Hackett,2016-05-25 This book examines how we perceive and understand abstract art in contrast to artworks that represent reality Philosophical psychological and neuroscience research including the work of philosopher Paul Crowther are considered and out of these approaches a complex model is developed to account for this experience The understanding embodied in this model is rooted in facet theory mapping sentences and partially ordered analyses which together provide a comprehensive understanding of the perceptual experience of abstract art **The Jews of France Today** Erik Cohen,2011-08-11 Based on a national empirical survey this book presents a rich portrait of the Jews of France today An expanded translation of a French edition the book explores the demographics identity communal participation social issues and values of this community **The Perceptual Structure of Three-Dimensional Art** Paul M.W. Hackett,2016-12-26 This book deals with philosophical aspects regarding the perception of spatial relationships in two and three dimensional art It provides a structural understanding of how art is perceived within the space created by the artwork and employs a mapping sentence and partial order mereology to model perceptual structure It reviews the writing of

philosophers such as Paul Crowther and art theorists such as Krauss to establish the need for this research The ontological model established Paul Crowther is used to guide an interactive account of his ontology in the interpretations of the perceptual process of three dimensional abstract art to allow the formulation of a more comprehensive philosophical account The book uniquely combines structuralist and post structuralist approaches to artistic perception and understanding with a conceptual structure from facet theory which is clarified with the help of a mapping sentence and partial order mereology

Mereologies, Ontologies, and Facets Paul M. W. Hackett, 2018-07-15 The assignment events objects state of beings etc to an experiential category is a fundamental activity carried out by human and by other animals So rudimentary are the processes involved in categorizing that it is indeed impossible to imagine conscious awareness to exist without the presence of categories A considerable body of writing exists on categories dating from the times of Classical philosophy Plato developed a categorical ontology and Aristotle produced one of the earliest examples of a complex understanding of basic ontologies A number of other categorially structured ontologies have been proposed including those by Lowe Westerhoff Chisholm etc The book is an edited collection of up to the moment essays that address critical aspects on the understanding
