Losing Ground Environmental Stress And World Food Prospects:

Losing Ground Erik P. Eckohlm,1978 The Cropland Crisis Pierre Crosson,2013-10-18 This book examines the factors affecting the demand for agricultural land in the United States and the costs of meeting increasing demand Originally published in 1982 Water Resources and Agricultural Development in the Tropics Christopher J. Barrow,2016-07-01 First published in 1988 There are many excellent texts on water supply and irrigation engineering irrigation economics agricultural development and the problems which often plague such efforts Few syntheses of such writings have been made despite a clear need for them from people interested in water resources and agricultural development students of geography economics development studies and agricultural management administrators planners and aid agency staff This book attempts to provide a broad interdisciplinary introduction for such people **POPULATION AND THE ENVIRONMENT** John Scales Avery,2018-07-26 This book describes the steps needed to stabilize global population in order to avoid an environmental catastrophe It also presents a history of the struggle for women s rights and for their representation in politics science literature music and the visual arts Population And Environment Lourdes Arizpe,M. Priscilla Stone,David Major,Priscilla Stone,2019-06-04 This ambitious interdisciplinary volume places population processes in their social political and economic contexts while it considers their environmental impacts Examining the multi faceted patterns of human relationships that overlay alter and distort our ties to urban and rural landscapes the book focuses especially on the essential experi **Beyond the Green Revolution** Kenneth Dahlberg,2012-12-06 This book which is the result of an intellectual odyssey began as an attempt to explore and map the environmental and cross cultural dimensions of the continuing spread of the green revolution that package of high yielding varieties of grain fertilizers irrigation and pesticides that constitutes the core of modern industrial agriculture In the process of traversing the terrain of several intellectual traditions and cutting through various disciplinary forests and thickets a number of striking observations were made all leading to two sober ing conclusions First most intellectual maps dealing with agriculture fail to recognize it as the basic interface between human societies and their environment Because of this they are little better than the flat earth maps of earlier centuries in helping to understand global realities Second when agriculture is analyzed from a global perspec tive that takes evolution seriously one sees that the ecological risks as well as the energy and social costs of modern industrial agriculture make it largely inappropriate for developing countries Beyond that one can see a great need within industrialized countries to develop less costly less risky and more sustainable agricultural alternatives Early in the journey it became clear that conventional disciplinary approaches were inadequate to comprehend the scope and diversity of global agriculture and that a new multilevel approach was needed It also became clear that any new approach would have to try to correct certain Western biases and blind spots *Resource Utilization and Management* Dennis Arekpita Ogirri,2012-07-18 This book is on the study of resource utilization and management a case study of the impact of state land ownership and land use regulation on

development in Nigeria from 1955 1985 In 1978 the Federal Military Government of Nigeria promulgated a Land Use Decree whose objectives were to introduce a uniform land policy for the whole country control hoarding and speculating in land and facilitate the allocation of land for national development However critics of the decree argued that the new land policy amounted to nationalization of land in the country and wondered whether such development strategy was appropriate in the 21st century In light of the foregoing this author examined the impact of the new land policy on development in Nigeria from 1955 1985 using qualitative and quantitative methods The beginning and end of the study period coincide with the end of the colonial development plans that started in 1946 and ushered in Nigerias independence in 1960 and the end of the fourth national development plan of 1981 1985 under the military government that overthrew the civilian government in 1966 The study in this book is significant because of the importance of land as one of the most important factors of production in any society others being labor capital entrepreneurship and information resources The implementation problems associated with the new land use law are highlighted This author believes however that it is necessary that further research should be undertaken continually in the future especially with a view to examining the effectiveness of the implementation experiences since the promulgation of the land use law in 1978

Environment, Employment and Development A. S. Bhalla,1992

This study examines the employment implications of sustainable development especially for developing countries and reviews current approaches to minimizing environmental degradation Spectacular economic growth since 1945 based largely on technological advance has entailed major environmental costs which this book claims cannot be sustained except at the risk of our own survival

Ecology And Health K.R. Nayar,1998 The Book Unravels The Socio Economic And Public Health Dimensions Of The Ecological Conundrum In The Indian Context

Environmental Management and Development

Christopher J. Barrow,2005 The environment and its management has been and continues to be a very topical issue Existing environment and development texts place emphasis is on listing problems making warnings and voicing advocacy but by focusing on environmental management this informative book offers a very different perspective Moving on from the usual much discussed viewpoints Barrow looks towards practical management and problem solving techniques He clarifies the definition nature and role of environmental management in development and developing countries beginning with an introduction to the key terms issues and tools of environmental management which are linked and developed in later chapters and concluding by discussing who pays for environmental management and its future in developing countries Written by an experienced and well known author this clear user friendly book ideal for students of resource management geography and development studies makes excellent use of chapter summaries boxed case studies annotated further readings and websites discussion questions and illustrations
