes Hollywood's disaster movies and their codified versions of natural disaster post apocalyptic survival and extra terrestrial threat as the starting point for an analytical trajectory that works toward new understandings of how cinema shapes and informs our conceptions of disaster and catastrophe It examines a range of films from distinct regional and industrial contexts Hollywood indie movies different kinds of documentaries from the US and elsewhere and auteurist realist cinema from Europe and Asia Moving across and beyond critical and industrial categories that often inform thinking about cinema this book contends that different approaches to film style can push us to imagine disaster in distinct ways with distinct ethical connotations Framed by contemporary concerns around the global climate crisis and the advent of the Anthropocene questions about how films can best offer responses to historical exigency guide the book's explorations of spectacular 2010s blockbusters like Gravity 2013 and San Andreas 2015 environmental documentaries including the paradigmatic An Inconvenient Truth 2006 post disaster films by auteurs including Abbas Kiarostami and Lav Diaz and more Conceiving of disaster as intersubjective ethics between humans and nonhuman alterity forces of nature errant technology monsters ghosts and other entities it analyses how formal techniques and narrative strategies render encounters in which human protagonists are confronted with the threat of death and respond in ways that can be instructive for our planet's present juncture *Shadow of Spirit* Philippa Berry,Andrew Wernick,2006-04-27 By illuminating the striking affinity between the most innovative aspects of postmodern thought and religious mystical discourse Shadow of Spirit challenges the long established assumption that western thought is committed to nihilism This collection of essays by internationally recognised scholars explores the implications of the fascination with the sacred divine or infinite which characterizes much contemporary thought It shows how these concerns have surfaced in the work of Derrida Baudrillard Lyotard Kristeva Irigaray and others Examining the connection between this

postmodern turn and the current search for a new discourse of ethics and politics it also stresses the contribution made by feminist thought to this unexpected intellectual direction World of Warcraft: Vol'jin: Shadows of the Horde Michael A. Stackpole, 2013-07-02 In this all new novel based on the globally popular video game World of Warcraft the major seismic upheavals to Azeroth caused by the Cataclysm have subsided but the effects of this disaster linger as all out war erupts between the Horde and the Alliance consuming the attention of both factions *The Culture of Disaster* Marie-Hélène Huet, 2024-05-31 From antiquity through the Enlightenment disasters were attributed to the obscure power of the stars or the vengeance of angry gods As philosophers sought to reassess the origins of natural disasters they also made it clear that humans shared responsibility for the damages caused by a violent universe This far ranging book explores the way writers thinkers and artists have responded to the increasingly political concept of disaster from the Enlightenment until today Marie H l ne Huet argues that post Enlightenment culture has been haunted by the sense of emergency that made natural catastrophes and human deeds both a collective crisis and a personal tragedy From the plague of 1720 to the cholera of 1832 from shipwrecks to film dystopias disasters raise questions about identity and memory technology control and liability In her analysis Huet considers anew the mythical figures of Medusa and Apollo theories of epidemics earthquakes political crises and films such as Blow Up and Blade Runner With its scope and precision *The Culture of Disaster* will appeal to a wide public interested in modern culture philosophy and intellectual history Ghosts of the Shadow Market Cassandra Clare, Sarah Rees Brennan, Maureen Johnson, Kelly Link, Robin Wasserman, 2020-07-07 A 1 New York Times bestseller From 1 New York Times and USA TODAY bestseller Cassandra Clare comes an exciting short story collection that follows Jem Carstairs as he travels through the many Shadow Markets around the world Ghosts of the Shadow Market is set in the world of the Shadowhunters The Shadow Market is a meeting point for faeries werewolves warlocks and vampires There the Downworlders buy and sell magical objects make dark bargains and whisper secrets they do not want the Shadowhunters to know Through two centuries however there has been a frequent visitor to the Shadow Market from the very heart of the Shadowhunters world Jem Carstairs is searching through the Shadow Market in many different cities over long years for a relic from his past Follow Jem and see against the backdrop of the Shadow Market s dark dealings and spectacle Anna Lightwood s doomed romance Matthew Fairchild s great sin and Tessa Gray as she is plunged into a world war Valentine Morgenstern buys a soul at the Market and a young Jace Wayland s soul finds safe harbor In the Market is hidden a lost heir and a beloved ghost and no one can save you once you have traded away your heart Not even Jem **Disaster Upon Disaster** Susanna M. Hoffma, Roberto E. Barrios, 2019-10-03 A consistent problem that confronts disaster reduction is the disjunction between academic and expert knowledge and policies and practices of agencies mandated to deal with the concern Although a great deal of knowledge has been acquired regarding many aspects of disasters such as driving factors risk construction complexity of resettlement and importance of peoples culture very little has become protocol and procedure

Advanced Deep Learning Strategies for the Analysis of Remote Sensing Images Yakoub Bazi, Edoardo Pasolli, 2021-06-15 The rapid growth of the world population has resulted in an exponential expansion of both urban and agricultural areas Identifying and managing such earthly changes in an automatic way poses a worth addressing challenge in which remote sensing technology can have a fundamental role to answer at least partially such demands The recent advent of cutting edge processing facilities has fostered the adoption of deep learning architectures owing to their generalization capabilities In this respect it seems evident that the pace of deep learning in the remote sensing domain remains somewhat lagging behind that of its computer vision counterpart This is due to the scarce availability of ground truth information in comparison with other computer vision domains In this book we aim at advancing the state of the art in linking deep learning methodologies with remote sensing image processing by collecting 20 contributions from different worldwide scientists and laboratories The book presents a wide range of methodological advancements in the deep learning field that come with different applications in the remote sensing landscape such as wildfire and postdisaster damage detection urban forest mapping vine disease and pavement marking detection desert road mapping road and building outline extraction vehicle and vessel detection water identification and text to image matching
