Shadows in the Sea Harold W. McCormick, 2017-08-08 Captain Young and I for some years have been gathering material from all over the world about the Selachians the Sharks Skates Rays and their allies of which there are more than 600 known species We originally intended merely to up date Captain Young s book *Shark Shark* published by Gotham House in 1934 and now a collector s item but as the material ever expanded it was decided that an entirely new book covering a much broader field was needed Adaterial was collected from all over the world for many years When Captain Young and I felt that the research was nearly completed we called upon Tom Allen an experienced newspaperman to aid us in transforming the research material into a book Tom and I continued the research up to and beyond the completion of the manuscript Tom also did further research and added new material in the course of writing the book In all scientific classifications the Selachians are separated clearly from the Teleosteans or Bony Fishes and there are even leading ichthyologists ho do not regard the former as fishes at all but rather as representing a separate and distinct Class of animal life **Shadows in the Sea** Harold Weber McCormick, Thomas Benton Allen, 1963 *Shadows in the Sea. The Sharks, Skates and Rays. Illustrated. [By] Harold W. McCormick and Tom Allen with Captain William E. Young* Harold Weber MACCORMICK, Thomas Benton ALLEN, William Edward YOUNG, 1964 **Sharks, Skates, Rays, and Chimaeras** John Richard Thompson, Stewart Springer, 1965 The Sharks of North America Jose I. Castro, 2011-07-28 A complete reference to all the sharks inhabiting North American waters with excellent color illustrations of all the species The Devil's Teeth Susan Casey, 2006-05-30 Presents the author s first hand account of her stay on the Farallon Islands in the shark infested waters thirty miles west of San Francisco and includes information on the sharks behavior and scientists who study them **The Real Jaws** Rachel Lee Perez, 2025-08-30 Explores the 1916 New Jersey shark attacks their impact on shark fear and how media shaped harmful misconceptions In the Summer of 1916 a series of shark attacks along the New Jersey shore would send shockwaves across its otherwise peaceful beach towns Spanning a terrifying two weeks including the deaths of nearly five people these attacks would officially cement an innate fear of sharks that humans have felt since the beginning of time Although initially kept under wraps by the tourism industry these attacks would ultimately plaster the front pages of newspapers across the United States and even overseas As the news spread the line between fact and fiction blurred reshaping our cultural and scientific understanding of the beasts of the ocean It was the 1916 shark attacks that would establish our modern day misconstrued perception of sharks as evil man eating monsters and would later inspire the film *Jaws* which would perpetuate the same harmful narrative *The Real Jaws* takes an in depth look at each one of the attacks and how they instilled a centuries long fear of the ocean s apex predator It explores the various theories explaining why these attacks may have occurred and the probability of something like this happening again And finally it analyses the way the harmful misconceptions derived from films like *Jaws* have redefined

humanity's relationship with sharks leading humans to become the predators and sharks to become the prey

Biomechanics of Feeding in Vertebrates V.L. Bels, M. Chardon, P. Vandewalle, 2012-12-06 Although feeding is not yet been thoroughly studied in many vertebrates taxa and different conceptual and methodological approaches of the concerned scientists make a synthesis difficult the aim of the editors is to provide a comprehensive overview of the feeding design in aquatic and terrestrial vertebrates with a detailed description of its functional properties The book emphasizes the constant interaction between function and form behaviour and morphology in the course of evolution of the feeding apparatus and way of feeding both complementary and basically related to survival interspecific competition adaptation to environmental changes and adaptive radiations Special stress is drawn on quantification of the observational and experimental data on the morphology and biomechanics of the feeding design and its element jaws teeth hyoid apparatus tongue in order to allow present and further comparisons in an evolutionary perspective *The Private Life of Sharks* Michael Bright, 2000 Explores the world of one of the most fascinating frightening creatures on the planet offering a compelling look at the shark's often misunderstood life in the wild **The Complete Outfitting & Source Book for Sport Diving** Larry Clinton, 1978
